

HP Latex 365 Printer

Produce a wide range of outdoor and indoor applications with this full-feature 1.63 m printer

Expand your applications – beat client expectations

- Print on traditional signage substrates and beyond – up to 1,63 m – print textiles with the ink collector.¹
- Reach more indoor spaces, like healthcare – water-based HP Latex Ink prints are odorless.¹
- Enjoy efficient, automated double-sided banner printing.
- Produce sharp, consistent, repeatable image quality with high-efficiency curing, 6 colours, and 1200 dpi.

Same day delivery – for highly demanding turnarounds

- High quality at high speeds – 31 m²/hr high-speed outdoor quality with HP OMAS, HP Latex Optimizer.²
- Reach production speeds and avoid wait time – prints come out completely dry and ready to finish and deliver.
- Gain productivity – reduce time between jobs with continuous printing.
- You can minimise damage risk – scratch resistance is comparable to hard-solvent inks on SAV and PVC banner.³

Keep your running costs low – boost your capacity

- Increase production time and reduce time monitoring the printer – automatic, reliable, low-maintenance printing.
- Save time – HP Custom Substrate Profiling and i1 embedded spectrophotometer make ICC profiling automatic.⁴
- Maintain high image quality over the life of the printer with user-replaceable HP Thermal Inkjet printheads.
- Monitor your printer remotely with the free HP Latex Mobile app.⁵

¹ Performance may vary depending on media – for more information, see <http://www.hp.com/go/mediasolutionslocator>. For best results, use textiles that do not stretch. The ink collector is required for porous textiles. Odorless prints: there is a broad set of media with very different odor profiles. Some of the media can affect the odor performance of the final print.

² Banner-quality prints in outdoor (4-pass 4-colour) mode.

³ Estimates by HP Image Permanence Lab on a range of media. Scratch-resistance comparison based on testing HP Latex Inks and representative hard-solvent inks. Outdoor display permanence tested according to SAE J2527 using HP Latex Inks on a range of media, including HP media; in a vertical display orientation in simulated nominal outdoor display conditions for select high and low climates, including exposure to direct sunlight and water; performance may vary as environmental conditions change. Laminated display permanence using HP Clear Gloss Cast Overlaminates. Results may vary based on specific media performance.

⁴ ICC profiling with the spectrophotometer does not support uncoated textiles and backlights.

⁵ HP Latex Mobile is compatible with Android™ 4.1.2 or later and iOS 7 or later, and requires the printer and the smart phone or tablet to be connected to the Internet.
