Other benefits

- Orthodontic, symmetrical and collapsible soother teat
- Different teat flow rates available
- Compatible with Philips Avent range
- Trusted by moms since 1984

PHILIPS
AVENT

Highlights

Less colic

Our clinically proven Airflex venting system is designed to reduce wind and colic. As your baby feeds, the valve integrated into the teat flexes to allow air into the bottle to prevent vacuum build up and vents it towards the back of the bottle. It keeps air in the bottle and away from baby's tummy to help reduce wind, spit-up and burping.

Less fussing

Philips Avent Classic+ bottle reduces fussing. Babies fed with Philips Avent Classic+ bottles experienced 60% less fussing at night, than babies fed with a competitor's anti-colic bottle.
*

Uninterrupted feeding

The teat shape allows secure latch and the ribbed texture helps prevent teat collapse for uninterrupted, comfortable feeding.

Secure latch

Teat shape designed for secure latch

Leak-free design

Our Classic+ bottle is designed to prevent leakage whilst feeding, for a truly enjoyable feeding experience.

Easy to assemble

Our Classic+ bottle has few parts for quick and simple assembly.

Easy to hold

The unique bottle shape makes this bottle easy to hold and grip in any direction.

Easy to clean

With its wide neck and rounded corners, our bottle is easier to clean quickly and thoroughly.

Ease of cleaning helps to ensure more hygienic feeding.

Orthodontic Soother

Flat, drop-shaped symmetrical teats respect the natural development of your baby's palate, teeth and gums, even if the soother ends up upside-down in the mouth.

Fits your baby's growing needs

The Philips Avent Classic+ bottle range offers different teat flow rates to keep up with your baby's growth. Remember that age indications are approximate as babies develop at different rates. All teats are available in twin packs: Newborn, Slow, Medium, Fast and Variable Flow, and Thick feed.

Trusted by moms

Since 1984, Philips Avent has been designing and manufacturing products that are inspired by nature and have been developed through extensive research and clinical trials.

Compatibility across the range

The Philips Avent Classic+ bottle is compatible with the Philips Avent range, excluding Natural bottles and cup handles. We advise to use the Classic+ bottles with Classic+ feeding nipples only.

Specifications

Bottle

- Material: BPA free*

Design

- Bottle design: Ergonomic shape, Wide neck

* 0% BPA, following EU regulation 10/2011

* At 2 weeks of age, babies fed with a Philips Avent bottle showed less colic, and significantly less fussing at night compared to babies fed with another competitor bottle.

* Teat design proven to prevent teat collapse and associated air ingestion and feeding interruptions.

* What colic is, and how it affects babies? Colic is caused in part by swallowing air while feeding, which creates discomfort in a baby's digestive system. Symptoms include crying, fussing, wind and spit-up.
