Brighter. Whiter. Stronger.

Bright white LED headlights for high-end look

Philips X-tremeUltinon LED [~H7] features premium LUXEON LED with 6000 Kelvin. Our patented SafeBeam technology projects 200% brighter light exactly where you need it. Built to last with advanced AirCool design.

Brighter, whiter LED headlights for cars

- Get 200% brighter light for superior visibility

Upgrade your style

- 6000 Kelvin colour temperature for crisp white light
- Upgrade your lights, upgrade your style

Superior light diffusion

- Powerful bright light, directed exactly where you need it
- Designed for projector headlights. Extra boost to reflector.

Longer-lasting LED headlights

- Durable headlights that can last as long as your car
- Innovative heat management systems for longer lifetime

Exceptional Philips quality

- Philips automotive lighting at the highest quality level
- Easy installation and compatible with many car models

PHILIPS

Highlights

Vivid bright light

Driving in the dark is demanding, so you rely on your headlights. Forward and peripheral vision are both important to enhance your driving ability for a safer drive. With an intense bright beam, Philips X-treme Ultinon LED headlights for cars improve your visibility by up to 200%. Once you experience this daylight-like effect, you'll always prefer LED. The more you can see, the better you perform, the faster you react and the safer you are. So don't let darkness win — choose Philips and start driving at night with greater confidence and control.

Pure bright white light

With a colour temperature of up to 6000 Kelvin, the Philips X-tremeUltinon LED headlight based on automotive-grade LUXEON technology produces a bright white, daylight-like beam. With clearer vision you're better able to spot obstacles and take the perfect driving line. And as you don't have to strain to see the terrain ahead, brighter lights make for a more comfortable and exciting night-time drive.

Stylish white light upgrade

Just like our eyes are windows into our souls, so your headlights say a lot about your car. If you're looking to upgrade your style without buying a newer car, upgrading your headlights is one of the smartest ways to spend your money. Your car is an expression of who you are, so make a style statement with Philips LED headlights. Instead of yellow, you'll get a crisp,

white and modern light. For that high-end look, smart drivers choose the superior style of Philips LED headlights.

Bright light where you need it

The best headlights are not simply the ones that produce the strongest light. Creating ever-brighter LED bulbs for cars is the easier task. It's what you do with that extra light that matters. Uncontrolled bright light is not ideal for driving and can create dangerous glare. Fitted with SafeBeam technology, Philips LED headlights concentrate light where you need it. The uniform and accurate beam pattern is designed according to road safety regulations for halogen headlights. With more precise control of light, you have greater visibility, making you a better and safer night-time driver.

For projector headlights

The Philips X-tremeUltinon LED lights are designed specifically for complex projector headlights. At the same time they provide extra boost when used in reflector luminaires

and therefore serve you in a wide variety of car models, regardless of your luminaire.

Enjoy a lifetime of light

You want bright and stylish headlights. But you don't want to keep replacing failed bulbs. That's a major weakness of conventional headlights: the more powerful the light, the shorter its lifespan. At a higher light intensity level, LEDs last much longer, and Philips X-treme Ultinon LED products show superior durability. Features such as AirFlux and AirCool heat management systems mean that they last up to 12 years. With most cars replaced or upgraded within that time, your stylish new headlights should last you the lifetime of your car.

Longer-lasting headlight bulbs

LED headlight bulbs generate heat that needs controlling. Philips AirFlux and AirCool technologies are a smart cooling system that diverts heat away from the light's critical components. By increasing heat resistance, Philips LED headlights last longer than other comparable products currently on the market. But durable lights are not just about convenience and value for money; they're also about safety. You don't want your lights to fail while in use. With Philips LED lights you can drive in total serenity.

Specifications

Packaging Data

- Packaging type: X2
- EAN1: 8727900397451
- EAN3: 8727900397468

Product description

- Technology: LED
- Application: High beam, Low beam
- Range: X-tremeUltinon LED
- Type: H7
- Homologation ECE: NO
- Base: PX26d
- Designation LED Type: LED-HL [~H7]
- Technical features: AirCool, SafeBeam

Electrical characteristics

- Wattage: 25 W
- Voltage: 12 V

Marketing specifications

- Expected benefits: Advanced automotive system
- Product highlight: Brighter, Stronger, Whiter

Light characteristics

- Colour temperature: Up to 6500 K
- Lumens: 1760

Ordering information

- Order entry: 12985BWx2
- Ordering code: 39745128

Outer pack information

- Height: 20 cm
- Length: 38.1 cm
- Width: 16 cm
- Gross weight per piece: 3.2 kg

Packed product information

- Gross weight per piece: 426 g
- Height: 6 cm
- Length: 18 cm
- Net weight per piece: 107 g
- Width: 15 cm
- MOQ (for professionals): 12

Lifetime

- Life time: Up to 12 years

Issue date 2019-06-03

Version: 14.3.1
