Highlights

Smart Detection System

The new robot vacuum cleaner is equipped with the Smart Detection System, a combination of smart chips, up to 18 sensors, gyroscope and accelerometer, that makes the robot efficient to clean on its own. The Robot understands the environment and chooses an optimal cleaning strategy to clean your home as quickly as possible. The robot does not get jammed and returns to its docking station when necessary.

Infrared sensors

The new Philips robot vacuum cleaner is equipped with 6 Infrared sensors for detecting and avoiding obstacles such as walls, lamps or cables, so your floors are cleaned carefully. Finally you can enjoy a clean house without your interference.

Scheduling function

The new robot vacuum cleaner offers a 24 hour scheduling function, so you can program your next cleaning session 24 hours in advance.

Auto return to base station

When the battery of the Philips robot vacuum cleaner is almost empty, it will automatically go to the docking station to charge itself, so it will get ready for its next cleaning session.

Slim design

With its slim design at only 6 cm of height, the robot can easily reach low areas and remove the dust accumulated under your furniture.

2-step cleaning system

Firstly, the two extra long side brushes swipe dirt and dust into the path of the robot. Secondly, the nozzle picks up all dirt and dust from your floors, thanks to its powerful motor.

Dust Sensor

The dust sensor feature enables the robot to automatically recognize the areas where most dust is accumulated, so it stays in that area for a few seconds more to have a deeper cleaning.

Contour following nozzle

The robot vacuum cleaner comes with a movable nozzle that follows the contours of the floors, carpets, rugs, etc. to ensure accurate cleaning results.
