

Linea Lux design cordless phone

- 25-min answering machine
- 1.6" display/white backlight
- Handset speakerphone

M3451B/90

The purest line to connect

The sleek Philips Linea Lux cleverly integrates a light ring that glows in various colours to indicate different events. Soft ambient illumination can transform it into an ideal nightlight. Simply choose from 3 colours to enhance any space.

Benefits

Outstanding design in high-quality execution

- Extra weight integrated in the base for greater stability
- Light ring for notifications and ambient/nightlight
- Calibrated keys for precise dialling
- Slender design and compact footprint for space efficiency
- Smart cable management maintains visual appeal from all angles
- Perfectly adjusted magnetic force ensures secure docking

Ultimate calling experience

- Save up to 50 of your favourite contacts in your phonebook

- Handset speakerphone allows you to talk hands-free
- Advanced sound testing and tuning for superb voice quality
- Enjoy 16 hours of talk time on a single charge
- Up to 25-min. message on your answering machine
- High-contrast 4.1-cm (1.6") 2-line reverse display

Eco-conscious product

- Zero power emission when ECO+ mode is activated

PHILIPS

Features

ECO+ mode

Philips phones are energy efficient and designed to be respectful to the environment. When ECO mode is activated the emitted radiation is reduced by up to 60%, and up to 95% when the phone is charging. With ECO+ mode activation the radiation drops to zero.

50-name phone book

Save up to 50 of your favourite contacts in your phonebook

Handset speakerphone

Hands-free mode uses a built-in loudspeaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

Superb sound quality

HQ-Sound refers to high-quality acoustic engineering that results in voice quality so crisp and natural it is almost like being there in person. High-quality components, precise acoustic design, advanced testing and fine tuning reflect decades of experience in high-end audio systems and headphones.

Up to 16 hours talk time

Up to 25-min. message

With up to 25 minutes' recording time on your answering machine, you'll never miss an important message.

Weighted base for stability

Extra weight integrated in the base for greater stability

Light ring

The smart light ring elegantly integrated at the base enhances both the Linea's design and functionality. Different colours glow to alert you to incoming and missed calls, voice messages and alarm. It also provides soft ambient light in

standby mode with a choice of 3 colours, making it an ideal nightlight. You can also easily turn the light off via the fast access key on the handset keypad.

4.1-cm (1.6") reverse display

High-contrast, white-on-black reverse LCD display ensures easy reading and also blends well with the overall sleek design language.

Calibrated keypad

The calibrated and carefully designed keypad ensures precise dialling where you clearly feel every keystroke, whether you are dialling a number or entering a phonebook contact.

Compact footprint

Slender design and compact footprint for space efficiency

Perfect look from every angle

The smart cable management system cleverly hides the wires from sight. Intelligently designed concealed sockets and an internal cable guide ensure everything is clutter-free and neatly tucked away.

Secure docking

Precisely adjusted magnets – with optimised force – are placed on the top of the handset and the base to ensure secure docking of the phone in a stable, upright position. A cleverly designed recess on the base not only serves as an attractive design highlight but also helps to guide the user's hand to make it easy to pick up the handset.
