MCM302

Obsessed with sound

Relax with great music

Enjoy rich sound with the Philips micro hi-fi system. Playback your favorite portable music using the USB Direct or MP3 link. Digital Sound Control optimizes your music style settings. Stylishly designed with high quality speakers.

Enjoy your music from multiple sources

- MP3 Link for portable music playback
- Play MP3/WMA-CD, CD and CD-RW
- USB Direct for MP3/WMA music playback

Enrich your sound experience

- Digital Sound Control for optimized music style settings
- Dynamic Bass Boost for deep and dramatic sound
- 50W RMS total output power
- Loudness for bass and treble enhancement

Easy to use

- Motorized CD loader for convenience access
- Wake up and sleep timer functions

PHILIPS

Highlights

Digital Sound Control

Digital Sound Control offers you a choice of pre-set Jazz, Rock, Pop and Classic controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

Dynamic Bass Boost

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high – at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

50W RMS

This Philips speaker has 50W RMS total output power. RMS refers to Root Mean Square which is a typical measurement of audio power, or rather, the electrical power transferred from an audio amplifier to a loudspeaker, which is measured in watts. The amount of electrical power delivered to the

loudspeaker and its sensitivity determines the sound power that is generated. The higher the wattage, the better the sound power emitted by the speaker.

Motorized CD loader

A motorized sliding front door adds even more panache to the already sleek design of this system. The stylish yet functional door housing the disc slides up and down vertically in a smooth motion at the touch of a button whenever you feel like changing your music selection. Just sit back and enjoy the dynamic sound performance while watching the disc play through the transparent window.

MP3 Link

The MP3 link connectivity allows direct playback of MP3 content from portable media players. Besides the benefit of enjoying your favorite music in the superior sound quality delivered by the audio system, the MP3 link is also extremely convenient as all you have to do is to plug your portable MP3 player to the audio system.

Play MP3/WMA-CD, CD and CD-RW

Audio compression technology allows large digital music files to be reduced up to 10 times in size without radically degrading their audio quality. MP3 or WMA are two of the compression formats that let you enjoy a world of digital music on your Philips player.

Download MP3 or WMA songs from authorized music sites on the Internet or create your own MP3 or WMA music files by ripping your audio CDs and transferring them onto your player.

USB Direct

With the USB Direct mode, simply plug in your USB device to the USB port on your Philips device and your digital music will be played directly from the Philips device.

Wake up and sleep timer

Many of alarm clocks feature a variety of alarm choices. This Philips Clock radio awakens you to radio or the traditional alarm buzzer. The Sleep Timer allows you to program the required length of time for music to coincide with how long you normally take to fall asleep. No matter what your alarm clock needs, whether it's a morning buzzer that produces a steady tone, or listening to your favorite music as you go to sleep, this clock radio has it all.

Loudness

In the sound spectrum, high and low frequencies are relatively less audible to human ears - especially at low volumes. By activating the Loudness feature, the bass and treble will be amplified so you can savor a more balanced sound perception overall.

Specifications

Sound

- Output power: 2 x 25 W RMS
- Sound enhancement: digital sound control 4 modes, Dynamic Bass Boost, loudness

Loudspeakers

- Speaker drivers: 4" woofer
- Speaker types: bass reflex speaker system
