A woman with long, wavy brown hair is shown from the waist up, wearing a light blue, textured knit sweater. She has her arms crossed and is looking down and to the right with a soft expression. The background is a plain, light grey.

**A FULL RANGE.
FOR A FULLER LIFE.**

At Grundig, we believe in making things better. That goes not only for the appliances we manufacture but also the quality of life they provide. Each and every one of our products is engineered to make some part of your daily routine that much easier. As one of the biggest full-range suppliers of home electronics in Europe, we take pride in our ability to help make home life the good life.

FOR A GOOD REASON
GRUNDIG

A SUCCESS STORY OF INNOVATIONS. REWRITTEN EVERY SINGLE DAY.

It all began 70 years ago, with our first breakthrough – the Heinzelmann radio. We knew we were onto something when we saw how it improved people's quality of life. From then on, we have never stopped working to understand you better and take the hard work out of your daily round.

From kitchen to bathroom, from cooking and cleaning to relaxing, you can rely on our products' practical functions, timeless design and superior quality. That's why we go on developing state-of-the-art consumer electronics, small domestic and large household appliances. And never stop researching, thinking and reinventing ourselves. To become the most valuable supplier in your life.

As one of Europe's biggest full-range manufacturers for consumer electronics, we are always looking to make the future a brighter place. For instance, with our smart, connected appliances and other forward-looking innovations such as our Virtual User Experience products that project an interface onto the work surface and respond to gestures.

After all, each new chapter in our technology should translate into a new era of carefree living for you.

OUR PRODUCTS
DON'T FOLLOW
TRENDS.
BUT YOUR NEEDS.

With Grundig, what you need is what you get – products designed to solve problems. That's why we don't just do new for the sake of novelty. Instead, we start by trying to truly understand what matters to you. The result is convenient functionality and easy operation that help you care for your cherished items.

But a product that does the job is only half-way to earning its Grundig badge. It still has to meet our German quality standards for reliability and user-friendliness as well as our benchmarks for innovativeness. Once a product ticks all those boxes, we know it's got what it takes to make your life a little better.

It's what the Grundig FineArts Curved UHD TV with brilliant picture quality does by giving you a cinema experience from the comfort of your own couch, while Divide&Cook gives you more time with the family by letting you prepare two completely different dishes at the same time. It's the same with MultiSense Technology, which always selects the right wash settings so your favourite jeans stay as good as new.

So you see, Grundig products are specially tailored. To daily life.

TURN WORKING TIME INTO QUALITY TIME. BY TURNING ON YOUR SMART DEVICE.

OUTFIT FOR TODAY IS DRY
AND READY TO WEAR.

8 A.M.

9 P.M.

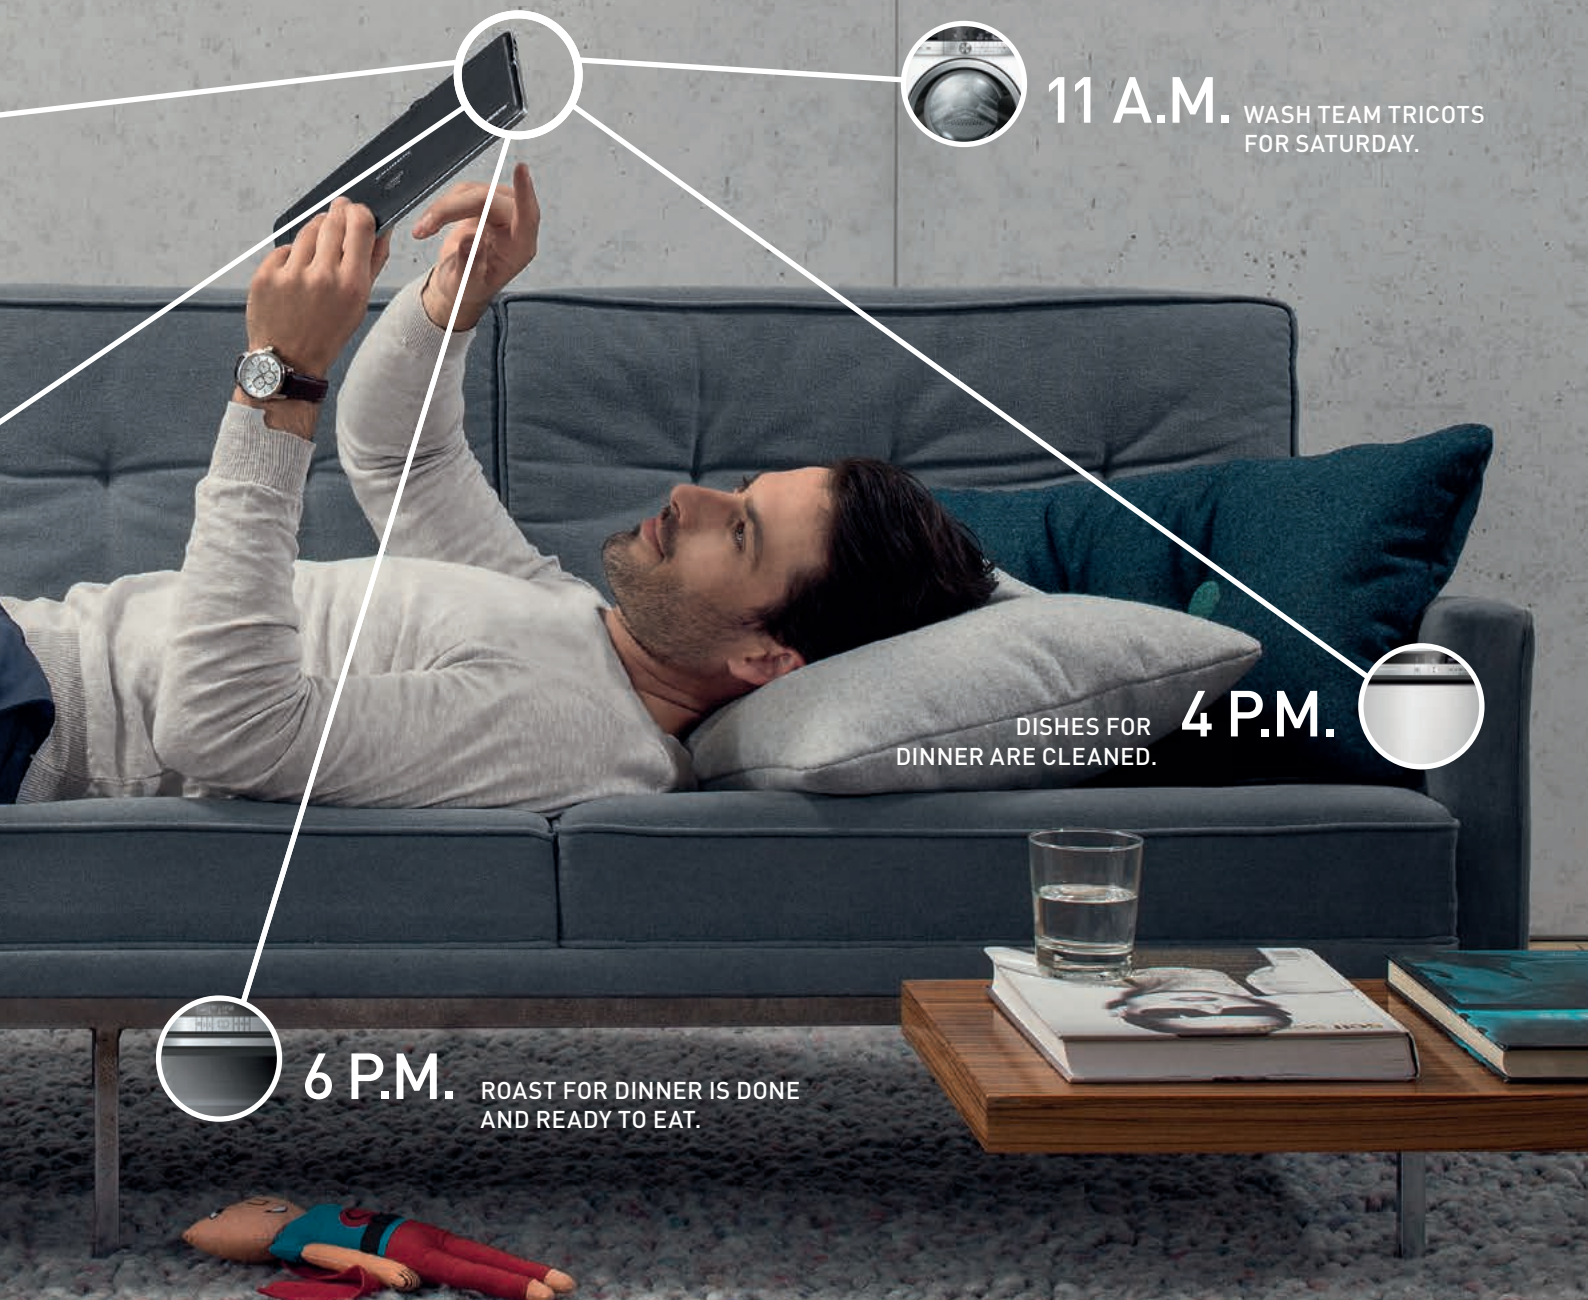

WARNING!
DOOR IS OPEN TOO LONG.

Nowadays, everyone is short of time. So why waste it on housework? Let us help you make the most of precious moments. Grundig HomeWhiz appliances are always ready to clock in. Simply set the Internet-enabled washing machine, dryer, oven, fridge and dishwasher to work using a tablet, smartphone or smart TV. Thanks to our smart app, you get to enjoy that extra hour in bed or movie night with your loved ones. There's no reason to ever leave your comfort zone again – at least not while you're in your Wi-Fi zone.

And the hassle-free features don't end there. Now, your washing machine will automatically select the right programme for your laundry, while the oven will cook two meals at once – even at different temperatures and for different durations. And since our fridges redefine freshness, you can put off grocery shopping for a few more days.

At Grundig, these advances were always a matter of time. Which is why we have spent years developing them, so they can add comfort to your life when it's most needed: today.

**DESIGN IS A VISIBLE
WAY OF THINKING.
WE THOUGHT A LOT.**

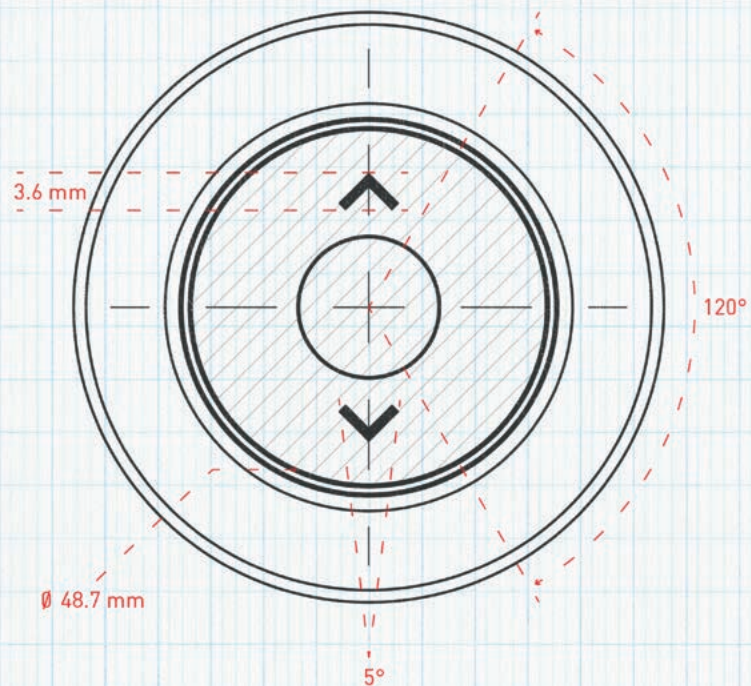

At Grundig we believe in good design. In timeless design that looks great. In design that gives superior quality a suitable shape. But for us, there must be more to design than meets the eye.

As with everything we do, design also has to leave its mark on your everyday life – making things easier, quicker, more efficient or more enjoyable.

We are only satisfied if it lives up to these lofty ideals. Because that's the true power of design – the power to make your home a better place. And, of course, a more beautiful one, too.

QUALITY — MADE BY — GRUNDIG

At Grundig, we manufacture a wide range of innovative appliances. Despite their many differences, our products all have one thing in common – outstanding quality.

Quality is no accident. It's the result of rigorous testing at every link in the value chain, from conception through production and beyond. Circuit boards or screws – every component and part must prove its mettle. In fact, we're so confident that once we're done with it a Grundig appliance will pass the ultimate test – everyday use in your home – that we give you more than just a promise. We give you a 10-year warranty, for instance, for selected Inverter EcoMotors.

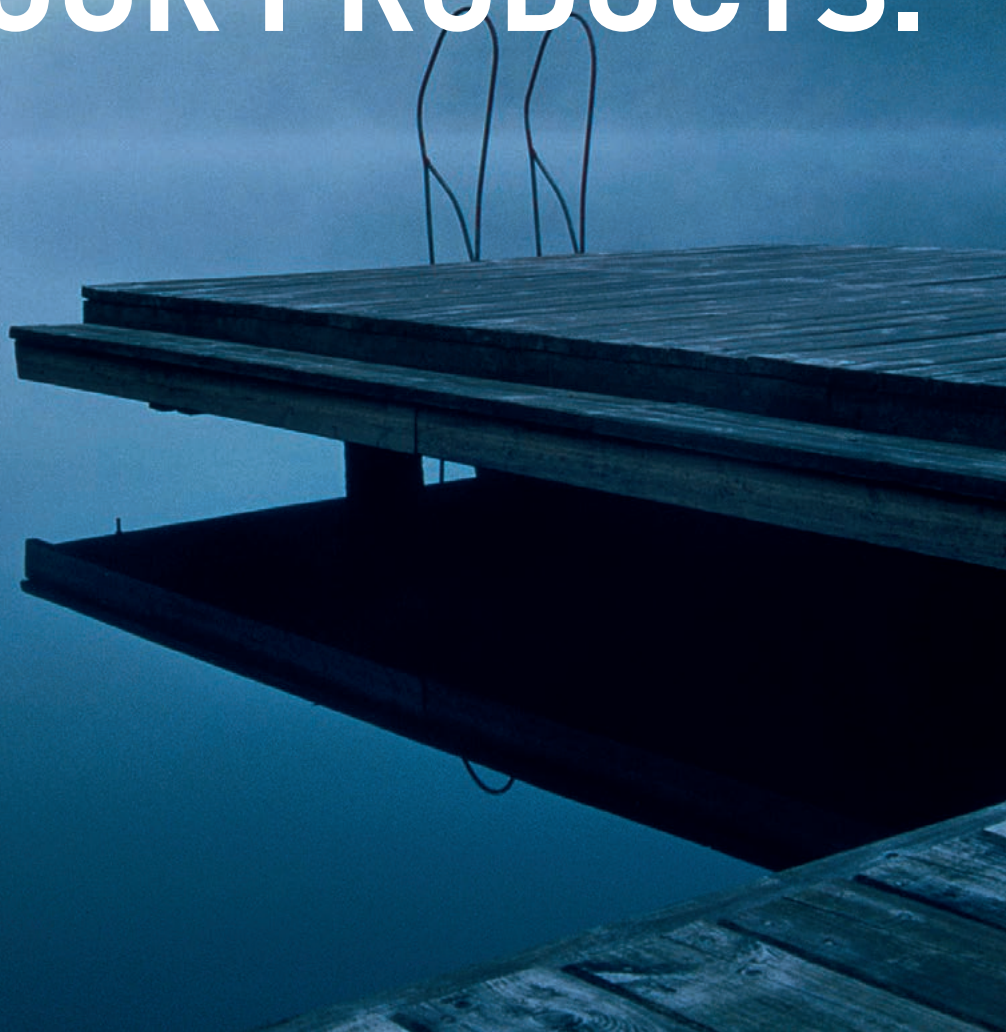

Grundig quality is a feast for every one of your senses. Listen closely and you'll understand why we were the first supplier to receive certification for our products' exceptional sound quality in 2015. That's because our home appliances are not just quiet. Every click of a button or door and every hum of a wash or spin cycle is tuned to be music to your ears. So it comes as no surprise that SLG Prüf- und Zertifizierungs GmbH, a testing and accreditation organisation, has awarded us its top grade of A. We feel very honoured by that. And we're sure your ears will, too.

Example refrigerator

**SUSTAINABILITY IS
IN OUR NATURE.
AND IN OUR PRODUCTS.**

At Grundig, we care – for nature and for you. That means we see it as our responsibility to develop sustainable appliances that don't skimp on your creature comforts. We pull off this balancing act by designing products that look after the things in your life and adhere to the highest standards of hygiene, while reducing energy and water consumption to a minimum.

A prime example is our new sustainability hero – the EcoChamp 5.5 L dishwasher. Thanks to its innovative technology, it not only saves up to 2,600 litres of water every year compared to conventional 15-litre dishwashers but has also received an A++ energy rating.

What's more, we believe that our appliances should score just as highly when it comes to your health. Which is why we have invented IonFresh. This technology cleans the air with all-natural ions that eliminate bacteria and odours inside the fridge. Our dishwashers are also models of hygiene that heat up to extreme temperatures to kill bacteria. And we have applied the same thinking to laundry – with an HygieneCare programme approved by Allergy UK that removes 99.9% of irritants.

So you see there's a lot more in our nature than just efficiency. And there's a lot more to come.

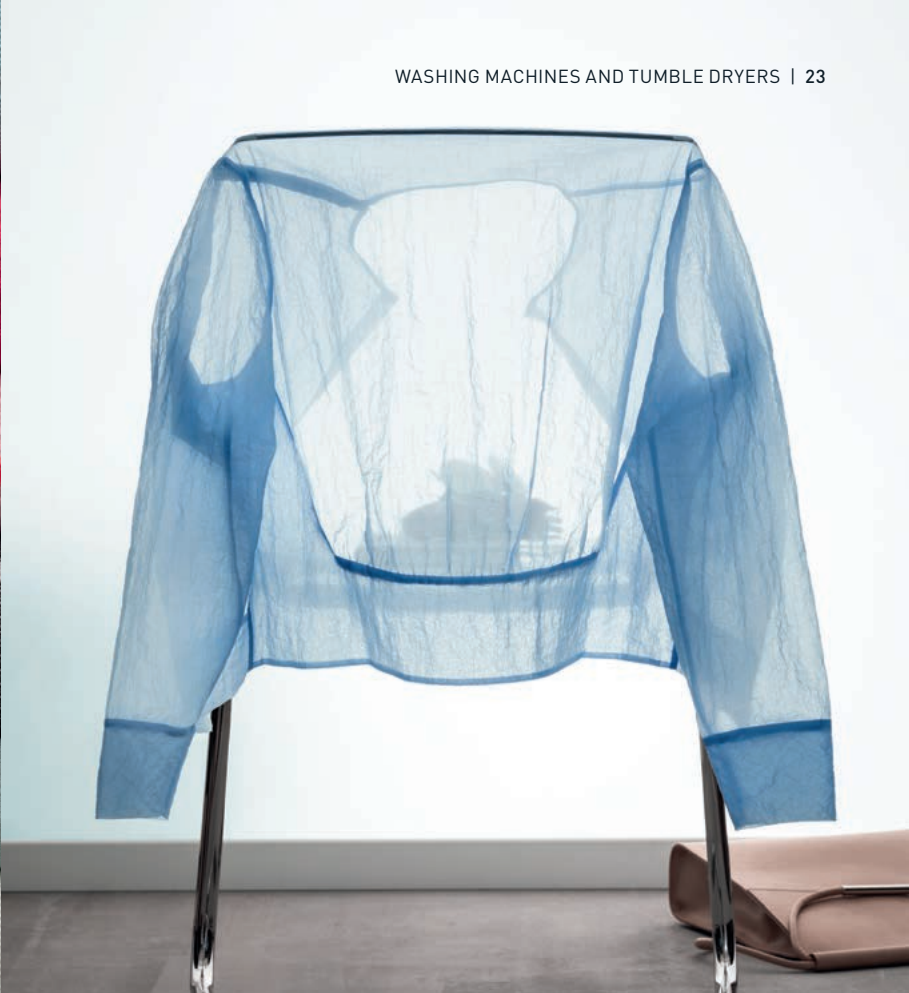

THE NEW HOME APPLIANCES 2015/2016

Over the previous pages, we have given you an idea of what defines and sets the special Grundig spirit apart. Now, we would like to show you how our work ethic and philosophy come to life in our products, their features and our latest innovations. Welcome to the world of Grundig.

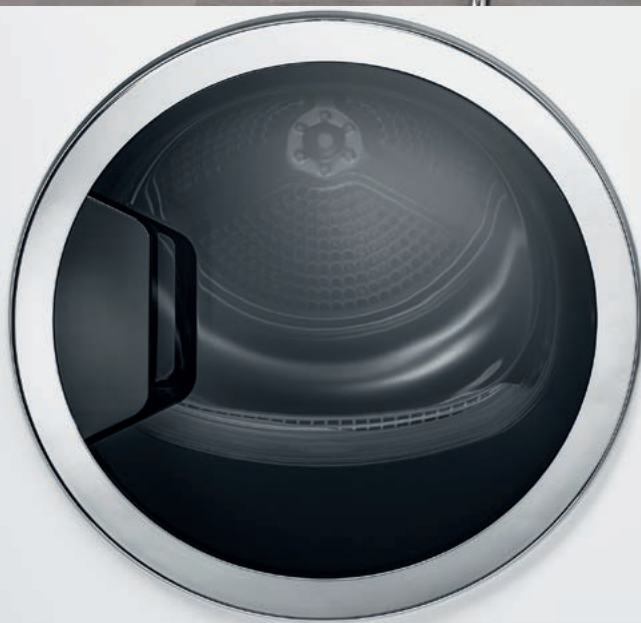

**FASHION IS NEVER
TIMELESS. UNLESS
IT'S TREATED WELL.**

GRUNDIG WASHING MACHINES AND TUMBLE DRYERS.

With their innovative technologies and functions, Grundig washing machines and dryers are putting a whole new spin on housework. That's because our appliances not only reduce your workload, they also preserve your favourite garments.

MultiSense Technology is just one outstanding example. Simply put your laundry in the machine and press the start button. Washing has never been so comfortable – for you and your laundry.

MULTI SENSE TECHNOLOGY

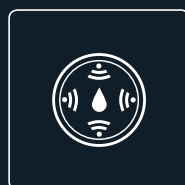

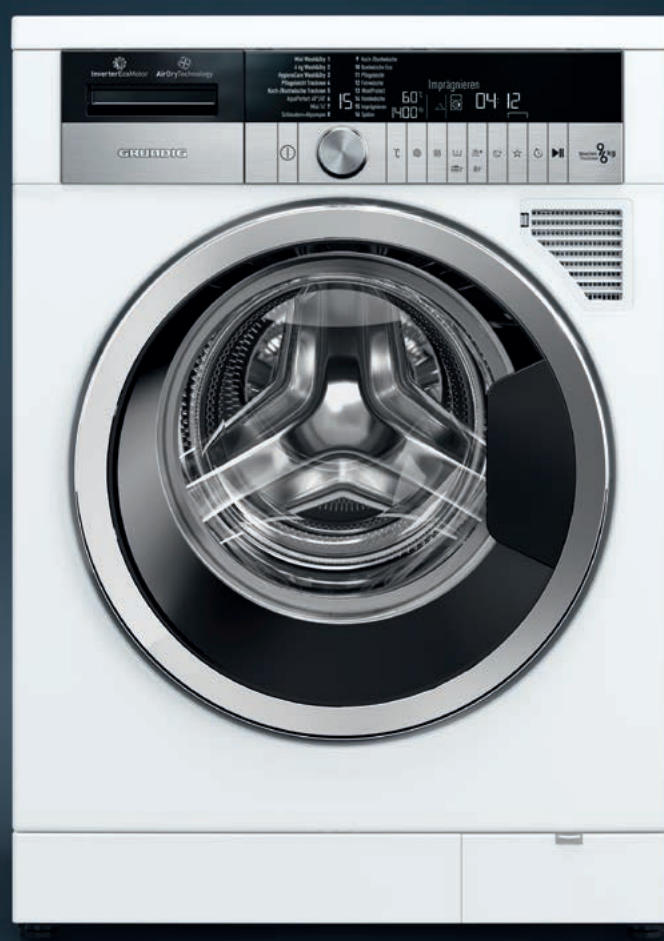

REWRITES THE RULES OF WASHING. BY READING THE FABRICS.

GWN 59464 C

The Grundig GWN 59464 C washing machine with MultiSense Technology automatically selects the perfect programme for your laundry – without you lifting a finger.

MULTI SENSE TECHNOLOGY

HAS A DISTINCT FASHION SENSE. JUST LIKE YOU.

With its flair for fabric care, the Grundig MultiSense washing machine takes the guesswork out of laundry. Special sensors recognise types of textiles and the size of the load and automatically select the best programme for your clothes. In other words, MultiSense Technology initiates the optimum cycle length, motor speed, number of rinses and more. All of which is good for your clothes and your peace of mind. That leaves only one thing for you to worry about – what you're going to wear.

TURBIDITY SENSOR

Determines how soiled your clothes are.

WATER LEVEL SENSOR

Recognises the type of laundry by establishing textiles' water absorption characteristics.

WEIGHT SENSOR

Weighs the laundry and recommends the ideal amount of detergent.

WATER FLOW SENSOR

Determines how much water will be needed for the wash cycle.

STEAM GENERATOR

Reduces wrinkling and removes undesirable odours from fabrics.

RINSE SENSOR

Measures water purity to ensure that no detergent residue remains in the laundry.

PRO DOSE TECHNOLOGY

DOSE THE EXACT AMOUNT OF DETERGENT. EVEN WITHOUT DOSING.

Thanks to MultiSense Technology's special sensors, ProDose Technology automatically determines the amount of laundry, the type of fabrics and the degree of soiling. Based on this information, the automatic dosing system precisely calculates the exact amount of liquid detergent and fabric softener needed for each cycle. All you have to do is fill up the detergent once and perfect washing results for the next 20 washing cycles are guaranteed. In short, the GWN 59464 C is economical not only with detergent and water, but also with your time.

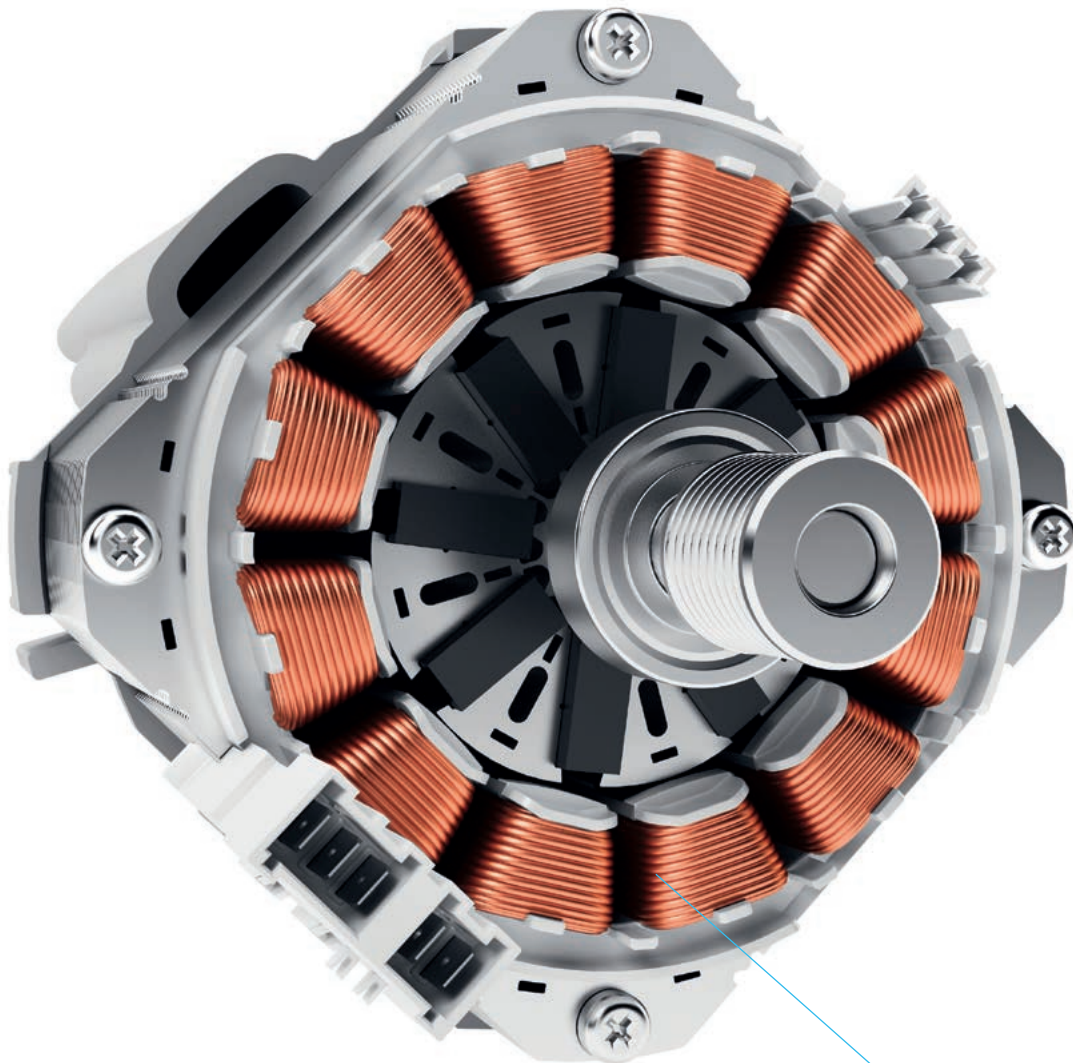

The special MultiSense sensors determine the amount of laundry, fabric types and the degree of soiling. ProDose Technology uses this information to calculate the ideal amount of liquid detergent and fabric softener needed.

INVERTER ECO MOTOR

**ENERGY CONSUMPTION SO LOW,
IT NEEDS A NEW ENERGY EFFICIENCY RATING.**

The Inverter EcoMotor reduces power consumption to an absolute minimum – beating the best energy efficiency rating of A+++ by as much as a further 70%. This achievement is the result of a brushless design and variable-speed technology that works without friction. Not only does this innovative motor save energy, it also reduces noise levels to 45 dB for the main wash cycle. So it comes as no surprise that it's our engineers' pride and joy.

The Inverter EcoMotor beats the best energy efficiency rating of A+++ by as much as a further 70%.

Its brushless design allows variable speed and works without friction.

THE FEATURES AT A GLANCE.

CARE

GENTLE CARE

This ultra gentle wash programme and spin algorithm prolong the life of your most valuable and delicate clothes, preventing discolouration and fabric damage.

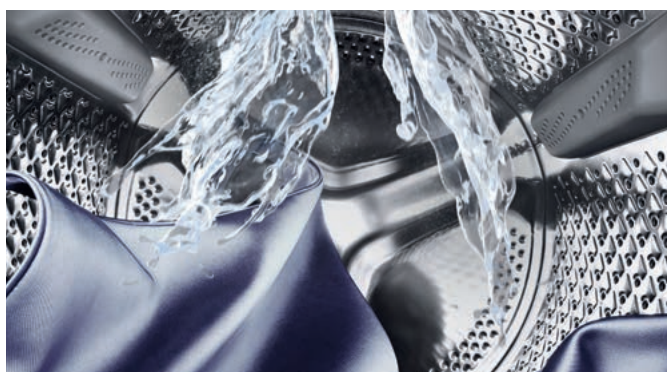

WOOL PROTECT

Thanks to its low-speed spin cycle and special algorithm, the programme prevents friction between the fibres of machine-washable woollens, protecting them from damage.

STAIN CARE

Easy handling of stains with a selection of stain removing programmes. The programme treats 24 different types of stain – coffee, tea, fruit juice, collar stain, salad dressing, mayonnaise, ketchup, make-up, blood, sweat, red wine, pudding, mud, meal, chocolate, grass, egg, baby food, machine oil, Coke, butter, jam, curry, coal.

INTENSE WET

Washing performance is increased while water consumption is decreased. A spray pump system that forces a detergent solution through dual nozzles onto the clothes effectively saves water. This sustainable technology ensures deep penetration of stains.

WATER PROTECT+

A double-walled hose protects your home from damage. Water-absorbing material between the inner and outer hose instantly detects if the inner hose is broken and cuts off the water intake from the tap. What's more, a water leakage sensor is attached at the bottom of the washing machine and stops the programme automatically if a leak occurs, preventing flooding and other problems.

OPTIMUM GLASS DESIGN

A sleek glass design improves your washing performance by enhancing interaction between laundry and drum.

COMFORT

AQUA PERFECT 40° / 40'

Spend more time with the people you love and still get perfectly clean clothes washed at 40°C in just 40 minutes.

ANTI-NOISE

With its soundproofed S-shaped side walls, cabinet insulation, brushless motor technology, electronic unbalanced load control algorithm and new-generation shock absorbers, this machine reduces vibration and noise throughout the spin cycle.

SILENT MODE

Omits spin cycles and cancels the main programme's final spin – which can be set manually the next morning. The result is a silent, sleep-friendly environment after bedtime.

TEXT LC DISPLAY WITH TOUCH CONTROL BUTTONS

The electronic Text LC Display with Touch Control Buttons brings ergonomic benefits and ease of use to your home. It automatically recommends settings that ensure maximum water and energy efficiency, displays the temperature, soil level and load size, and even features a memory function that saves "favourite" wash programmes.

STEAM REFRESH

Removes undesired odours with steam. The steam also reduces wrinkles, making ironing easier.

HYGIENE

MACHINE CARE

A special programme for self-cleaning of the tub and drum ensures maximum hygiene. This prolongs the life of the washing machine.

HYGIENE CARE

Ensures 99.9% hygiene thanks to an Allergy Shield approved by Allergy UK. Its three-in-one action works by maintaining a constant temperature, applying additional drum movements and running a super rinse cycle.

UMBRELLA TECHNOLOGY

AN INVISIBLE SHIELD. FOR VISIBLY GREAT STYLE.

The liquid contains environmentally friendly ingredients that make your fabrics water- and stain-repellent.

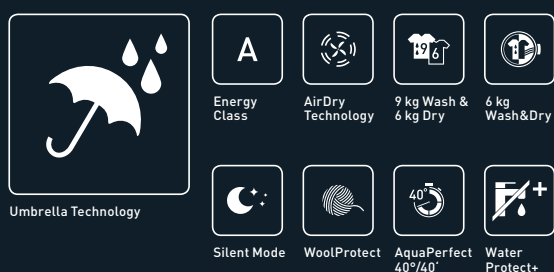

GWD 59405

The Grundig GWD 59405 washer dryer with Umbrella Technology washes, dries and even impregnates your favourite clothes. So you are well-protected from rain and stains.

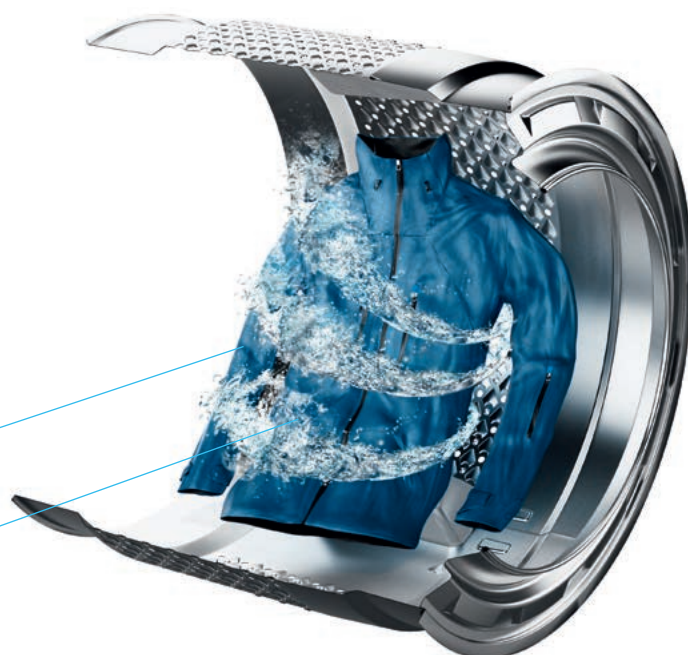

The Grundig washer dryer does more than its name implies. It also repairs rain gear and impregnates clothes to make them water-repellent – in just one hour. The fantastic benefits of this special programme are just three easy steps away: First, put a special impregnation liquid in the washer dryer's detergent compartment, then select the programme and press start. The machine is able to impregnate up to 15 T-shirts or ten pairs of trousers at once – equal to about 2.5 kg of laundry.

Since this functional treatment is gentle on your clothes, it won't affect the fabric's colour or breathability. So not only your style will be visibly great – but also your mood when being outside.

Various fabrics can be impregnated – for instance, cotton, synthetics and mixed fabrics.

The special impregnating programme ensures your clothes shrug off all water and stains.

AIR DRY TECHNOLOGY

SAVES NOT ONLY A HUGE AMOUNT OF WORK, BUT ALSO ENERGY.

You might think the fuss over drying clothes in a machine is a lot of hot air – until you see your water bills. Most conventional machines actually condense water to perform this process. But the Grundig washer dryer uses only air. That means while your laundry is dried gently and effectively, the water and energy requirement is significantly reduced. As a result, the VDE laboratory in Germany has awarded us an energy efficiency rating of A.

6 KG WASH & DRY

WASHES AND DRIES. ALL YOU HAVE TO DO IS TURN IT ON.

There's something about most washer dryers that does not add up – they can't dry as many clothes as they wash. At Grundig, we think it figures that you should be able to wash and dry up to 6 kg of laundry in one go. The programme automatically adjusts the settings to achieve perfect washing and drying results. For you, that means turn it on – and the job's done.

Gently washes a maximum load of 6 kg.

Then, it perfectly dries the same quantity of laundry in one go.

THE FEATURES AT A GLANCE.

GTN 38269 GC

The Grundig GTN 38269 GC dryer with ExpertClean™ Technology filters out your effort: The filter cleans itself so you don't need to.

EXPERT CLEAN™ TECHNOLOGY

SAY GOODBYE TO EMPTYING YOUR DRYER'S DOOR FILTER.

With our new effortless filter system for tumble dryers we found a way so you no longer have to – the new Grundig GTN 38269 GC dryer. It features an innovative three-layered condenser filter that cleans itself. The special system uses an innovative circuit that carries condensed water to rinse lint from the filter. The water is pumped up from the filter at the lowest point and back to the tank. There, it's purified so it can flow down again and be pressurised in the three nozzles, which spray it on the filter layers to clean them. To ensure the filter stays spotless, this cycle is constantly repeated during the drying process. Obviously, there's nothing left for you to think about: The filter takes care of itself. Giving you more time to take care of your loved ones.

Lint from the drum collects in the condenser filter and is then pumped up to the tank with the condensed water.

The special valve and pump system creates a circuit in which purified condensed water flows down to clean the filter layers at the lowest point.

A three-nozzle cleaning system pressurises the purified condensed water before spraying it onto the filter's layers to free them of lint.

PRO SCENT

WELL-SCENTED LAUNDRY: PERFECTLY HOME AND DRY.

Everyone loves the fragrance of freshly washed laundry but putting clothes in a tumble dryer usually means you lose out. That's why we invented a dryer with ProScent: It pleasantly freshens up your laundry with natural odours. The secret is a small capsule. Positioned directly inside the tumble dryer's air flow, it continuously permeates the garments with a natural fragrance of your choice – Fresh, Floral or Ocean. The capsule is easy to insert, so you can change it as often as you like. Just follow your nose to the scent that best fits your mood – and breathe in happiness.

From its position in the air flow, the capsule continuously permeates garments with fragrance.

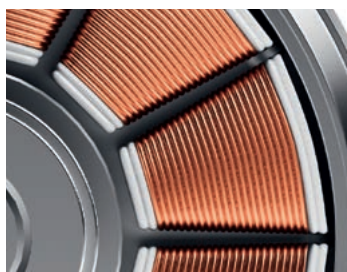

The capsule in the dryer's air flow can easily be exchanged.

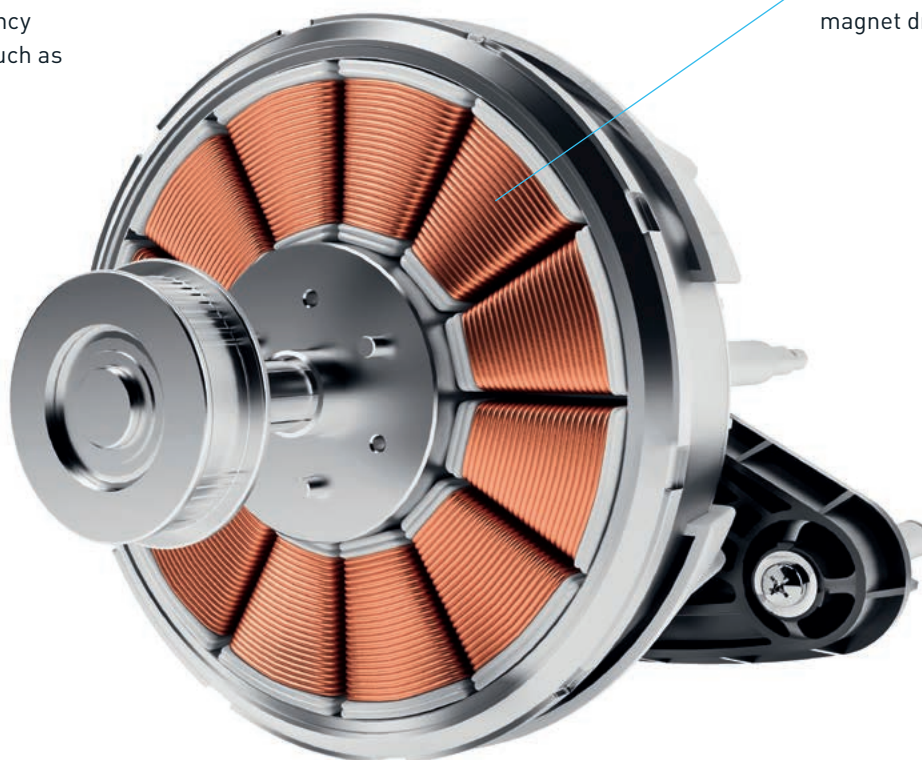

ECO CHAMP

THE ONLY THING MORE ECONOMICAL IS A CLOTHESLINE.

Exceptionally thrifty tumble dryers have an energy rating of A+++. The GTN 48271 GC goes one better, using a further 10% less energy than such appliances. Quite the energy coup. How did we do it? Unlike conventional motors that rotate with the help of brushes to generate power, the Inverter EcoMotor features magnet drive technology. This reduces friction and lowers energy consumption. What's more, the controls on the variable-speed motor ensure that clothes are dried as gently as if they were on a clothesline. Only this is a whole lot more convenient and efficient.

The Inverter EcoMotor beats the best energy efficiency rating of A+++ by as much as a further 10%.

The Inverter Eco Motor with magnet drive technology.

ADVANCED HEAT PUMP TECHNOLOGY

URNS THE DRUM INTO AN OASIS OF WELL-BEING.

At last you can dry laundry quickly and gently. Our innovative Touch Dry Technology combined with relatively low temperatures of 60°C make it possible. And the good news doesn't end there. Since garments lie flat on the drum during drying, they don't become crumpled. With the benefit of such good care, your clothes retain their beautiful appearance for longer. Laundry has never felt this good.

Thanks to low temperatures of 60°C and improved drum movement, laundry is dried quickly and gently.

THE FEATURES AT A GLANCE.

CARE

WOOL PROTECT

The special programme algorithm provides safe drying for machine-washable woollens by preventing friction between the fibres.

CARE

TOUCH DRY

Senses your laundry's fabric and automatically sets the correct dryer programme timing. Can be applied to different types of fabric – for instance, cotton, synthetics or mixed fabrics.

COMFORT

STEAM REFRESH

Get fresh, wrinkle-free fabrics without having to wash or iron them. An intense spray of steam inside the dryer eliminates persistent odours and reduces creases in clothes.

EXPRESS DRY

ExpressDry mode completes its standard programme faster than other 8 kg heat pump dryers. While an 8 kg load can be dried in 115 minutes – 24% quicker than a standard programme with A+ energy efficiency – the machine can optionally be switched over to standard mode with A+++ energy efficiency and 152 minutes drying time.

COMFORT

ADVANCED HEAT PUMP 54 CM

With a depth of 54 cm, the space-saving dryer line is 10% more compact than a conventional dryer. The world's slimmest, most efficient dryer* has a 7 kg capacity and is available with A++, A+ or B efficiency class rating.

*(08/2015)

SILENT MODE

The inverter compressor, brushless motor technology and cabinet insulation bring peace to your home with the specially developed Silent Mode.

TIMESAVER PROGRAMME

Combine the 30 minute quick-drying programme with the 14 minute MiniWash and clothes are ready to wear in under an hour.

HIGH CONDENSATION EFFICIENCY

Due to a condensation rate of more than 91%, this effective drying system releases less moisture into the room. That means perfect results with minimum energy consumption.

ACCESSORIES

STACKING KIT

To optimise space, simply use the stacking kit to easily stack dryers on top of washing machines.

**THE FRESHER
THE IDEAS, THE
LONGER-LASTING
THE FRESHNESS.**

GRUNDIG REFRIGERATORS AND FREEZERS.

Grundig refrigerators and freezers not only store fruit, vegetables and other food under perfect conditions, they also preserve the great taste, nutrients and vitamins they contain. Thanks to an array of innovative functions, the appliances ensure the best possible protection for food's cell structures and ingredients. The result? Longer-lasting freshness to help you live a healthy life, while enjoying your favourite foods.

FULL FRESH+

YOU WANT FRESHNESS
TO STAY? GIVE IT A
COMFORTABLE HOME.

GSBS 13320 FX

The Grundig FullFresh+ GSBS 13320 FX refrigerator creates the perfect conditions to keep food, above all fruit and vegetables, fresh for up to three times longer.

FullFresh+

Duo-Cooling
No Frost

SuperFresh

Energy
Class

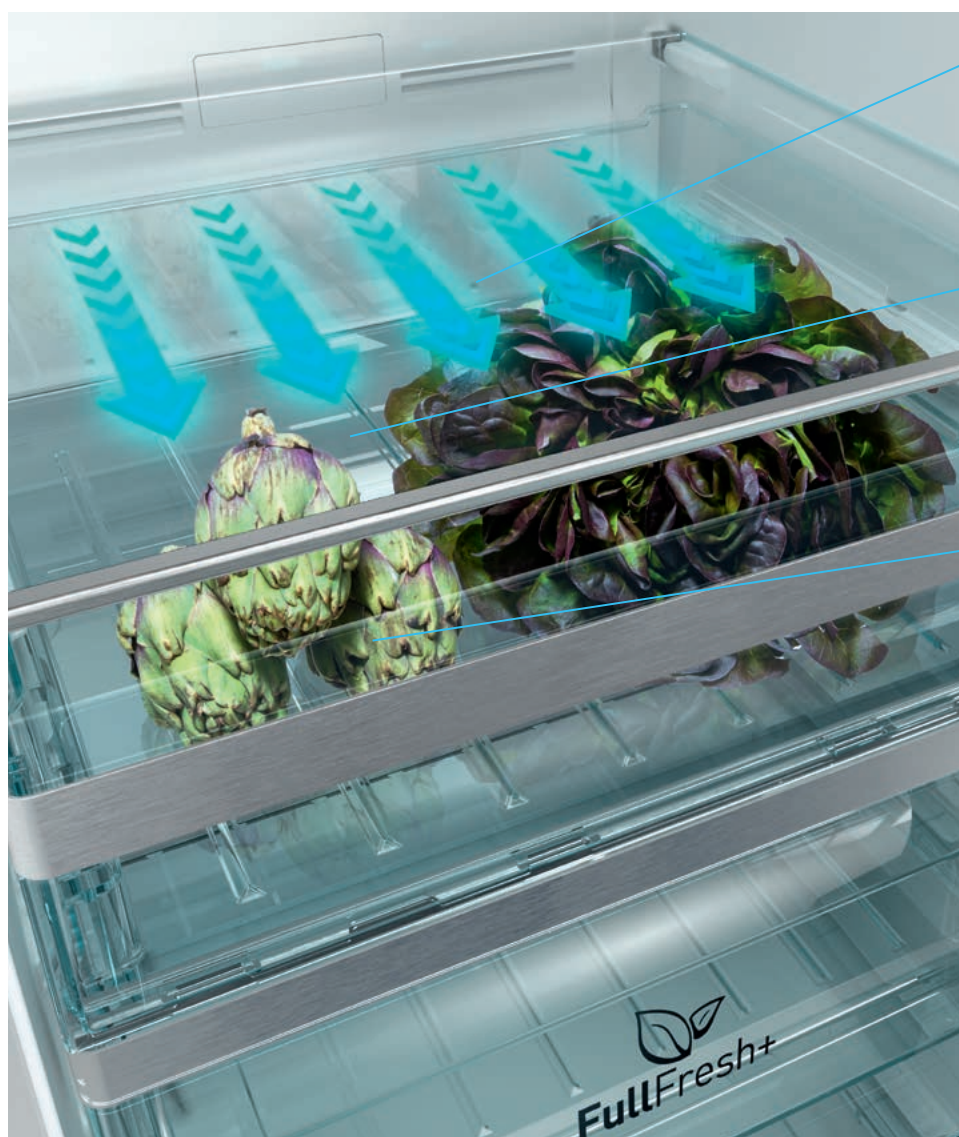

EcoChamp

FULL FRESH +

OUR FAVOURITE FRUIT? THOSE THAT STAY FRESH.

A Grundig FullFresh+ Side by Side refrigerator is the new place to be for your healthy favourites: A constant temperature and high humidity level in the crisper drawer are preserved by cool air coming out of small ventilation holes. To simultaneously minimise condensation and improve airflow, the specially designed drawer top features small apertures. These ensure ideal conditions inside the compartment for fruit and vegetables. As your produce won't dry out, it stays naturally delicious and farm-fresh for up to three times longer. In short, you'll have less waste, less shopping and always a good feeling. Because you can be sure your favourite fruit and vegetables are in a safe place – patiently waiting for you to enjoy them.

Small ventilation holes in the back of the fridge ensure the air in the crisper drawer stays cool, fresh and high in humidity.

Small apertures in the top of the drawer optimise air circulation and minimise condensation to prevent fruit and vegetables from rotting.

Fruit and vegetables will stay fresh for up to 30 days. Lettuce remains crisp even three times longer than in other refrigerators.

VITAMIN CARE ZONE

PROTECTS WHAT PROTECTS YOU: VITAMINS.

Storing fresh produce in the special VitaminCare Zone inside the Grundig Side by Side refrigerators is a bit like returning it to the field. That's because built-in blue light technology simulates natural lighting conditions so that the amount of vitamin C in red vegetables and fruit is especially preserved. Furthermore, the overall vitamin level in your healthy food is boosted, helping to keep it fresh and the goodness locked in. Think of the VitaminCare Zone as a time machine that simply retains your food's natural off-the-stalk freshness and appearance. You'll see the benefits in the reduction in waste and shopping trips – not to mention the savings.

Blue light technology
boosts vitamin levels in
your fruit and veg.

ECO CHAMP

WE PUT ALL OF OUR ENERGY INTO THIS FRIDGE, SO YOU CAN SAVE YOURS – THANKS TO OUR DUO-COOLING NO FROST TECHNOLOGY.

The new variable-speed Inverter EcoCompressor inside the Grundig Side by Side models helps to lower energy consumption by up to 25%* while also keeping noise levels down. Even so, it's quite the cold storage powerhouse. High compressor speeds make for quick freezing and improved temperature stability ensures that food keeps fresh for longer. When paired with our Duo-Cooling No Frost Technology, increased humidity levels in the fridge prevent food from drying out and prolong its life. What's more, the frost-free function reliably stops that icy crust from forming, so you don't have to defrost any more. Apart from saving you a lot of work, this fridge also saves on energy costs. Rated A+++, it's so efficient, it virtually puts your electricity consumption on ice.

A dual fan system ensures the fridge and freezer compartments are optimally cooled. This keeps food fresh for longer while reducing energy consumption.

*Compared to Side by Side models with conventional compressors

EUROPEAN SIDE BY SIDE ECO CHAMP

MAXIMUM SPACE, MAXIMUM EFFICIENCY: A COMBINED FRIDGE-FREEZER DESIGNED AS A EUROPEAN SIDE BY SIDE WITH AN A+++ EFFICIENCY RATING.

The most convenient options on the market sadly do not fit through every front door – at least where fridges are concerned. With this in mind, we have developed a practical alternative: a European Side by Side that consists of two separate appliances. Each module is 60 cm wide, so they can be transported individually before being connected in your kitchen using a screw system. Measuring 120 cm across, our European Side by Side is even 30 cm wider than a standard model, yet it remains easy to handle. For you this means extra space for fresh produce – and extra-low power consumption thanks to the A+++ efficiency rating of both the fridge and the freezer. This makes our European Side by Side a real Grundig EcoChamp.

The two appliances are connected using a simple screw system.

The EcoChamp is 120 cm across, making it a good 30 cm wider than a standard Side by Side.

A capacity of 647 litres guarantees extra room for fresh produce.

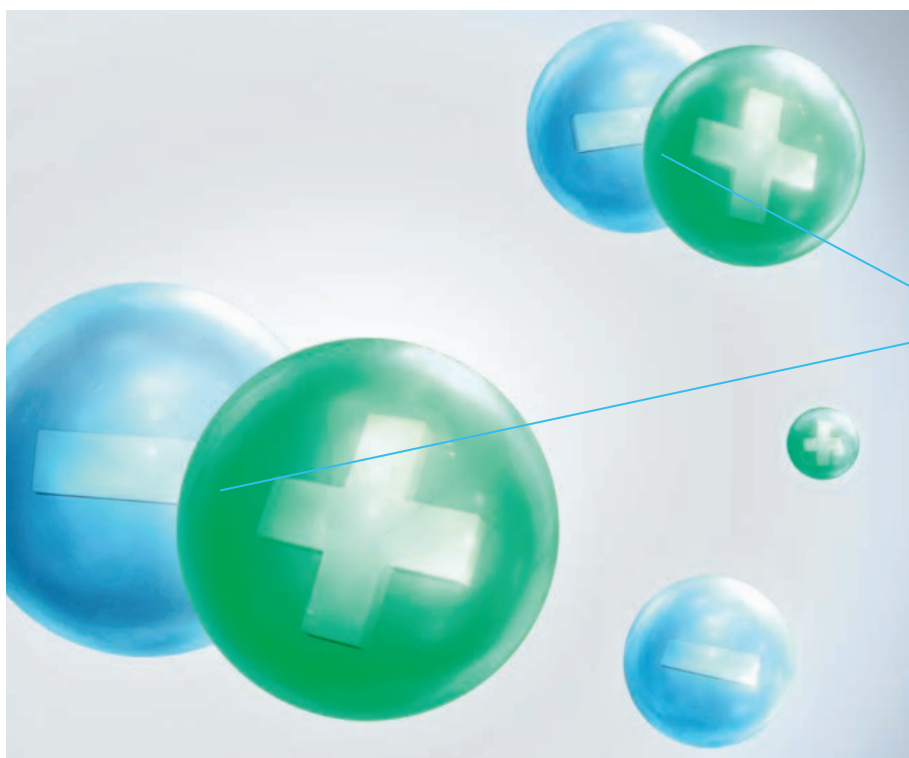

ION FRESH TECHNOLOGY

FRESHLY HARVESTED FROM OUR DEVELOPMENT DEPARTMENT.

To prevent unpleasant odours and bacteria, Grundig relies on tiny helpers called ions. IonFresh Technology produces these naturally occurring particles, which can be found in high concentrations near waterfalls or in forests. Often referred to as the “vitamins of the air”, they destroy bacteria and odour molecules before being expelled when the refrigerator defrosts. As a result, you can breathe easy whenever you open the fridge, knowing the air is clean and your food will stay fresh for longer.

Negative ions are capturing positive ones. This method manages to reliably clean the air in the fridge from odours and bacteria – without the use of harmful gases or chemicals.

THE FEATURES AT A GLANCE.

CARE

SUPER FRESH

By maintaining the temperature just above freezing point, humidity is kept at an optimum level. Meat, fish and dairy products will retain their full flavour, fresh appearance and nutritional benefits for a longer period of time.

CARE

DUO-COOLING NO FROST TECHNOLOGY

The multi-directional air flow system prevents icing and ensures automatic defrosting.

COMFORT

ANTI-NOISE

Specially designed sound-insulating components together with flow-noise regulators help keep the fridge whisper quiet even as it cools down.

HOLIDAY MODE

When you go on holiday, you can put the fresh food compartment on standby to reduce energy consumption. The temperature will be kept at 15°C or lower while the freezer keeps running.

LED ILLUMINATION

White LED lights provide more attractive fridge lighting that is also cleaner and more efficient.

HYGIENE

HYGIENE GLASS TANK

Placed under the door rack, this special tank made entirely of glass keeps water and ice as pure and naturally fresh as possible. With its capacity of 2.8 litres, there's enough refreshment for the whole family.

ANTIBACTERIAL SEAL

In order to guarantee maximum hygiene inside the refrigerator, the door gaskets are coated with an antibacterial seal that eliminates bacteria.

**ANTI-ODOUR FILTER**

A special photocatalytic carbon filter eliminates bacteria and maintains consistently high hygiene by preventing bacteria build-up and fridge odours.

**SERVING
PERFECTLY CLEAN
DISHES FOR DINNER.**

GRUNDIG DISHWASHERS.

At Grundig, we expect more from dishwashers than just clean dishes – such as thrifty water and energy consumption. Plus, of course, they need to make sure that kitchenware is perfectly protected, ensuring your glasses, cutlery and plates remain in their original, pristine condition. Our dishwashers do all this and more – so you can make every dinner a perfect occasion.

ECO CHAMP 5.5 L

TREATS DISHES AND NATURE EQUALLY: WITH CARE.

GNF 41822 X

The Grundig GNF 41822 X EcoChamp 5.5 L dishwasher keeps your dishes and the environment clean by saving up to 2,600* litres of water every year.

*Compared to conventional 15-litre dishwashers

EcoChamp 5.5 L

Protect+

ECO CHAMP 5.5 L

THE RESULT IS CRYSTAL-CLEAR: A CLEAN ENVIRONMENT.

When it comes to saving resources, our EcoChamp 5.5 litre dishwasher truly is a champion. The brush-less motor creates variable water pressure and flow rate, so it's able to produce perfect results paired with incredibly economical water usage. Thanks to this innovation, a single wash cycle requires no more than 5.5 litres of water, reducing consumption by 2,600* litres every year. And that's not all you save. The A++ rating means the appliance is also highly energy-efficient. So your conscience stays as clean as your dishes.

By generating different water pressures, the variable-speed Inverter EcoMotor is able to not only save water and energy but also operate more quietly.

*Compared to conventional 15-litre dishwashers

ECO CHAMP ENERGY

A LITTLE ENERGY, A LOT OF PERFORMANCE.

Grundig dishwashers guarantee clean results with unparalleled low consumption – as reflected in your electricity bill. Its unrivalled low energy consumption is the result of four innovative features: The variable-speed Inverter EcoMotor produces a range of different water pressures, reducing not only wash-cycle noise but also water usage and energy consumption by a further 10% over and above an A+++ rating. On top of that, a unique aluminium coating provides insulation so that thermal loss is reduced and less energy is needed to heat the water. After the washing process, Eco Fan Drying effectively removes moisture from the circulating air. As a result, dishes are dried more quickly and thoroughly. Last but not least, the Door-matic function automatically opens the door at the end of the cycle to save electricity. Once you've tried the EcoChamp, other machines simply won't wash.

By reducing the humidity of the circulating air, Eco Fan Drying dries dishes faster and more thoroughly.

By generating different water pressures, the variable-speed Inverter EcoMotor is not only able to save water and energy but also operate more quietly.

The Alu-Shield insulation material reduces heat loss.

Doormatic automatically opens the door at the end of the cycle to facilitate the drying process.

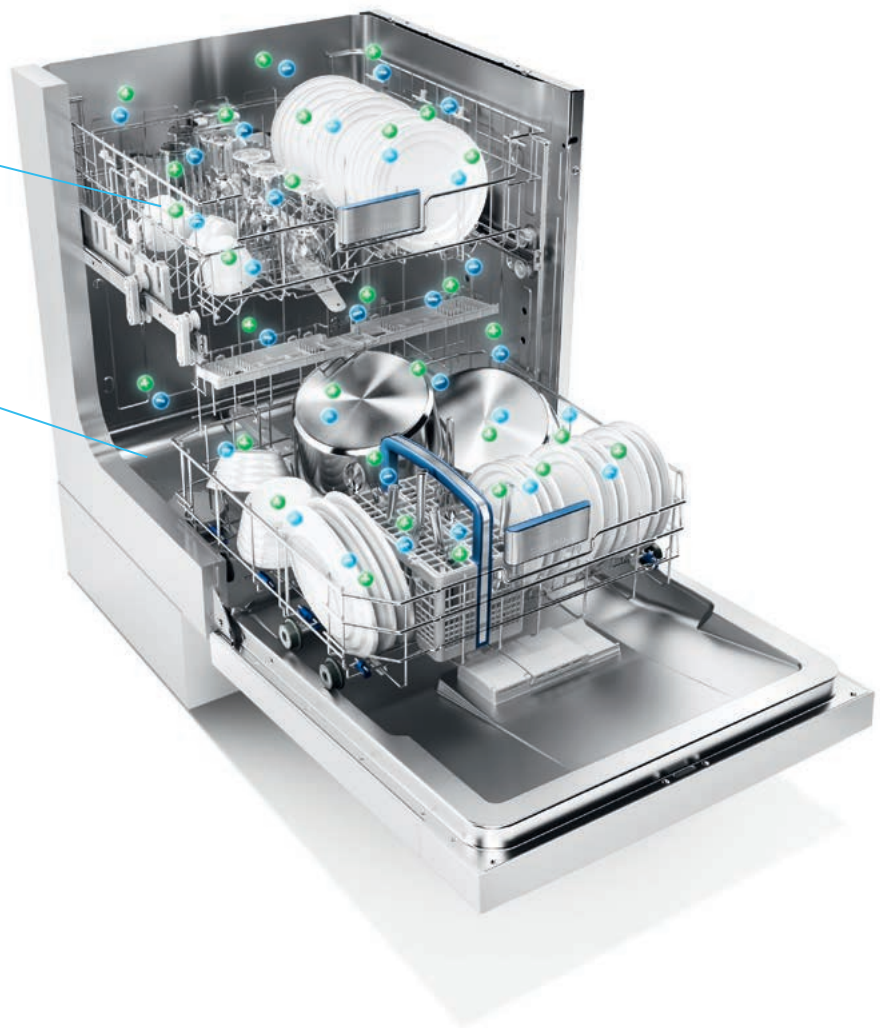

ION FRESH TECHNOLOGY

CLEANS THE AIR BEFORE IT CLEANS THE DISHES.

Say goodbye to unpleasant odours in your dishwasher. IonFresh Technology releases negative ions that circulate inside the machine, neutralising bad odours even while you wait to accumulate a full load. The upshot is that you save the time and energy wasted on incomplete loads and your dishwasher always comes up smelling sweet. No harmful gases or chemicals are involved so there's no reason to turn up your nose at the smell – or the impact on the environment.

Negative ions neutralise bad odours and clean the air inside the dishwasher.

A hidden ionizer produces the negative ions independently of washing operations.

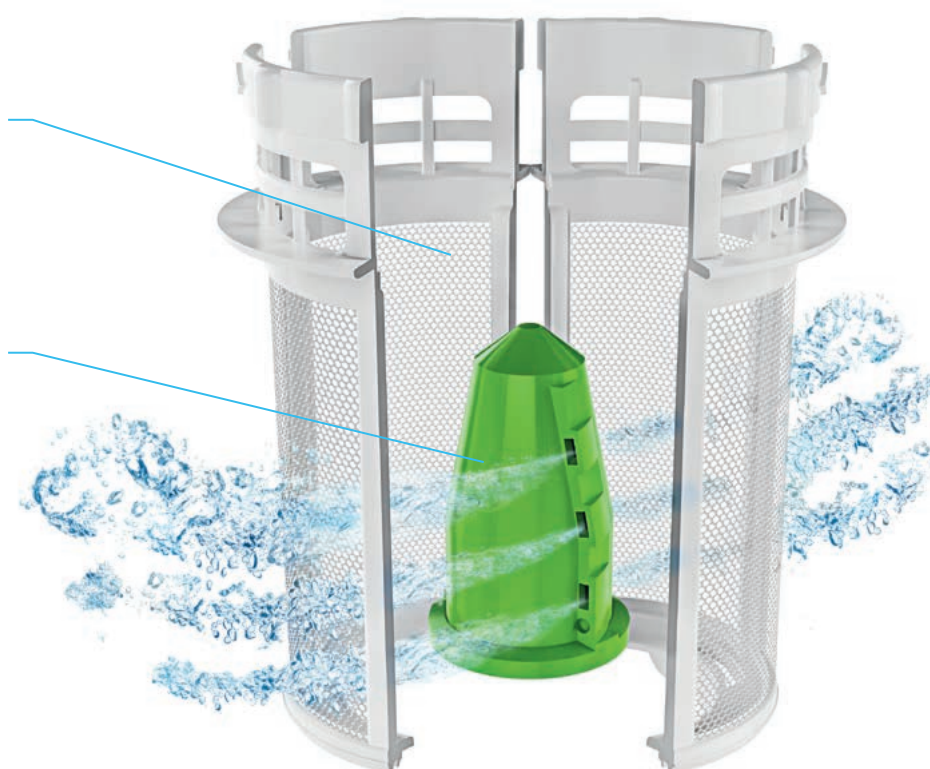

ACTIVE SELF-CLEANING FILTER

SO HYGIENIC, IT EVEN KEEPS ITSELF CLEAN.

While standard filters have to be cleaned at least once a week, Grundig's unique self-cleaning system extends the active life of the filter by up to 12 months. Regular rinsing removes food debris from inside the filter. This not only prevents the build-up of odours but also ensures dishes consistently come up brilliantly clean. After all, dirty filters can impact a machine's clearing power more than you might think. But that doesn't need to be a worry any more. Now, the Active Self-Cleaning Filter from Grundig puts perfect results and hygiene within easy reach.

The active life of the filter is prolonged by up to 12 months with perfect results and maximum hygiene.

The rotating water sprinkler rinses food residues from inside the filter.

THE FEATURES AT A GLANCE.

CARE

AUTO GLASS PERFECT™

Designed to keep your glasses looking new for longer. The dishwasher measures the water hardness coming from the tap and adjusts automatically in order to not soften the water any further. With Auto GlassPerfect™, you are able to protect your glasses against corrosion and prolong their lifetime more than 20 times – as tested by the German laboratory TRLP (TUEV Rheinland LGA Products GmbH). Report No: 211 76 246-002.

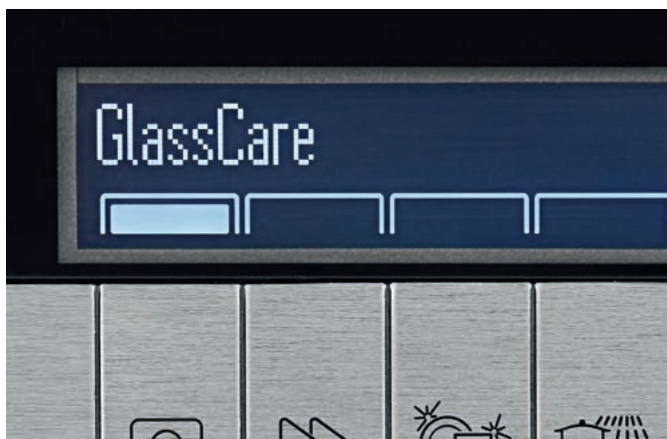

GLASS PERFECT

Simply adjust your water's hardness manually and keep your glasses looking brand new for longer by preventing damage and loss of shine.

STEAM SHINE

Extends heating process for brilliantly sparkling dishes with no water spotting. Tested by German Laboratory, TRLP (TUEV Rheinland LGA Products GmbH). Report No: 211 66 917-004.

GLASS CARE PROGRAMME

This special innovative programme reduces water pressure to protect even the most delicate glassware.

COMFORT

AUTO TABLET

No matter which type of detergent you use, the innovative turbidity sensors automatically recognise it and adjust settings to achieve the best cleaning performance.

TEXT LCD WITH TOUCH CONTROL BUTTONS

The control unit offers ergonomic benefits and ease of use for every kitchen. The text LCD shows you the remaining time and stage of the wash cycle. It also displays useful information such as a closed tap, open door, water leakage or blocked filter.

SOFT SLIDE BASKETS

The rail system has damping elements and wheels to ensure smoother basket movement. It makes handling easy and convenient without bumping dishes.

INNER ILLUMINATION

For a better view at night, the interior LED light is automatically activated when the door is opened.

ALL-IN-WASH

A dual water pressure programme that applies low pressure in the top basket for delicate glass- and chinaware, and 60% higher pressure in the bottom for heavily soiled pots and pans – during the same wash cycle. Additionally, the drying efficiency of the programme is A class for all kinds of dishes – even for plastics.

AUTO PROGRAMME

The sensor management system detects the amount of dishes and degree of dirt of the dishes and automatically applies the most suitable wash programme. This guarantees a minimum of water and energy consumption. The use of a low water pressure for only slightly dirty dishes also reduces the noise level.

QUICK WASH 58'

Perfect washing performance for 13 settings in only 58 minutes.

SILENT WASH

Uses a special programme algorithm that reduces the noise level by 2 dBA – compared to the declared one on the energy label.

COMFORT

TURBO WASH

Large pots and pans can be easily cleaned in the dishwasher with this strong, high-pressure cleaning function.

EXPRESS

Pumps up the water pressure to rinse off dirt faster, shortening wash cycles by up to 70%.

WATER PROTECT+

A double-walled hose protects your home from damage. If the inner hose is broken, the outer hose carries the water to the dishwasher tub. A float switch detects the unusual water level and instantly cuts off the intake from the tap.

HYGIENE

PERFECT RINSE

For those who want to go the extra hygienic mile, the perfect rinse function uses more water for an additional rinsing after the selected washing programme. The result: highly hygienic and super clean dishes.

ANTIBACTERIAL SEAL

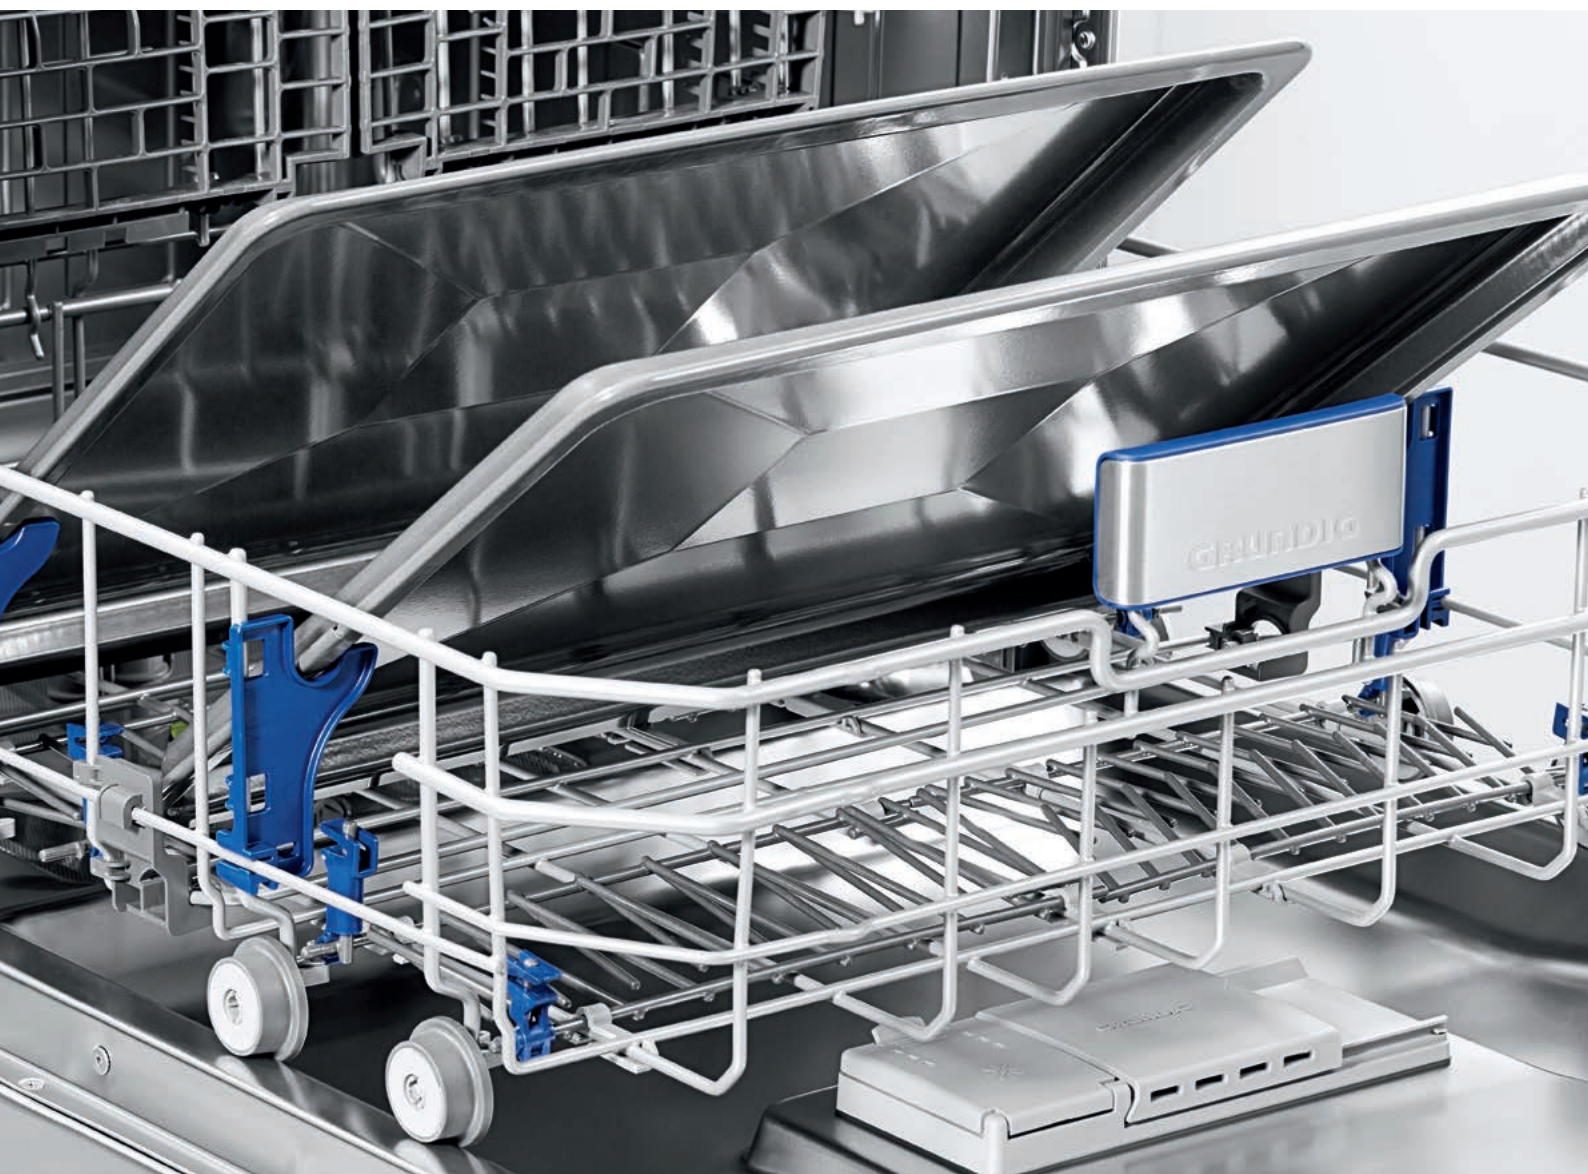

A special coating eliminates bacteria from the dishwasher door. This results in improved hygiene and reduced health hazards.

HYGIENE CARE

Increases the water temperature to over 65°C for 36 minutes. This special programme kills 99.9999% of all bacteria. Approved by German Laboratory, TRLP (TUEV Rheinland LGA Products GmbH).

ACCESSORIES

TRAYMASTER

Simply put your oven trays into the dishwasher: Our new Traymaster function programme provides high-pressure washing for up to three oven trays or shelves. So they are cleaned much better – and obviously more comfortable, too.

VARIO SLIDE CUTLERY BASKET

The special cutlery basket is designed to slide easily at two levels along the tines of the lower basket, allowing for more flexible positioning and creating more space for large-sized pots, pans and bowls.

LOWER BASKET WINE GLASS HOLDER

Thanks to the special wine glass holder, glasses with tall stems can now be placed in the lower basket – without any risk of damage.

REMOVABLE CUTLERY DRAWER

While this creates more room for your cutlery and espresso cups, it can just as easily be removed to provide additional space for tall objects in the centre of the upper basket.

FREE STANDING DISHWASHER, 60 CM

13 place settings
LC display
Touch control buttons

8 WASH PROGRAMMES
Eco 50°, Auto 40-65°, Prewash, Mini 30', GlassCare, QuickWash 58',
Intensive 70°, All-in-Wash

SPECIAL FUNCTIONS
Express / Half load / Tablet

MAIN FEATURES

- Inverter EcoMotor
- 24 h time delay and remaining time
- Active ventilation
- GlassPerfect
- Salt, rinse aid and water indicators

INTERIOR DESIGN

- Removable cutlery drawer
- Loaded adjustable upper basket
- Foldable glass supports in the upper and plate support in the lower basket
- Long tool basket
- VarioSlide cutlery basket

SAFETY

- WaterProtect+
- Antibacterial seal
- Child lock
- Warning indicator: tap closed

PERFORMANCE

- Energy efficiency class: A++
- Drying performance: A
- Water consumption: 10 L
- Noise level: 44 dBA

	PERFORMANCE (REGULATION 1059/2010)	
Energy efficiency class	A+++	A++
Drying performance	A	A
Water consumption [Eco 50°], L	9	9
Annual water consumption, [280 cycles] L / year	2520	2520
Energy consumption [Eco 50°], kWh	0.74	0.74
Annual energy consumption, [280 cycles] kWh / year	188	211
Noise level, dBA	47	47
Programme duration, min (Eco 50°)	194	194
Power consumption in off-mode, W	0.49	0.49
Power consumption in left-on mode, W	0.9	0.9
Duration of the left-on mode, min	30	30
	TECHNICAL INFORMATION	
EcoMotor	•	•
Supply voltage / Frequency, V / Hz	220-240 / 50	220-240 / 50
Maximum possible height from floor to water connection, cm	110	110
Maximum temperature for water intake, °C	60	60
	DIMENSIONS	
Product dimensions (H x W x D), cm	85 x 44.8 x 60	85 x 44.8 x 60
Depth with opened door, mm	115	115
Unpacked weight / packed weight, kg	39.5 / 42	39.5 / 42
	COLOUR OPTIONS	
White	-	-
X: Fingerprint free inox	•	•
Black	-	-

GSF 41820

Type	45 cm Free Standing Dishwasher
MAIN FEATURES	
Place settings	10
Control type	LC display with touch control buttons
Delay timer	24 h
Remaining time	•
Drying system	Hot air drying
Glass protection system	-
Automatic water softener	•
Automatic door opening	-
PROGRAMMES	
Number of programmes	8
Eco 50°	•
Auto	•
Prewash	•
Mini 30'	•
GlassCare	•
QuickWash 58'	•
Intensive 70°	•
Anti-Allergy 70°	-
All-in-Wash	•
SilentWash	-
SPECIAL FUNCTIONS	
IonFresh technology	-
Express	•
SteamShine	-
Tablet	•
TurboWash	-
Traymaster	-
Half load	•
INTERIOR DESIGN	
Inner illumination	-
Removable cutlery drawer	-
SoftSlide baskets	-
Loaded adjustable upper basket	•
Foldable glass supports in the upper basket	-
Foldable glass supports in the lower basket	• [full foldable]
Bottle holder / long tool basket	- / -
VarioSlide cutlery basket	-
Alu-Shield coating	-
Active self-cleaning filter	-
SAFETY	
WaterProtect+	•
Antibacterial seal	•
Key lock	•
Warning indicators: tap closed, door open, water leakage, filter blocked	• / - / - / -
