Highlights

Less colic

Our clinically proven Airflex venting system is designed to reduce wind and colic. As your baby feeds, the valve integrated into the teat flexes to allow air into the bottle to prevent vacuum build up and vents it towards the back of the bottle. It keeps air in the bottle and away from baby's tummy to help reduce wind, spit-up and burping.

Less fussing

Philips Avent Classic+ bottle reduces fussing. Babies fed with Philips Avent Classic+ bottles experienced 60% less fussing at night, than babies fed with a competitor's anti-colic bottle.*

Uninterrupted feeding

The teat shape allows secure latch and the ribbed texture helps prevent teat collapse for uninterrupted, comfortable feeding.

Leak-free design

Our Classic+ bottle is designed to prevent leakage whilst feeding, for a truly enjoyable feeding experience.

Easy to assemble and clean

With only 4 parts, a wide bottle neck, and rounded corners, our bottle is easy to quickly assemble and clean thoroughly. Have peace of mind that your bottle is truly clean in no time.

Easy to hold

The unique bottle shape makes this bottle easy to hold and grip in any direction.

First step to a drinking cup

With the trainer cup, your baby will be able to hold the bottle independently while drinking from the familiar teat.

Orthodontic Soother

Flat, drop-shaped symmetrical teats respect the natural development of your baby's palate, teeth and gums, even if the soother ends up upside-down in the mouth.

BPA free*

The Philips Avent Classic+ feeding bottle is made of BPA free* material (polypropylene).

Compatibility across the range

The Philips Avent Classic+ bottle is compatible with the Philips Avent range, excluding Natural bottles and cup handles. We advise to use the Classic+ bottles with Classic+ feeding nipples only.

Specifications

Country of origin

- England

What is included
