- 100% UV-free blue light

Proven benefits

- Independent research shows improved energy levels with users
- Clinically proven* to improve mood and energy
- 100 years of Philips expertise in light technology

PHILIPS

Highlights

Natural blue light

goLITE BLU energy light produces a particular kind of pure blue light that occurs naturally on very sunny, clear days. Special receptors in the eyes absorb this blue light, which makes you feel energetic whenever you need it.

Fights the winter blues

In countries with long winters, many people experience loss of energy and low spirits due to lack of light. These symptoms are referred to as the winter blues. They typically start in autumn and may last for several weeks. Philips goLITE BLU is a simple and natural way to alleviate these symptoms and restore your summer mood and energy level.

Increases energy levels

Our busy lifestyles demand a lot from us and we want to be at our best both during work and private time. Sometimes we experience

low moments or dips during the day. Using the goLITE BLU energy light at any time of day will help you to increase your energy levels and alertness in a natural way.

Helps with jet-lag

Many people who travel regularly experience jet-lag after long flights. Using the goLITE BLU when you feel jet lagged, gives you a natural energy lift and can help reset your body clock to the new time zone.

Use for 15-45 minutes per day

Place goLITE BLU in your field of vision—no need to look directly into the light. Using the goLITE BLU energy light for at least 15 minutes naturally improves your mood and energy level whenever you need it. Using it for longer is absolutely safe. Regular use every morning during the winter months will help to alleviate symptoms of the winter blues.

Use everywhere

Compact design, storage case, rechargeable battery and international adapters make the goLITE BLU easy to use, easy to store and easy to take with you when you travel.

Adjustable timer and intensity

Set the timer according to your needs (1-60 min) by using the touch display and choose the right level of brightness out of the four levels by using the dimmer. Set the treatment time alarm to ensure that you don't miss your session of blue light.

Long lasting LEDs

The durable LED lights in the goLITE BLU energy light can be used for 30 minutes a day for 50 years, without losing efficacy.

UV-free

The pure, blue light increases your energy naturally, like on a sunny day, but without the UV rays associated with sunlight.
