

2-Pack 20U Vertical Cable Organizer with Finger Ducts, Vertical Cable Management Panel, 40U Rack-Mount Cable Raceway, 2x 3ft (91 cm) Wire Organizers

Product ID: CMVER40UF

This 6-foot vertical cable manager (2 x 3-foot panels) gives you a simple and space-efficient way to organize the cables in your server rack. You can attach the two-panel cable manager vertically into your rack, to neatly guide cables between equipment that's mounted at different heights.

The 0U cable manager offers versatile installation options and is compatible with most racks that are 40U or larger. The panels feature a 0U design that doesn't take up any mounting space, and with simple tool-less installation, they're easy to attach or reposition as necessary.

The vertical cable manager uses a finger-duct method of cable management, which includes a cover panel that neatly conceals the cables that are running through it.

Having well organized and routed cables not only improves the appearance and accessibility of your rack, it also makes it easier for you to install, access and maintain rack components.

This versatile cable management system consists of two 3-foot panels, so you can configure each panel as needed to accommodate all of your equipment. You can install the individual panels end to end (top to bottom) so that they span the height of your rack, or on either side or the front and back of your rack to manage cables in multiple locations.

The two-piece cable manager runs vertically along the side of your rack, to neatly guide cables between equipment that's mounted at different heights. This provides a tidy and well-organized way to run cables from devices mounted toward the bottom of your rack to other devices mounted near the top, without leaving a mess of cables hanging in between.

For maximum compatibility with virtually any server rack, you can install the cable-management panels using mounting holes that are commonly found on most rack equipment. The tool-less mounting method attaches the cable management panel to the keyhole-shaped mounting holes that are built into your rack.

The horizontal mounting rail method attaches the cable management panel to the horizontal mounting rails that run along the side of your rack.

For racks that don't support these installation methods, you can also mount the cable management panels through other means, such as using the non-standardized holes found on your rack walls and enclosures, or the rack units on equipment mounting rails.

Routing your cables through a panel reduces the tension that's often put on cables. This prevents cable damage or connection loss, and reduces strain on equipment ports, preventing damage to your expensive rack-mounted devices.

Properly routing cables also improves airflow, which passively cools devices stored in your rack, helping to keep your equipment running at optimal temperatures to reduce the probability of damage caused by your rack overheating.

The CMVER40UF is backed by a StarTech.com 2-year warranty and free lifetime technical support.

Certifications, Reports and Compatibility

Applications

- Guide cables from a server that's mounted toward the bottom of your rack to patch panels that are mounted near the top
- Run cables in your rack to the side, in order to improve airflow
- Keep rack-mounted equipment accessible

Features

- **Simplify Rack Cable Routing**: Mounts directly to standard 19-inch server racks to create clean, vertical cable paths in server rooms or network closets; Includes two 3ft (91cm) cable managers covering a full 40U rack height
 - **Reduce Thermal Buildup**: Supports passive cooling by keeping cables organized and out of airflow paths, helping maintain proper rack temperatures and prevent heat-related performance throttling
 - **Simplify maintenance**: Finger-duct design with cover panel keeps cables secure yet accessible, making it easier to install, trace, or update rack components over time
 - **Customize Your Layout**: Mount the two 3ft (91cm) panels end to end for full-height coverage, or position them on the sides, front, or rear of your rack to guide cables exactly where needed
 - **The IT Pro's Choice**: Built to keep racks tidy, organized, and airflow-efficient, our rugged rack accessories are tested for strength and long-term performance; Backed by free lifetime 24/5 multilingual technical support

Hardware

Warranty	2 Years
Frame Type	Steel and Plastic
U Height	40U
Orientation	Vertical
Mounting Options	Front Mount (Front and Rear)

Physical Characteristics

Color	Black
Material	Steel and Plastic
Product Length	5.6 ft [1.7 m]
Product Width	3.9 in [10.0 cm]
Product Height	2.9 in [7.3 cm]
Weight of Product	3.8 lb [1.7 kg]

Packaging Information

Package Quantity	1
Package Length	13.4 in [34.0 cm]
Package Width	8.0 in [20.2 cm]
Package Height	5.8 in [14.8 cm]
Shipping (Package) Weight	3.8 lb [1.7 kg]

What's in the Box

Included in Package	2 - vertical cable organizers
	8 - M5 cage nuts
	8 - M5 cage screws
	4 - M4 nuts
	1 - instruction manual

**Warranty
Information**

Warranty

2 Years
