

#### Micro music system

- Bluetooth
- USB port for charging

BTM1360/05

## Bring power to your tunes

Listen to digital music from your Smartphone via Bluetooth, or play MP3-CDs and CD-R/RW on this Philips micro system. Bass Reflex speakers and 30-W maximum output power deliver booming bass and room-filling sound.

#### Benefits

##### Enjoy your music from multiple sources

- Stream music wirelessly via Bluetooth™ from your smartphone
- USB Direct for easy MP3 music playback
- Play MP3-CD, CD and CD-R/RW
- Audio-in for portable music playback

##### Enrich your sound experience

- Bass Reflex Speaker System delivers a powerful, deeper bass

- Digital Sound Control
- 30 W RMS Maximum output power

##### Easy to use

- Digital tuning with preset stations for extra convenience
- Motorised CD loader for convenient access

# PHILIPS

Features

Stream music via Bluetooth™

Bluetooth is a short range wireless communication technology that is both robust and energy-efficient. The technology allows easy wireless connection to iPod/iPhone/iPad or other Bluetooth devices, such as smartphones, tablets or even laptops. So you can easily enjoy your favourite music, sound from video or game wirelessly on this speaker.

USB Direct for easy MP3 music

Thanks to the complete file transferability, you can easily enjoy the convenience and fun of accessing more digital music via the built-in USB Direct.

Audio-in

The Audio-in connectivity allows direct playback of Audio-in content from portable media players. Besides the benefit of enjoying your favourite music in the superior sound quality delivered by the audio system, the Audio in is also extremely convenient as all you have to do is to plug your portable MP3 player into the audio system.

Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimise the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by causing the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a completely new dimension of deep bass.

Digital Sound Control

Digital Sound Control offers you a choice of pre-set balanced, clear, powerful, warm and bright controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalising technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

Specifications
