Highlights

Sensitive brush

The sensitive brush is ideal for a morning cleanse to prepare your skin for the day ahead. The specially designed filaments are even thinner and softer than those of the normal brush head to deliver an even softer and delicate cleansing experience, removing sebum and impurities that build up on your skin overnight.

Deep-pore brush

The deep-pore brush is designed to deeply clean your pores and helps reduce the appearance of blackheads, ideal for a deeper cleanse at the end of the day. It has 20.000 bristles, as many as the number of pores on your face, to reach more pores in one treatment. The brush comes with a unique combination of thicker and thinner bristles. The thin bristles reach the pores and cleanse them well, while the thicker bristles swipe away the dirt.

Exfoliation brush

The exfoliation brush is specially designed to provide a gentle and effective exfoliation, removing dead skin cells and improving blood circulation, perfect for a weekly cleanse. Filaments have a specially designed shape: the shorter filaments gently exfoliate while the longer ones wipe away the dead skin cells.

Face Cleansing Brush Bristles

The Philips VisaPure brushes come with a 5-in-1 bristle technology: 1) Silky soft ends: each bristle is polished twice to ensure a smooth glide on the skin 2) Extra-long bristles to cushion the skin, bending easily for an absolute comfort on the skin 3) One of the thinnest bristles on the market, up to 3x smaller than the diameter of the average pore 4) Voluptuously dense brushes: to give a soft, luxurious feel while cleansing and reaching more pores with one treatment 5) Specifically selected delicate bristle material, non-water absorbing enabling it to dry quickly.

Snap-on brush head

The brushes can be easily attached and detached from the handle and are compatible with all Philips VisaPure models.

3 months of face care use

Replace the brushes regularly for the best cleansing results. The brushes are easy to replace by simply pulling off the brush from the device.
