

MPN: KONV-IDE/SATA

IDE to SATA Converter

The KONV-IDE/SATA Converter seamlessly bridges the gap between older IDE technology and modern SATA interfaces. This adapter allows you to connect a 40-pin IDE device, such as a hard drive or optical drive, to a SATA port on your motherboard. Ideal for upgrading systems or accessing data from legacy drives, this converter offers a cost-effective solution without requiring a complete hardware overhaul. Benefit from the speed and efficiency of SATA while preserving your existing IDE hardware. As with all MicroConnect products, this converter is designed for reliable performance and ease of installation, reflecting our commitment to providing pioneering connectivity solutions with over 20 years of industry expertise. This converter falls under our Plugs/Accessories category and is perfect for computer enthusiasts and professionals alike looking to integrate IDE devices into SATA-based systems.

- SATA 1.0 Compliant
