

Personalised Sound Settings

Time to get personal! The elegant wood-finished MC-220 delivers dynamic sound performance, plus the essential functionalities and the freedom to personalise your sound settings according to your tastes. Enjoy music just the way you like it.

Benefits

Enrich your sound experience

- Incredible Surround™ for enhanced audio enjoyment
- Digital Sound Control for optimised music style settings
- Dynamic Bass Boost for deep and dramatic sound
- 2 x 10 W RMS/2 x 20 W music power

Start the day your way

- Wake-up and sleep timer functions

- Full logic tape deck with Auto Reverse
- Digital tuning with 40 pre-set stations for extra convenience

Sounds great too

- Elegant wood-finished speakers

PHILIPS

Features

Incredible Surround™

Incredible Surround is an audio technology from Philips that dramatically magnifies the sound field to immerse you in the audio. Using state-of-the-art electronic phase shifting, Incredible Surround mixes sounds from left and right in such a way that it expands the virtual distance between the two speakers. This wider spread greatly enhances the stereo effect and creates a more natural sound dimension. Incredible Surround allows you to experience total surround with greater depth and width of sound, without the use of additional speakers.

Digital Sound Control

Digital Sound Control offers you a choice of pre-set Jazz, Rock, Pop and Classical controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

Dynamic Bass Boost

Dynamic Bass Boost maximises your music enjoyment by emphasising the bass content of the music throughout the range of volume settings - from low to high – at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost

can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

2 x 10 W RMS/2 x 20 W music power

Wake-up and sleep timer

Many alarm clocks feature a variety of alarm choices. This Philips Clock radio wakens you with the radio or the traditional alarm buzzer. The Sleep Timer allows you to programme the required length of time for the music to coincide with how long you normally take to fall asleep. No matter what your alarm clock needs, whether it's a morning buzzer that produces a steady tone, or listening to your favourite music as you go to sleep, this clock radio has it all.

Full logic tape deck

40-preset digital tuning

Digital radio offers you additional music options to your music collection on your Philips audio system. Simply tune into the station that you want to preset, press and hold the preset button to memorise the frequency. With preset radio stations that can be stored, you can quickly access your favourite radio station without having to manually tune the frequencies each time.
