

# HP Jet Fusion 3D 4210 Printing Solution

Accelerate your business' transformation  
to industrial-scale 3D manufacturing

## Unlock 3D manufacturing-scale economics with the HP Jet Fusion 3D 4210 Printing Solution. Start producing engineering-grade parts—now at up to 65% lower cost<sup>1</sup> and up to 10 times faster.<sup>2</sup>

### Breakthrough economics for production runs<sup>1</sup>

- Achieve up to 65% lower cost-per-part<sup>1</sup>—high-volume 3D production is now truly economically viable.
- Discover a world of new high-volume applications, made possible with HP Multi Jet Fusion technology.
- Best balance between economics and part quality, with industry-leading surplus powder reusability.<sup>3</sup>

### Superior,<sup>4</sup> consistent part quality

- Get excellent dimensional accuracy and fine detail,<sup>4</sup> enabled by HP's unique multi-agent printing process.
- Produce truly functional parts with optimal mechanical properties<sup>5</sup>—up to 10 times faster.<sup>2</sup>
- Predictable and reliable final printed parts that match your design.<sup>4</sup>
- Access new future materials and applications with the HP Multi Jet Fusion Open Platform.

### Breakthrough productivity for manufacturing environments

- Produce more parts per day with continuous printing, fast cooling<sup>6</sup>—add parts while printing for urgent jobs.
- Experience enhanced performance thanks to a higher disk capacity and additional memory.
- Cleaner experience with an enclosed processing station and materials not classified as hazardous.<sup>7</sup>
- Plan production times more predictably, and rely on HP Jet Fusion 3D Solution Services to maximize uptime.

### HP Jet Fusion 3D 4210 Printing Solution

Ideal for manufacturing environments producing 600-1000 parts per week\*

Image shows the HP Jet Fusion 3D 4200 Printing Solution

\*Assuming 220 working days of 30 cm<sup>3</sup> parts at 10% packing density on Balanced print mode using HP 3D High Reusability PA 12 material, and up to 80% powder reusability ratio.

# Technical specifications<sup>14</sup>

## HP Jet Fusion 3D 4210 Printer

<b>Printer performance</b>	Technology	HP Multi Jet Fusion technology
	Effective building volume	380 x 284 x 380 mm (15 x 11.2 x 15 in)
	Building speed	4115 cm <sup>3</sup> /hr (251 in <sup>3</sup> /hr) <sup>15</sup>
	Layer thickness	0.08 mm (0.003 in)
	Print resolution (x, y)	1200 dpi
<b>Dimensions (w x d x h)</b>	Printer	2210 x 1200 x 1448 mm (87 x 47 x 57 in)
	Shipping	2300 x 1325 x 2068 mm (91 x 52 x 81 in)
	Operating area	3700 x 3700 x 2500 mm (146 x 146 x 99 in)
<b>Weight</b>	Printer	750 kg (1653 lb)
	Shipping	945 kg (2083 lb)
<b>Network<sup>16</sup></b>	Gigabit Ethernet (10/100/1000Base-T), supporting the following standards: TCP/IP, DHCP (IPv4 only), TLS/SSL	
<b>Hard disk</b>	HDD 1TB (AES-256 encrypted, disk wipe DoD 5520M) & SSD 500GB (AES-256 encrypted)	
<b>Software</b>	Included software	HP SmartStream 3D Build Manager, HP SmartStream 3D Command Center
	Supported file formats	3MF, STL, OBJ, and VRML (v2.0)
	Certified third-party software	Autodesk® Netfabb® Engine for HP, Materialise Magics with Materialise Build Processor for HP Multi Jet Fusion, Siemens NX AM for HP Multi Jet Fusion
<b>Power</b>	Consumption	9 to 11 kW (typical)
	Requirements	Input voltage three phase 380-415 V (line-to-line), 30 A max, 50/60 Hz / 200-240 V (line-to-line), 48 A max, 50/60Hz
<b>Certification</b>	Safety	IEC 60950-1+A1+A2 compliant; United States and Canada (UL listed); EU (LVD and MD compliant, EN 60950-1, EN 12100-1, EN 60204-1, and EN 1010)
	Electromagnetic	Compliant with Class A requirements, including: USA (FCC rules), Canada (ICES), EU (EMC Directive), Australia (ACMA), New Zealand (RSM)
	Environmental	REACH
<b>Warranty &amp; Service coverage included</b>	One-year limited hardware warranty	

Dynamic security enabled printer. Only intended to be used with cartridges using an HP original chip. Cartridges using a non-HP chip may not work, and those that work today may not work in the future. More at: [hp.com/go/learnaboutsupplies](http://hp.com/go/learnaboutsupplies).

## HP Jet Fusion 4210 Processing Station with Fast Cooling<sup>6</sup>

<b>Features</b>	Automated mixing, sieving, and loading; semi-manual unpacking; fast cooling; <sup>6</sup> external storage tank	
<b>Dimensions (w x d x h)</b>	Processing station with fast cooling <sup>6</sup>	2990 x 934 x 2400 mm (117.7 x 36.8 x 94.5 in)
	Shipping	3499 x 1176 x 2180 mm (137.8 x 46.3 x 85.8 in)
	Operating area	3190 x 2434 x 2500 mm (125.6 x 95.8 x 99 in)
<b>Weight</b>	Processing station with fast cooling <sup>6</sup>	480 kg (1058 lb)
	Loaded	810 kg (1786 lb)
	Shipping	620 kg (1367 lb)
<b>Power</b>	Consumption	2.6 kW (typical)
	Requirements	Input voltage single phase 200-240 V (line-to-line), 19 A max, 50/60Hz or 220 - 240 V (line-to-neutral), 14 A max, 50Hz
<b>Certification</b>	Safety	UL 2011, UL508A, NFPA, C22.2 NO. 13-14 compliant; United States and Canada (UL listed); EU (MD compliant, EN 60204-1, EN 12100-1 and EN 1010)
	Electromagnetic	Compliant with Class A requirements, including: USA (FCC rules), Canada (ICES), EU (EMC Directive), Australia (ACMA), New Zealand (RSM)
	Environmental	REACH
<b>Warranty &amp; Service coverage included</b>	One-year limited hardware warranty	

### Eco Highlights

- Powders and agents are not classified as hazardous<sup>7</sup>
- Cleaner, more comfortable workplace—enclosed printing system, and automatic powder management<sup>7</sup>
- Minimizes waste due to industry-leading reusability of powder<sup>17</sup>
- Take-back program for printheads<sup>18</sup>

For more information, please visit  
[hp.com/go/JetFusion3DSolutions](http://hp.com/go/JetFusion3DSolutions)

- Based on internal testing and public data, HP Jet Fusion 3D 4210 Printing Solution average printing cost-per-part is 65% lower versus the average cost of comparable fused deposition modeling (FDM) and selective laser sintering (SLS) printer solutions from \$100,000 USD to \$300,000 USD on market as of April, 2016 and is 50% lower versus the average cost of comparable SLS printer solutions for \$300,000 USD to \$450,000 USD. Cost analysis based on: standard solution configuration price, supplies price, and maintenance costs recommended by manufacturer. Cost criteria: printing 1.4 full build chambers of parts per day/5 days per week over 1 year of 30 cm<sup>3</sup> parts at 10% packing density on fast print mode under certain build conditions and part geometries using HP 3D High Reusability PA 12 material, and the powder reusability ratio recommended by manufacturer.
- Based on internal testing and simulation, HP Jet Fusion 3D average printing time is up to 10 times faster than average printing time of comparable fused deposition modeling (FDM) and selective laser sintering (SLS) printer solutions from \$100,000 USD to \$300,000 USD on market as of April, 2016. Testing variables for the HP Jet Fusion 4210/4200 Printing Solutions: Part quantity: 1 full build chamber of parts from HP Jet Fusion 3D at 20% of packing density versus same number of parts on above-mentioned competitive devices; Part size: 30 cm<sup>3</sup>; Layer thickness: 0.08 mm/0.003 inches.
- Industry-leading surplus powder reusability based on using HP 3D High Reusability PA 12 at recommended packing densities and compared to selective laser sintering (SLS) technology, offers excellent reusability without sacrificing mechanical performance. Tested according to ASTM D638, ASTM D256, ASTM D790, and ASTM D648 and using a 3D scanner for dimensional accuracy. Testing monitored using statistical process controls.
- Based on HP's unique multi-agent printing process. Excellent dimensional accuracy and fine detail within allowable margin of error. Based on dimensional accuracy of ±0.2 mm/0.008 inches on XY for hollow parts below 100 mm/3.94 inches and ±0.2% for hollow parts over 100 mm/3.94 inches, using HP 3D High Reusability PA 12 material, measured after sandblasting. See [hp.com/go/3Dmaterials](http://hp.com/go/3Dmaterials) for more information on materials specifications.
- Based on the following mechanical properties: Tensile strength at 48 MPa (XYZ), Modulus at 1700 -1800 MPa (XYZ), ASTM standard tests with HP 3D High Reusability PA 12 material. See [hp.com/go/3Dmaterials](http://hp.com/go/3Dmaterials) for more information on materials specifications.
- Fast Cooling is enabled by HP Jet Fusion 3D Processing Station with Fast Cooling and is recommended only for HP 3D High Reusability PA 12 and HP 3D High Reusability PA 12 Glass Beads. HP Jet Fusion 3D Processing Station with Fast Cooling accelerates parts cooling time vs recommended manufacturer time of selective laser sintering (SLS) printer solutions from \$100,000 USD to \$450,000 USD, as tested in April, 2016. Fused deposition modeling (FDM) not applicable. Continuous printing requires an additional HP Jet Fusion 3D build unit (standard printer configuration includes one HP Jet Fusion 3D build unit).
- Compared to manual print retrieval process used by other powder-based technologies. The term "cleaner" does not refer to any indoor air quality requirements and/or consider related air quality regulations or testing that may be applicable. The HP powder and agents do not meet the criteria for classification as hazardous according to Regulation (EC) 1272/2008 as amended.
- This SKU is only available for the HP Jet Fusion 3D 4210B Printing Solution.
- This product number is sold directly by HP.
- This product is only available in Europe and in the Americas.
- Liters refers to the materials container size and not the actual materials volume. Materials are measured in kilograms.
- Additional material management equipment is required.
- Available during the second half of 2019.
- For latest technical specifications, please visit [hp.com/go/3DPrint](http://hp.com/go/3DPrint).
- Based on 0.08-mm (0.003-in) layer thickness and 7.55 sec/layer.
- The HP Jet Fusion 3D Printing Solution should be connected to the HP Cloud in order to enable the correct functioning of the printer and to offer better support.
- Compared to PA 12 and PA 11 materials available as of June, 2017. HP Jet Fusion 3D Printing Solutions using HP 3D High Reusability PA 12 provide up to 80% post-production surplus powder reusability and HP Jet Fusion 3D Printing Solutions using HP 3D High Reusability PA 11 provide up to 70% post-production surplus powder reusability, producing functional parts batch after batch.
- Printing supplies eligible for recycling vary by printer. Visit [hp.com/recycle](http://hp.com/recycle) to see how to participate and for HP Planet Partners program availability; program may not be available in your area. Where this program is not available, and for other consumables not included in the program, consult your local waste authorities on appropriate disposal.
