- Tuner Enhancements: Auto Store

Connectivity

- Aux in: Line in
- Headphones: 3.5 mm
- Other connections: FM Antenna, MW Antenna

Convenience

- Alarms: CD Alarm, Radio Alarm, Tape alarm, Sleep timer
- Clock: On main display
- Display Type: LCD
- Eco Power Standby: 1 watt

Accessories

- Included accessories: FM/MW Antenna
- Remote control: 23-key with battery

Dimensions

- Set dimensions (W x H x D): 166 x 225 x 274 mm
- Main speaker dimensions (W x H x D): 166 x 225 x 244 mm
- Packaging dimensions (W x H x D): 414 x 303 x 539 mm
- Weight incl. Packaging: 10.2 kg

Highlights

Dynamic Bass Boost

Dynamic Bass Boost maximises your music enjoyment by emphasising the bass content of the music throughout the range of volume settings - from low to high - at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

Digital Sound Control

Digital Sound Control offers you a choice of pre-set Jazz, Rock, Pop and Classical controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

Incredible Surround™

Incredible Surround is an audio technology from Philips that dramatically magnifies the sound field to immerse you in the audio. Using state-of-the-art electronic phase shifting, Incredible Surround mixes sounds from left and right in such a way that it expands the virtual distance between the two speakers. This wider spread greatly enhances the stereo effect and creates a more natural sound dimension. Incredible Surround allows you to experience total surround with greater depth and width of sound, without the use of additional speakers.

60 W RMS

This system has a 60 W RMS total output power. RMS refers to Root Mean Square, which is a typical measurement of audio power, or rather, the electrical power transferred from an audio amplifier to a loudspeaker, which is measured in watts. The amount of electrical power delivered to the loudspeaker and its sensitivity determines the sound power that is generated. The higher the wattage, the better the sound power emitted by the speaker.

Wake-up and sleep timer

Many alarm clocks feature a variety of alarm choices. This Philips Clock radio wakens you with the radio or the traditional alarm buzzer. The Sleep Timer allows you to programme the required length of time for the music to coincide with how long you normally take to fall asleep. No matter what your alarm clock needs, whether it's a morning buzzer that produces a steady tone, or listening to your favourite music as you go to sleep, this clock radio has it all.

Full logic tape deck

Full logic tape deck with Auto Reverse

40-preset digital tuning

Digital radio offers you additional music options to your music collection on your Philips audio system. Simply tune into the station that you want to preset, press and hold the preset button to memorise the frequency. With preset radio stations that can be stored, you can quickly access your favourite radio station without having to manually tune the frequencies each time.
