The Sharp PN-R monitor series have set a new benchmark for mission-critical reliability and flexible extension. These displays have been specially designed for a range of demanding and high brightness 700cd/m2 applications including command and control rooms, 24/7 retail signage, transport signage, way-finding, hospitality, reception areas, lobbies and other corporate and public spaces. With an elegant, slim and discreet cabinet design the latest generation of PN-R Series offers powerful imaging, ease of use, peace-of-mind and convenient stand-alone operation when using the Intel® Mini-OPS capability.

The brand new PN-R 42" (106.5 cm) is designed for demanding high brightness 24/7 display applications and is supported by the flexible Intel® Mini-OPS expansion slot – no need for unsightly cabling when using one of the module options. As an easy-to-use and highly reliable solution with outstanding high-brightness image and sound quality, the PN-R426 sets the ultimate standard for reliable, robust, plug-and-go display signage used anytime and anywhere.

With state-of-the-art high-brightness LED backlight technology, which allows for a new level of slim bezels and shallow cabinet depth, Sharp's 42" PN-R426 display is an attractive and elegant addition to any demanding signage application. With unparalleled reliability, superb durability and straight-forward operation, the monitor can be installed in either portrait or landscape mode, and even suspended from a ceiling for face-up or face-down at any tilted angle.

The in-built Daisy Chain capability via the DisplayPort video connection allows up to 5 units to be connected together for the same mirrored display content. Just another reason why Sharp's LCD monitors can be employed to broaden your business potential.

The new Intel® Mini-OPS expansion slot builds on the well-known OPS industry standard by reducing the mechanical format factor and making the most of the energy saving opportunities of Intel's latest generation of lower power chipsets. A range of upgrade modules, include wireless (PN-ZB03W), HDBaseT (PN-ZB03H) and embedded PC controller (PN-ZB03C) ensures that the PN-R has maximum flexibility and enhanced application range.
