## AC1200 WiFi VDSL2/ADSL2+ Modem Router

Model D6220

**NETGEAR**<sup>®</sup>

## Package Contents

## 1. Plug In Your Modem Router

Connect the DSL port on the modem router to a DSL outlet.

If your package came with a DSL microfilter, install the DSL microfilter and connect it to the DSL port on the modem router. You can also connect a phone to the DSL microfilter.

Connect the power adapter to the modem router and press the **Power** button. The Power LED  lights amber and then turns green when the modem router is ready. If the modem router is connected to a DSL service, the DSL LED  lights green.

Position the antennas as shown. Later you can adjust them as needed for better reception.

## 2. Connect to the Internet

You can either use an Ethernet cable or connect with WiFi to the modem router. To connect with WiFi:

Make sure that the WiFi LED () on the modem router is lit. Find the modem router's preassigned WiFi network name and password on the label on the modem router.

Open the WiFi connection manager on your computer or WiFi device, find the modem router's WiFi network name, and use the modem router's password to connect.

Launch a web browser. If the NETGEAR installation assistant does not display, visit **[www.routerlogin.net](http://www.routerlogin.net)**. If a login window displays, enter **admin** for the user name and **password** for the password.

Follow the NETGEAR installation assistant steps to connect to the Internet.

If the modem router does not connect to the Internet, see the user manual, which is available online at <http://support.netgear.com/product/D6220>, or visit [community.netgear.com](http://community.netgear.com) for help.

## All Set Up!

**Note:** To connect to the modem router, you can use either a computer with an Ethernet cable connection or a computer with a WiFi connection.

**Note:** If you set up the modem router for a DSL connection, you do not need to use the red Internet port on the modem router.

**For more information about your modem router, see the Do More booklet.**
