Gently stimulates natural let down and milk flow

- Soft massage cushion with warm feel

Easy to combine breast and bottle feeding

- Includes our Natural bottle and nipple for natural latch on

Free handle for easy switch to manual usage

- Designed to easily switch from electric to manual usage

PHILIPS
AVENT

Highlights

More comfortable position

The breast pump has a unique design, so your milk flows directly from your breast into the bottle, even when you are sitting up straight. This means you can sit more comfortably when pumping; no need for you to lean forward to make sure all your milk ends up in the bottle. Sitting comfortably and being relaxed when pumping, naturally helps your milk to flow more easily.

Simple settings to choose from

When switched on, the pump automatically starts in gentle stimulation mode to get your milk flowing. Then choose from 3 pumping settings to make milk flow most comfortable for you.

Soft massage cushion

Our massage cushion has a new soft velvety texture that gives a warm feel to the skin for comfortable, gentle stimulation of your milk flow. During pumping, it gently mimics your baby's suckling for natural let down and clinically proven effectiveness. The soft massage cushion is designed to comfortably fit the majority of moms. Should you need it, a larger size cushion is available separately (availability may vary per country).

Includes our Natural nipple

The wide breast shaped nipple promotes natural latch on similar to the breast, making it easy for your baby to combine breast and bottle feeding.

From electric to manual usage

Your breast pump is able to adapt to your needs. Our new single electric breast pump includes a free handle, and it is designed to easily switch from electric to manual usage. This way you can always express in the way that you want to.

Compact design

The breast pump has a compact design, which makes it easy to hold and position on your breast. The small, lightweight base unit can easily be placed within comfortable reach for full control when pumping. For extra convenience in transport and storage, the tube simply wraps around the base unit. Easy to use on the go with batteries.

Easy cleaning

Cleaning is easy, thanks to the small number of separate parts. Your milk will never come into contact with the tubing and base unit. All parts are dishwasher proof, except the electrical parts.

Specifications

Country of origin

- England

Material

- Breast pump: Polypropylene, BPA free*
- Bottle: Polypropylene, BPA free*
- Nipple: Silicone, BPA free*
