ZYXEL

NAP303

802.11ac Dual-Radio Smart Antenna 3x3 Nebula Cloud Managed Access Point

The Zyxel Nebula NAP303 802.11ac Dual-Radio Smart Antenna 3x3 Nebula Cloud Managed Access Point is a high-performance 3x3 802.11ac Wi-Fi AP capable of delivering combined data rates of up to 1.75 Gbps. Featuring Smart Antenna technology, the NAP303 perfectly solves coverage problems by adjusting antenna patterns adaptively to fit different wireless environments. The NAP303's industry-leading RF output power and sensitivity jointly offer greater coverage and better performance to networks. The ultra-fast capabilities makes NAP303 perfect for interference-laden environments, such as conference rooms, airports, educational facilities and other high-density venues.

Every Nebula AP has been engineered for cloud management. Based on the NETCONF standard, all data traffics between the cloud and APs are exchanged using secure transports to ensure transaction-safe configuration on all Nebula devices. Furthermore, with the intuitive management interface, administrators are able to control all the APs quickly even without training.

Benefits

Zero-touch deployments

The Zyxel Nebula APs auto-configure themselves after installation, and then automatically connect to the Nebula cloud to join the network; so auto-configuration, provision, monitoring and diagnostics can be performed anytime, anywhere. This simplifies network setup and enables deployment of Nebula APs to a remotely located network even by non-IT professionals.

Cloud-managed, dual-radio 3x3 MIMO 802.11ac AP

Supports combined data rates of up to 1.75 Gbps

Smart antenna provides breakthrough performance

Self-configuration and zerotouch deployment

Enterprise-class security and RF optimization

Dynamic Channel Selection, Load Balancing and Smart Client Steering

Industry-leading receive sensitivity at as low as -102 dBm

Tool-less bracket design simplifies installation

Smart antenna technology

Featuring more than 700 optimized antenna patterns, the Smart Antenna can continuously calculate the ideal physical-layer path for each individual client. This feature not only offers the best possible signals by shaping to various patterns, but also mitigates interference from other wireless clients. With the advance technology, the Zyxel NAP303 can handle a variety of tough deployments such as high-capacity, high-performance and interference-laden environments.

Best-in-class coverage and performance

Different from other 802.11ac APs, the Zyxel NAP303 stands out with its best-in-class coverage and performance thanks to its unique RF design. The AP's three-stream hardware configuration provides power of up to 30 dBm and unparalleled receive sensitivity of as low as -102 dBm. The Smart Antenna technology doubles the NAP303's performance over conventional internal antennas, and it performs three times (3x) better than legacy 802.11n APs as well.

Optimized wireless experience

The Zyxel Nebula NAP303 delivers optimized wireless experience for users with comprehensive wireless features such as Dynamic Channel Selection (DCS), Load Balancing, and Smart Client Steering, etc. DCS avoids interference from co-channeling and overlapping channels continuously, while Load Balancing and Smart Client Steering which features Band Select and Balance for more spectrum to provide more stable, reliable wireless connections.

Enterprise-class security

The Zyxel Nebula NAP303 Access Point inherits the NETCONF protocol for secure configuration changes. In terms of authentication and data encryption, it supports WPA2 enterprise protection and a wide range of Extensible Authentication Protocol (EAP) types, including EAP SIM for smartphones. Besides, the NAP303 also features access control and Layer-2 isolation for privacy protection. The comprehensive security features ensure NAP303 to deliver enterprise-grade protection to the entire network.

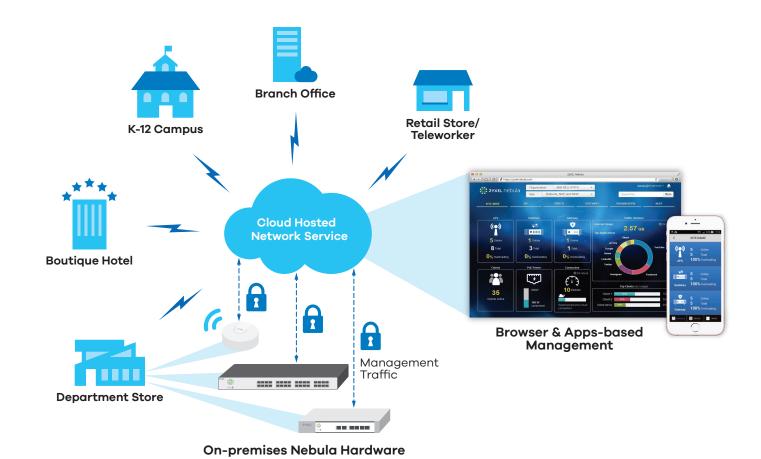

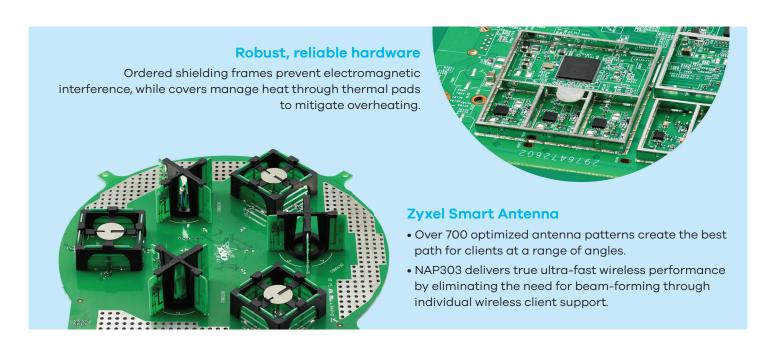

Monitor AP usage and client report by different time intervals and view historical status record via the intuitive management interface

Antenna system	1	6 embedded smart antenna		
Antenna gain		2.4 GHz 4 dBi; 5 GHz 6 dBi		
Support data rate		 802.11a/g: 1, 2, 5.5, 6, 9, 11, 12, 18, 24, 36, 48, and 54 Mbps 802.11n: up to 450 Mbps in MCS23 (40 MHz) 802.11ac: up to 1300 Mbps in MCS9 (80 MHz) 		
Receive sensitiv	rity	Min. Rx sensitivity up to to -102 dBm		
Interfaces				
Number of 10/10	00/1000M LAN	2		
Console port		RJ-45 serial		
PoE		Yes		
PoE power draw		17.04 W		
WLAN Features				
WLAN maximur	n throughput	Up to 900 Mbps		
Wireless Securit	ty			
WEP		Yes		
WPA/WPA2-PSK		Yes		
WPA/WPA2-Ente	erprise	Yes		
WLAN access co	ontrol list	Yes		
EAP types		EAP-TLS, EAP-TTLS, EAP-PEAP, EAP-FAST, EAP-AKA and EAP-SIM		
IEEE 802.1X		Yes		
Number of SSID		8 (per radio)		

Window Co	a contact		
Wireless Se		Vac	
MAC filtering		Yes	
Layer-2 isolation		Yes	
RADIUS authentication		Yes	
Captive portal		Yes	
Network			
VLANs		Yes	
DHCP client		Yes	
QoS (PG)			
WMM		Yes	
WMM power save		Yes	
DiffServ mo	ırking	Yes	
Manageme	nt		
Cloud managed		Yes	
ZON utility		Support	
Smart connect		Neighbor device discovery	
Others			
Plenum rating		Yes	
Kensington lock support		Yes	
Input power		DC input: 12 VDC 2 A; PoE: 802.3at compliant	
		(Power adapter is sold separately)
