

Philips SmartPro Compact
Robot vacuum cleaner

Super Slim

2-step cleaning system
120 min runtime

FC8705/82

A thorough clean, even under low furniture

With Smart Detection system and slim 6 cm height

The Philips SmartPro Compact robot vacuum cleaner cleans for you. Thanks to the Smart Detection System, the robot optimizes the cleaning strategy to clean your home thoroughly. With its slim design, it can clean even under low furniture.

Thorough cleaning performance

- 2-step cleaning system to capture dust and dirt
- 4 cleaning modes to adapt to different areas
- Contour following nozzle adjusts to uneven floors
- The robot detects the most dirty areas for a deeper clean

Cleans on its own

- Automatically returns to base station for charging
- Ability to schedule cleaning 24 hours in advance
- Powerful Li-Ion battery for 120 min operating time
- Smart Detection System adapts cleaning to any environment

Cleans where others can't reach

- 6 cm slim design to clean under low furniture

Takes care of your furniture

- Soft bumper to prevent damage to your furniture

PHILIPS

Highlights

2-step cleaning system

Firstly, the two extra long side brushes swipe dirt and dust into the path of the robot. Secondly, the nozzle picks up all dirt and dust from your floors, thanks to its powerful motor.

4 cleaning modes

4 cleaning modes to adapt to different areas in your home. The z-type mode drives the robot in a parallel zig-zag pattern, when it discovers a relatively larger space. The bounce mode drives the robot in a straight line, when it bumps into an object the robot will choose another random direction. With the spiral mode the robot moves in a spiral motion with an increasing radius. The wall-following mode drives the robot to clean while staying close and parallel to the wall.

Auto return to base station

When the battery of the Philips robot vacuum cleaner is almost empty, it will automatically go to the docking station to charge itself, so it will get ready for its next cleaning session.

Contour following nozzle

The robot vacuum cleaner comes with a movable nozzle that follows the contours of the floors, carpets, rugs, etc. to ensure accurate cleaning results.

Dust Sensor

The dust sensor feature enables the robot to automatically recognize the areas where most

dust is accumulated, so it stays in that area for a few seconds more to have a deeper cleaning.

Scheduling function

The new robot vacuum cleaner offers a 24 hour scheduling function, so you can program your next cleaning session 24 hours in advance.

Slim design

With its slim design at only 6 cm of height, the robot can easily reach low areas and remove the dust accumulated under your furniture.

Soft Bumper

The robot vacuum cleaner comes with a soft bumper to prevent damage to your furniture.

Specifications
