

ColorEdge[®]

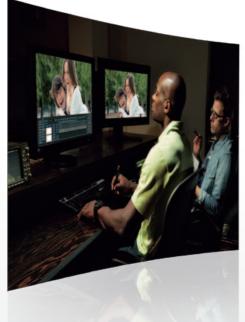

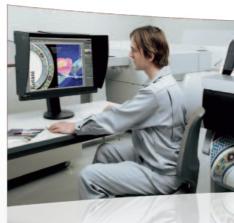

True to Creativity

Precision beyond color.

Express your thoughts and inspirations exactly as you envision — ColorEdge helps to make that a reality. Each detail and nuance is realized in the final work, providing you an even greater satisfaction with your creations. Accurate color, consistent image quality, and ease of use are why EIZO's ColorEdge lineup gives creatives around the world the ability to express their true vision.

Let your imagination soar and your creativity blossom. Your passion will guide you and ColorEdge will ensure that you can express your ideas precisely as you have imagined.

ColorEdge Quality for Achieving Your Creative Vision

True Reproducibility

To achieve the most accurate color display, EIZO developed its own application-specific integrated circuit (ASIC) which is equipped in each ColorEdge monitor. With this ASIC, the gamma level of each monitor is adjusted at the factory to ensure that tones are displayed as intended without color banding.

Ease of Use

ColorEdge meets user needs with a wide range of monitors packed with features for creators of all levels. Designers and printers can rest assured that ColorEdge will ensure a smooth and consistent workflow through to the back-end. Video creators can take advantage of the features that many ColorEdge models include specifically for video creation. Those who want to enjoy working with digital photography can easily carry out color matching using ColorEdge. All of these features and more are included to ensure that ColorEdge is optimal for users' creative needs.

Long-Term Reliability

As more desktop LCD monitor brands outsource development and production to third parties, EIZO remains convinced that the best way to deliver the quality that our customers expect is to maintain an integrated approach. Each ColorEdge monitor is developed, manufactured, and quality-control tested in-house at EIZO's own factory. This gives us the confidence to back each ColorEdge monitor with the industry's only five-year manufacturer's warranty.

For Professionals

Get the best in both color and convenience for the optimal creative workflow.

CG Series

For Hobbyists and Prosumers

Create, edit, and enjoy photography, illustration, and more.

CX/CS Series

ColorEdge Common Features

Vivid Colors Reproduced to **Industry Standards**

The wide color gamut of ColorEdge monitors reproduces almost the entire Adobe® RGB color space so images shot in Adobe® RGB will be displayed correctly. Photos of vibrant blue skies and lush green forests are reproduced faithfully in a way that monitors limited to an sRGB color space cannot display. The wide color gamut also ensures reproduction of almost the entire ISO-coated and US web-coated CMYK color spaces used in printing.

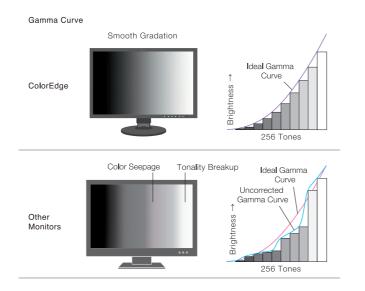

Not applicable to the CS230.

Adjusted at the Factory for **Smooth Color Gradations**

The gamma level for each ColorEdge monitor is adjusted at the factory by measuring the R, G, and B gamma values from 0 - 255, then using the monitor's 16-bit look-up-table (LUT) to select the 256 most appropriate tones and achieve the desired value. This ensures the smoothest color gradations in your images.

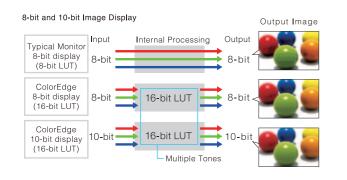

Color Space Comparison Adobe® RGB Color Space (representation DCI-P3

10-Bit Simultaneous Display

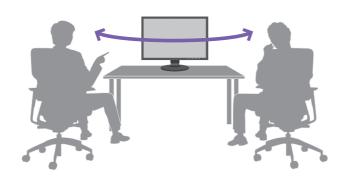

Using the DisplayPort or HDMI inputs, ColorEdge monitors offer 10-bit simultaneous color display* from a 16-bit look-up-table which means they can show more than one billion colors simultaneously. This is 64 times more colors than you get with 8-bit display, resulting in smooth color gradations and reduced Delta-E between two adjacent colors.

*A graphics board and software which support 10-bit output are necessary for 10-bit display. Equipment that supports Deep Color is necessary when using the HDMI input.

Wide Viewing Angles with IPS Panels

The 178° wide viewing angles afforded by the IPS panel technology allows two or more people to view the screen at once with little change in color or contrast.

Color Management Software

ColorNavigator 6

To properly manage color in your work, it is necessary to ensure your monitor maintains consistent settings. ColorEdge monitors come bundled with EIZO's own color management software called ColorNavigator 6 which allows you to easily carry out

For the CX or CS Series, an external calibration sensor is necessary to use ColorNavigator 6.

Quickly Calibrate to Preset or User-Assigned Values

Preset values for web contents, photography, and printing are included in the target values. Simply select the desired preset, click "Adjust", and ColorNavigator 6 will begin calibrating your monitor.

Main window

What is Calibration?

Calibration is a method by which a monitor's display characteristics are adjusted to a target value using a special sensor. Software calibration modifies the signal from your video card to display more accurate color and can be carried out for conventional monitors. Hardware calibration controls the hardware of the monitor directly by utilizing the LUT (look-up-table) inside the monitor. This method offers higher precision and better gradation characteristics compared to software calibration. With ColorEdge and ColorNavigator 6, you can adjust the monitor's display directly through hardware calibration.

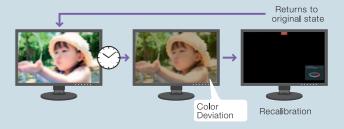

Experienced users can assign the desired values for brightness, white point, and gamma before calibrating for further improving color matching.

Manual Adjustment Screen

Easy Recalibration to Maintain **Color Consistency**

A monitor needs to be recalibrated at regular intervals to maintain color accuracy. ColorNavigator 6 includes a recalibration reminder that will appear after a certain number of user-determined hours. You can also be reminded without starting up ColorNavigator 6 by an LED on the monitor's front panel that lights up.

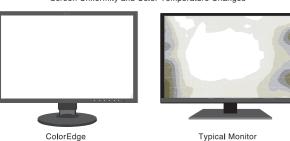

For the CX or CS Series, an external sensor is necessary to carry out calibration.

ColorEdge Common Features

Uniformity from Corner to Corner

Fluctuations in brightness and chromaticity on different parts of the screen are a common trait of LCD monitors. To counteract this, ColorEdge monitors use EIZO's patented digital uniformity equalizer (DUE) technology to ensure stable image display and counterbalance the influences that a fluctuating temperature may have on color temperature and brightness.

Screen Uniformity and Color Temperature Changes

Minimized Reflections with Non-Glare Panel

ColorEdge monitors are equipped with an IPS non-glare panel for high visibility. They are also equipped with dimming technology that minimizes flicker and helps prevent eye fatigue for a more comfortable working environment.

Commitment to Quality

*Usage time is limited to 30,000 hours.

Monitor must be used within the recommended brightness of 120 cd/m² or less and the color temperature between 5000 - 6500 K.

Brightness and Color Warranty

5-Year Manufacturer's Warranty

The brightness and color of the CG Series is warranted for up to 10,000 hours* from the date of purchase.

ColorEdge monitors are backed by a manufacturer's 5-year warranty that covers all

components including the LCD panel*. EIZO manufactures its products at its own factories to

allow close control over production quality and ensure each monitor is built to last.

Zero Bright Pixels

EIZO guarantees its ColorEdge monitors will be free from bright sub-pixels for six months from the date of purchase.

Ergonomic Stand for Comfort and Convenience

Adjust the screen to the most comfortable angle and reposition it to show your work to a colleague or client. The monitors come with a versatile stand that offer height, tilt, and swivel adjustments as well as portrait display.

Portrait mode not available with the CG318-4K stand.

CG2420 and CS2420 Stand

Ample Screen Sizes for Creative Work

The CG247X, CG2420, and CS2420 display two A4 pages plus tool palettes on their 24.1-inch screens. The CG277, CX271, and CS270 give you even more room to work with their spacious 27-inch screens.

Energy-Saving LED Backlight

ColorEdge monitors are equipped with a wide-gamut LED backlight* for color reproducibility. LED backlights save energy and contain no mercury for minimal impact on the environment after they are disposed of.

Not applicable to the CS230.

ColorEdge CG Series Features

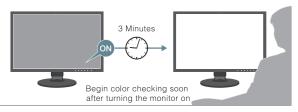

Built-In Sensors to Automate Your Workflow

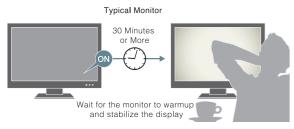

Automate your calibration with the sensor that is housed within the front bezel of every CG Series monitor. The sensor swings onto the screen only when calibrating, eliminating the need for a third-party calibration device. It even operates while the monitor is in portrait mode.

Stable Color in Just 3 Minutes

A typical monitor takes 30 minutes or more for its brightness, chromaticity, and tone characteristics to stabilize. The CG318-4K, CG248-4K, CG247X, and CG2420 take a mere 3 minutes. Whether you are working in a studio or taking the monitor with you on location, you get reliable color display soon after turning the monitor on.

ColorEdge CG318-4K, CG248-4K, CG247X, CG2420

See How Other Devices Display Color with Media Emulation

ColorNavigator 6 emulates the color characteristics of other media devices* such as tablets, smartphones, notebook PCs, and other LCD/CRT monitors. With a spectrophotometer, ColorNavigator 6 reads the emulated device's color patches as they appear in the web browser and creates an ICC profile. By using this profile with a ColorEdge monitor, content creators can see how their clients view color on their respective devices.

Media emulation is available for the CG Series only. Not applicable to the CG2420.

Light-Shielding Hood

The CG Series comes bundled with a shading hood that effectively prevents glare on the monitor's screen cause by ambient lighting. The CG318-4K, CG248-4K, CG247X, and CG2420's shading hoods are newly designed and attach to the monitor magnetically. This allows users to attach the hood quickly and easily without needing to connect separate parts.

TÜV Color Accuracy and FograCert Softproof Monitor Certified

The ColorEdge CG318-4K, CG248-4K, CG277, CG247X, and CG2420 have obtained TÜV Rheinland's Color Accuracy (Quick Stability grade) certification. TÜV Rheinland Color Accuracy is the first quality and performance criterion to measure the color accuracy of display devices for multiple graphics fields such as photography, post production, design, and printing.

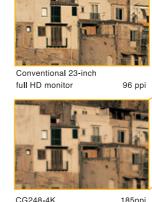

The monitors* are also recognized by Fogra as Class A FograCert Softproof Monitors. Using them in a FograCert Softproofing System ensures designers, print specifiers, and print producers can rely on the softproof for predictable and consistent results.

For more information, visit: http://www.eizoglobal.com/library/management/certifications/ *The CG247X has applied for Fogra certification.

4K Resolution for Exceptional Detail

The Highest Pixel Density Yet

The CG248-4K offers the highest pixel density yet in the ColorEdge linup at an astonishing 185 ppi for exceptionally smooth image display. The 4K UHD screen (3840×2160) makes it ideal for high-resolution photography or as a reference monitor for 4K video creation.

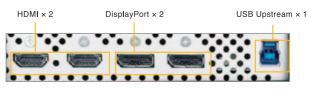

Quadruple the Resolution of Full HD

The CG318-4K displays the DCI 4K standard (4096 \times 2160) which is four times that of full HD (1920 \times 1080). It's ideal for creating, editing, and referencing with 2D and 3D CGI, VFX, compositing, and color grading.

DCI 4K at 60 Hz with a Single Cable

The CG318-4K supports the DCI 4K resolution at 60 Hz with the DisplayPort 1.2 input and at 30 Hz with both HDMI inputs.

For more information on compatibility and tips for a more comfortable 4k workstation, visit: http://www.eizoglobal.com/i/4k_guide/

 $\mathbf{1}$

ColorEdge CG Series Features

For Media and Entertainment

3D LUT for Accurate Color Display

A 3D LUT is included in the CG Series which adjusts colors individually on an RGB cubic table. With the bundled ColorNavigator 6 software's emulation function, the 3D LUT applies a film look to the image so creators can check how it will be seen by their audience. The 3D LUT also improves the monitor's additive color mixture (combination of RGB), which is a key factor in its ability to display

Multiple Preset Color Modes

CG Series monitors provide quick access to several broadcast-standard preset color modes via a button on the front of the monitor. The available modes are Rec. 709, EBU, SMPTE-C, and DCI. 4K models also include a preset mode for Rec. 2020.

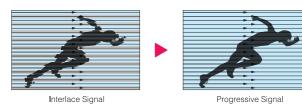

Not available with the CG2420.

I/P Conversion for Flicker-Free Display

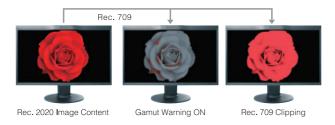

The HDMI input of ColorEdge monitors supports I/P (interlace/progressive) conversion for converting the interlace signals from TV and video into progressive signals for flickerfree display.

Not available with the CS230.

Rec. 709 Out of Gamut Warning

ColorEdge 4K monitors include a Gamut Warning preset. When selected, the areas of a Rec. 2020 image that cannot be reproduced using Rec. 709 are clearly indicated by converting them to shades of gray. An additional mode called Rec. 709 Clipping allows the editor to view Rec. 2020 images with the Rec. 709 color space, simulating how it would look to their audience in an HDTV environment.

True Black Display

In compliance with the DCI standard, the ColorEdge CG318-4K, CG247X, and CG2420 offer a high contrast ratio of 1500:1 for producing true blacks that are otherwise difficult to display on a typical LCD monitor.

When viewing the screen from an angle in a dimly lit room, dark tones typically appear washed out due to the display characteristics of LCD backlights. The CG Series is equipped with a film which allows tones to retain their depth even when viewed from an angle.

Area Light for Dark Editing Rooms

RadiLight is a lighting solution that easily attaches directly to the monitor and shines a 6500 K light on the wall behind it. This reduces eye fatigue while not impacting the screen's visibility. It is also equipped with a spotlight for conveniently navigating your workspace.

Quality Control Software

ColorNavigator NX

ColorNavigator NX offers quality control (QC) and asset management of client ColorEdge monitors. It covers calibration, emulation, built-in sensor correlation, and color mode settings. The software is most effectively used with EIZO's ColorNavigator Network solution to allow an administrator to perform QC operations on all ColorEdge monitors from a central location.

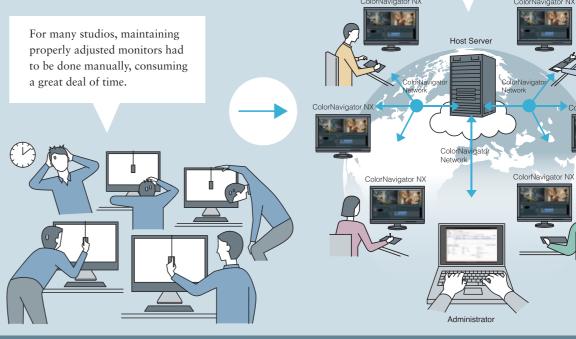

Network Color Management Software

ColorNavigator Network

ColorNavigator Network provides centralized quality control of ColorEdge monitors that have ColorNavigator NX installed.

ColorNavigator Network is hosted on a secure cloud server. An administrator can set the color modes, schedule self-calibration, activate key lock to prevent unintended changes to color settings, register or adjust asset management settings, and import/export monitor settings.

ColorNavigator Network makes managing multiple monitors on a network simple and efficient.

Benefits

Work Efficiency Significantly reduce your workload and annual

maintenance costs.

Remote Color Management

Unify color display on all ColorEdge monitors within your organization, even those that are located in other cities or countries.

Asset Management Smoothly manage assets

from a single PC.

ColorEdge CS Series - For Aspiring Creatives

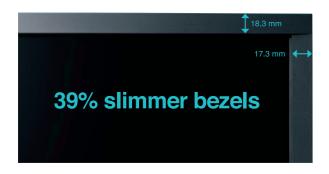

ColorEdge NEW CS2420

Sleek, User-Friendly Design

Slimmer Bezels

The slim cabinet features unobtrusive frames that are 39% slimmer than its predecessor's so you can focus more on the screen.

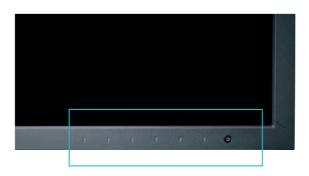

Built-In Handle for Easy Carrying

A carrying handle on the back of the monitor allows you to easily move it from one location to another.

Seamless Electrostatic Switches

The flat design uses electrostatic switches on the front bezel in place of traditional buttons for seamless access to the monitor settings.

Easy-Access USB Ports

The monitor is equipped with three easy-to-access USB 3.0 ports, including one port for battery charging devices such as a smartphone.

Global Collaborations

ColorEdge® Ambassador Program

The ColorEdge Ambassador Program showcases professional photographers, designers, filmmakers, and other creatives who are committed to inspiring and educating artists around the world of all levels. EIZO's Ambassadors – all of them ColorEdge users – are passionately dedicated to their craft and prepare the best equipment for realizing their creative vision. Each Ambassador has an online profile and features special content on the dedicated webpage.

http://www.eizoglobal.com/i/ambassadors

EIZO and Magnum Collaboration

Since 2013, EIZO and Magnum Photos have been working on a global collaboration under which 15 photographers and digital directors at Magnum's offices in the USA and Europe have integrated EIZO's ColorEdge monitors into their color management workflow. They are using the monitors for the production of contemporary photos, the restoration of historical Magnum imagery, and to provide objective feedback about their experiences to EIZO. Individual profiles of each of the participating Magnum photographers with insights into their careers, bodies of work, and experiences with their EIZO monitors are shared on EIZO's website.

EIZO — The Visual Technology Company

Comprehensive Solutions

EIZO integrates hardware and software technologies with consulting, web hosting, and other services for customers in a wide range of fields.

Integrated Approach

With over 45 years of technical expertise, EIZO is dedicated to developing innovative and high quality visual display solutions.

R&D

To incorporate the latest technologies in our products, we follow a unique in-house research and development production model.

Printed Circuit Boards

We apply our in-house production model to the production of our own printed circuit boards (PCBs) that are used in each EIZO monitor — essential to providing comprehensive quality control.

Manufacturing

Our in-house manufacturing combines manual and automated operations to ensure high quality products are made as efficiently as possible.

ColorEdge

Color Management Monitor Solutions

Quality Control

We use our own anechoic chambers to confirm that our products comp with international regulations covering electromagnetic interference (EMI) and susceptibility. We also conduct long-life testing where our monitors are kept powered on for thousands of hours and their image quality is checked regularly.

Customization

We offer extensive customization for select monitors to meet the diverse requirements of various markets, including mission-critica fields such as maritime and air traffic control.

Global Reach

EIZO products are highly regarded in many specialty field throughout the world because of their accurate and stable image display. EIZO is based in Japan and is represented over 80 countries by a network of group companies and exclusive distributors.

FlexScan

Business Enterprise Monitor Solutions

FORIS

Innovative Technology

Medical Grayscale Accuracy

EIZO carefully measures and sets each and every grayscale tone at the factory to create medical monitors compliant with DICOM Part 14 standards. This ensures medical professionals are viewing the most consistent shading possible on their screen for the most accurate diagnosis. Calibration is also simplified with EIZO's medical quality control solutions to maintain image consistency over time.

Wide Range of Screen Sizes

EIZO offers an extensive range of screen sizes from 10 to 60 inches to meet requirements of any installation.

Flicker-Free Images

Due to the way brightness is controlled on LED backlights, many people perceive flicker on their screen which causes eye fatigue. EIZO's FlexScan EV series makes flicker unperceivable without compromising color stability.

Visibility-Enhancing Technology

EIZO's unique Smart Insight technology automatically detects dark areas of the screen and adjusts the brightness of each pixel while reproducing the images with a realistic sense of depth. It is used in professional gaming and security markets.

¹ Usage time is limited to 30,000 hours.
2 Brightness of the CG Series is warranted for up to 10,000 hours if it is used within the recommended brightness of 120 cd/m² or less and the color temperature between 5000 - 6500 K.
3 Free from bright sub-pixels for 6 months from the date of purchase.
With current LCD technology, a panel may contain a limited number of missing or flickering pixels.

Accessories

Supported Models: CG248-4K, CG2420, CS2420 CH2400 is bundled with the CG248-4K and CG2420

CH7

Supported Models: CS240

CH₆

Supported Model: CS230

CH₅

Supported Models: CG277, CX271, CS270 CH5 is bundled with the CG277

A monitor hood is bundled with the CG318-4K and CG247X.

Area Light

RadiLight[®]

Easily attachable 6500 K light that relieves eye fatigue when viewing your monitor in a dark room.
Supported Models: CG318-4K, CG248-4K, CG277, and CG247X

Calibration Device

EX3

Adjust CX and CS series monitors to your ideal settings with this external calibration device.

ideal

settings with this external calibration device.

Monitor Cleaning Kit

ScreenCleaner^{**}

Wipe away dust and fingerprints with this screen cleaner kit. Includes pump spray and cloth. Bundled with the CG series.

Software

Color Management Software

ColorNavigator 6

Color management software for simple calibration and predictable color results.

Quality Control Software

ColorNavigator NX

Quality control software for management of client ColorEdge monitors.

Network Color Management Software

ColorNavigator Network

Network color management software for centralized quality control of ColorEdge monitors on a network.

Software System Requirements (as of June 2016) See www.eizoglobal.com for the latest information.

	ColorNav	igator 6	ColorNavigator NX			
	Macintosh	Windows	Macintosh	Windows	Linux	
Compatible OS	OS X El Capitan (10.11) / Yosemite (10.10) / Mavericks (10.9) / Mountain Lion (10.8) / Mac OS X 10.7.5	Windows 10 (32-bit, 64-bit) / 8.1 (32-bit, 64-bit) / 7 (32-bit, 64-bit)	OS X El Capitan (10.11) / Yosemite (10.10) / Mavericks (10.9) / Mountain Lion (10.8) / Mac OS X 10.7.5	Windows 10 (32-bit, 64-bit) / 8.1 (32-bit, 64-bit) / 7 (32-bit, 64-bit)	Red Hat Enterprise Linux Workstation 6	
Additional Requirements	Apple Macintosh that fulfills the OS system requirements Two or more available USB ports Minimum 16.7 million display colors Recommended minimum resolution of 1024 x 768	· PC that fulfills the OS system requirements				
Supported Monitors	ColorEdge CG Series ColorEdge CX Series ColorEdge CS Series		ColorEdge CG Series ColorEdge CX Series			

Compatible Measurement Devices (as of June 2016) See www.eizoglobal.com for the latest information.
