Full performance, smart cleaning

A clean home reassured via your smart phone

The Philips SmartPro Active robot vacuum cleaner with an intuitive App ensures your home is clean and gives you control from anywhere. Thanks to the TriActive XL nozzle with extra-large width, your robot cleans 2 times faster.

Cleans on its own

- Powerful Li-Ion battery for 120 min operating time
- Automatically returns to dock to recharge
- Smart Detection System adapts cleaning to any environment

Thorough cleaning performance

- 3-step cleaning system including dry mopping function
- 4 cleaning modes to adapt to different areas
- The robot detects the most dirty areas for a deeper clean
- TriActive XL nozzle for thorough clean, now 2 times faster*
- TURBO suction mode for intensive cleaning

Get feedback and control via smart APP

- Easy customization of the cleaning experience
- Free SmartPro App
- Instant feedback on cleaning status and maintenance
- Smart and advanced control, even away from home

PHILIPS

Highlights

3-step cleaning system

First two long brushes swipe dirt and dust into the path of the robot. Then, the nozzle picks up dirt and dust thanks to its powerful motor. Lastly, the click-on mopping pad enhances the cleaning by collecting even the finest dust from your floors.

4 cleaning modes

4 cleaning modes to adapt to different areas in your home. The z-type mode drives the robot in a parallel zig-zag pattern, when it discovers a relatively larger space. The bounce mode drives the robot in a straight line, when it bumps into an object the robot will choose another random direction. With the spiral mode the robot moves in a spiral motion with an increasing radius. The wall-following mode drives the robot to clean while staying close and parallel to the wall.

Dust Sensor

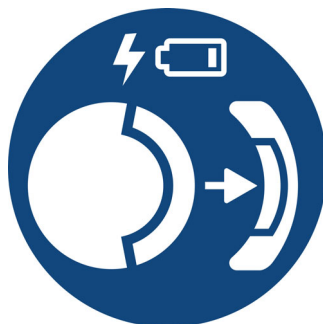

The dust sensor feature enables the robot to automatically recognize the areas where most dust is accumulated, so it stays in that area for a few seconds more to have a deeper cleaning.

Powerful Li-Ion battery

The powerful Lithium-Ion battery has a longer lifetime and a shorter charging time than standard batteries. The new robot vacuum cleaner runs up to 120 min.

Auto-return to docking station

When the battery of the Philips robot vacuum cleaner is almost empty, it will automatically go to the docking station to charge itself, so it will get ready for its next cleaning session.

to the docking station to charge itself, so it will get ready for its next cleaning session.

Your customised clean

Every home is different, the Philips SmartPro App lets you tailor the cleaning process to fully fit your needs. You can set the size of the room, the intensity of clean, the cleaning pattern the robot will follow and whether you need a dry mop for fine dust. Based on your choices the App will plan the duration of your custom clean.

Free SmartPro App

The Philips SmartPro App allows you to easily operate the new Philips Robotic Vacuum cleaner, and connects to the SmartPro App via WiFi. This App is compatible on both Android and iOS operating systems.

Instant feedback

The Philips SmartPro App will help you to monitor cleaning progress and provide instant feedback. We will also provide you tips and tricks to ensure a great maintenance of the robot over time. In addition, the App will provide you with details about your last cleaning statistics.

Control from everywhere

The Philips SmartPro App enables you to control the robot even when you are away from home. You can schedule your next cleaning session at any time, from anywhere. You will be always aware what the robot does at any moment in time, and it will notify you about the cleaning status and any issues to reassure your house is clean.

TriActive XL nozzle

TriActive XL nozzle offers you efficient and thorough cleaning performance, now 2 times faster due to: 1. Extra-wide nozzle covers twice as much floor area in one stroke. 2. The three suction inlets collect dust from front and both sides. 3. The flexible strip collects any dust left behind.

TURBO suction mode

High-power suction mode for even more intensive cleaning.

Specifications

Performance

- Battery type: Li-Ion
- Battery voltage: 14.8 V
- Charging time: 4 hour(s)
- Runtime: 120 minute(s)
- Sound power level: 63.4 dB
- Vacuum (max): 1.764 kPa

Usability

- Cleaning modes: 4
- WiFi connected: Philips FREE SmartPro Active App
- Infrared sensors
- Sensors: 25
- Weekly scheduling
- Types of Floors: Carpet, Hardfloor
- Dirt sensor
