

PHILIPS

Nasal CPAP Cushion
(30 pack)

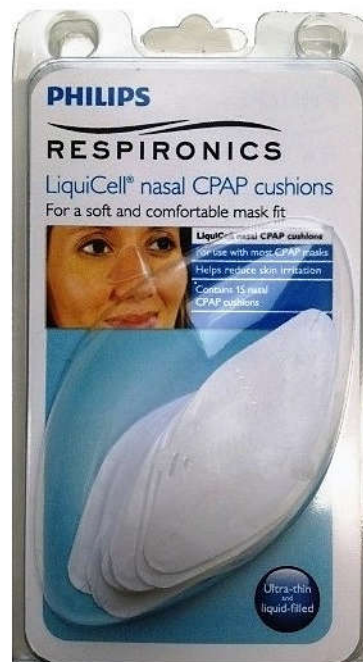

LiquiCell

Reduces skin irritation

Soft and comfortable

30 pack

HH1401

For a comfortable mask fit

Ultra-thin and liquid-filled cushions

A soft and comfortable liquid cell that helps reduce skin irritation. When applied across the nasal bridge area, LiquiCell helps to reduce skin irritation that may sometimes occur when using positive airway pressure (PAP) therapy.

Compact design

- Contains 30 CPAP cushions

Comfortable

- LiquiCell acts a pad between the mask cushion and the skin.

Medical technology

- Protects your skin

Highlights

Comfortable liquid cell

LiquiCell® is a medical technology that helps prevent skin tissues from being stretched or torn. The ultra-thin cells contain a liquid that is in constant motion allowing your body to glide or float with an object – both reducing shear and friction of the skin and improving blood perfusion to the tissues.

Helps reduce skin irritation

The LiquiCell Nasal CPAP Cushions are an option for those who are prone to red marks or bumps forming on the bridge of the nose from mask irritation.

Multipack

LiquiCell is sold as a pack of 30 single use disposable cushions.
