HP Workspace

Mobile user productivity, IT simplicity.

Empower your mobile workforce in a bold new way with HP Workspace, a turnkey application virtualisation service that leverages your existing investment in 32- and 64-bit Windows desktop and Web applications by making them available to your HP Elite x3 users.[1]

HP Workspace simplifies the secure delivery of 32- or 64-bit Windows applications to HP Elite x3 users with a turnkey application virtualisation service desk.

Enable seamless productivity

Enjoy a familiar desktop PC experience when HP Workspace transforms your HP Elite x3 into a PC running multiple 32- or 64-bit desktop and Web applications, even while you're on a call. Save work locally or in the cloud[2] for easy access.

Simplify desktop application virtualisation

Get a comprehensive virtualisation service and cloud infrastructure package staffed by highly-trained HP service agents who can quickly publish applications for you. It's like having a personal concierge for corporate applications.

Save time and money

Help improve the bottom line, trim training and resource budgets with a turnkey service that can be a cost-effective alternative to creating mobile apps.

Featuring

• Secure company data and help ensure compliance with dedicated servers, SSAE16-SOC-certified data centres, end-to-end encryption, session auto cleanup, and optional VPN service.[3]

• Get notebook-class speed, performance, and responsiveness with plenty of cloud processing power, support for an HD display[4], and dedicated computing resources for each user.

• Analyse users, sessions, and application performance and receive detailed reports that help IT better manage application delivery and costs with HP Workspace Premium.[5]

• Avoid costly overages with metered hour solutions. With HP Workspace plans, get unlimited monthly hours per user.

HP Workspace service features[6]

End users	IT administrators
• Dedicated cloud computing resources to run applications seamlessly—each user gets their own powerful PC in the cloud • Save files between the HP Elite x3 device and HP Workspace • Access and share files with Google Drive, Box, and Dropbox • Print from applications in HP Workspace (print to PDF) • Auto cleanup so no session data is left behind when users un-dock the HP Elite x3	• 32- or 64-bit Windows desktop or Web application virtualisation • Web application provisioning • Distribution of the virtualised app catalogue to end users • Virtual machine compute configuration and elastic scaling included— no extra sourcing • Global data centre coverage with 7 regional data centres and more planned in the near future • SSAE-16/SOC Certification • Configurable time out and auto cleanup times • Mon–Fri deployment and incident support[7] • Application usage analytics (in HP Workspace Premium) • Support for single sign-on (SSO) using Azure Active Directory • A VPN connectivity integration option (licensed separately)

HP Workspace specifications
