- Full HD 3D for a truly immersive 3D movie playback
- Enjoy HD content in 4K UHD with a 4K upscaling engine
- Expanding the possibilities of visual perception
- Higher peak bitrate ensures more detail in fast action scene
- Experience television in vivid colorful glory
- 4K Ultra HD performance for years of worry free enjoyment

[Hear more](#)

- Dolby Audio for the ultimate movie experience

- DTS2.0 Digital Out
- Discrete HDMI output for connecting to legacy audio receiver

[Engage more](#)

- Enhanced Accessibility enabled product

[Play all your movies and music](#)

- Easily enjoy local media from you home network

PHILIPS

Features

4K Upscaling

Your Standard Definition and High Definition videos have never looked better. 4K upscaling processor delivers images that are crystal clear. Movies in standard definition and high definition can now be enjoyed in 4K Ultra HD, ensuring more details and more true-to-life pictures.

High Dynamic Range 4K BDP

High Dynamic Range technology in Blu-ray Players when connected to a compatible 4K HDR television lets you experience more detail and captivating colors for an even more engaging television experience. More perceivable shades of blacks, whites and all other colors. This boils down to greater perceived brightness and contrast with darker shadows creating a breathtaking image.

Higher peak bitrate 4K BDP

4K Blu-ray format supports more than twice the peak bitrate of 2K Blu-ray which comes in especially handy when watching action movies which have fast paced scenes with a lot of detail. The 100 Mbps peak bitrate of 4K Blu-ray

provides enough headroom to store the extra data required to encode high detail fast action scenes and avoid block artifacts.

Wide Color Gamut (BT.2020)

Wide Color Gamut televisions with BT.2020 video input support, reproduce rich colors almost twice as saturated as a standard television, which look more vivid and life-like to enhance the TV viewing experience.

Enhanced Accessibility

Enhanced Accessibility enabled products provide a more user friendly experience for visually and hearing impaired people to enjoy Philips televisions and home video players. With features such as a voice guide menu, easy to read and navigate user interface, raised guide dots on key remote control buttons and large format support information so visually impaired people can reach customer care; Philips cares about accessibility and wants everyone to enjoy television.

4K Ultra HD BDP

With a 4K Ultra HD platform the ground up you can rest assured that your 4K Ultra HD Blu-ray player will work flawlessly with other 4K display devices for years to come. Featuring HDMI 2.0/2.0a with HDCP 2.2, your 4K Ultra HD Blu-ray player is built to output glorious 4K HDR content to the latest 4K HDR TVs from 4K HDR Blu-ray discs.
