Suitable hair and skin types

- NOT suitable for red, grey, light-blond hair & skin type VI

Long lamp lifetime

- Durable lamp with a lifetime of 250,000 flashes

PHILIPS

Features

IPL technology

Philips Lumea works with an innovative light-based technology called "Intense Pulsed Light" (IPL) derived from technology used in professional beauty salons for hair removal. Philips Lumea now brings this innovative new technology, suitable for home use, to be used by you wherever and whenever you want.

Suitable hair and skin types

Philips Lumea works effectively on (naturally) dark-blond, brown and black hair. Philips Lumea is NOT effective for (naturally) red, grey and light blond hair. Philips Lumea is NOT suitable for very dark skin (skin type VI)

Application body areas

Philips Lumea for Men has been developed in close cooperation with leading dermatologists for a safe, effective and gentle application on arms, underarms, shoulders, stomach, pubic area (excluding the scrotum), legs, chest and back

Body hair regrowth control

Philips Lumea for Men applies gentle pulses of light to the hair root. As a consequence the hair sheds naturally and hair regrowth is inhibited. Repeating this treatment every two weeks for the underarms, pubic area, chest, stomach, legs and back will keep your skin smooth every day. For a most effective treatment pre-shave the application areas with the included Bodygroom as long as you still experience regrowth

Lamp does not need replacement

Philips Lumea comes equipped with a durable lamp with a lifetime of 250,000 flashes.
