

Gigabit High-Power PoE+ Injector

One 30 W Port, IEEE 802.3at/af Compliant, Plastic Housing

Part No.: **561037**

Reduce costs by using existing Cat5 cable to provide both power and data.

The Intellinet Gigabit High-Power PoE+ Injector allows you to connect your IEEE 802.3af/at-compliant products to a non-PoE LAN switch port. The injector can be used to connect a wireless access point, IP phone, network camera or any IEEE 802.3af/at-powered device (PD) to a switch. The device has an output power rating of up to 30 watts. That's enough for even power-hungry PoE devices.

Reduce Wiring Costs.

No need to run AC power lines for your wireless access point, network camera or IP phone. Simply connect the PoE Injector to the LAN switch port, and use the existing Cat5 cabling to deliver DC power as well as transfer data.

Protect Your Equipment.

Once DC power is connected to your networked equipment through the Cat5e/6 cabling, the Intellinet PoE Injector ensures that your products are protected from power problems like short circuits (short GRND), current overloads and high voltages.
