Highlights

FHD IPS display

With a crystal-clear FHD IPS display, images and text look brilliant, clear and crisp from every angle.

SoftBlue Technology

Studies have shown that just as ultra-violet rays can cause eye damage, blue light rays from LED displays can cause eye damage and affect vision over time. SoftBlue LED technology uses a smart technology to reduce the harmful blue light waves without affecting the color or image of the display. SoftBlue LED technology is certified by international testing organizations SGS Labs and TUV Rheinland to reduce harmful blue light.

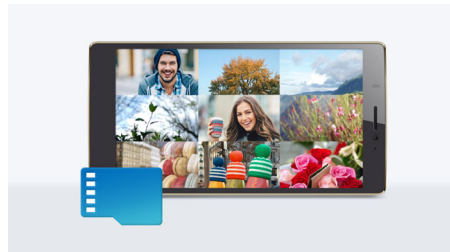

Octa-core processor

Your Philips tablet is even more powerful with its Octa-core processor. This powerhouse

keeps up easily with your multitasking demands. Seamlessly load web pages and enjoy uninterrupted videos. Gaming is immersive with exceptional picture quality.

Expandable storage

In addition to the included storage the Philips tablet offers flexibility to quickly expand your storage and easily swap out memory with a Micro SD card.

Fast 4G LTE data

4G LTE

Integrated 4G LTE supports fast download speeds no matter the location of the 4G network.

Voice Calling

Your tablet can do more; you can even use it to talk over 4G LTE networks.

Dual front and rear cameras

Bring yourself to the forefront of fun shots with the dual front and rear cameras in your Philips tablet. Besides allowing you to take self-portraits, the front-facing camera also means that you can engage in face-to-face video calls with friends or colleagues. The rear camera allows you to capture life's fleeting moments in crystal clear quality and send them to friends and family. A built-in flash means that you can take great photos even in dim light so you can capture that perfect moment, night or day.

Android Operating System

Powered by Android, your Philips mobile now comes with a fully customizable mobile platform that is open to a wide range of smart applications and functions. Find your pocket PC, game console, and telephone all rolled conveniently into one.
