¹ For the HP Latex 375 Printer using cost-effective, high-capacity HP 871 3 liter Latex Ink Cartridges compared to the HP Latex 365 Printer using HP 831 775 ml Latex Ink Cartridges.
² Performance may vary depending on media – for more information, see http://www.hp.com/go/mediasolutionslocator. For best results, use textiles that do not stretch. The ink collector is required for porous textiles. Odorless prints: there is a broad set of media with very different odor profiles. Some of the media can affect the odor performance of the final print. ³ Banner-quality prints in outdoor (4-pass 4-colour) mode.

^{***} Estimates by HP Image Permanence Lab on a range of media. Scratch-resistance comparison based on testing HP Latex Inks and representative hard-solvent inks. Outdoor display permanence tested according to SAE J2527 using HP Latex Inks on a range of media, including HP media; in a vertical display orientation in simulated nominal outdoor display conditions for select high and low climates, including exposure to direct sunlight and water; performance may vary as environmental conditions change. Laminated display permanence using HP Clear Gloss Cast Overlaminate. Results may vary based on specific media performance.

5 ICC profiling with the spectrophotometer does not support uncoated textiles and backlits.

6 HP Latex Mobile is compatible with Android™ 4.1.2 or later and iOS 7 or later, and requires the printer and the smart phone or tablet to be connected to the Internet.
