LIFEBOOK E5 Series

LIFEBOOK E7 Series

Ultimate flexibility

IT administrators have to balance the constraints of time and budget with demands from business users for greater mobile flexibility. With the family concept of the LIFEBOOK E5 and LIFEBOOK E7 Series, enterprises can keep complexity out of the hardware landscape – and deliver performance and choice to users.

Raise efficiency by sharing accessories and components

Accessories and the port replicator are shareable across all the LIFEBOOK E notebooks. Moreover, with the devices in each family sharing the same BIOS, mainboard and drivers, the hardware is much easier to roll out and manage, and also much simpler to use. For instance, the ability to use the same replicator saves time and money

for both users and the business. This greatly eases the move to “hot desking”, where users take any free desk when they arrive at the office.

Learn once - apply time and again

Instead of dealing with a plethora of system setups, administrators need only know their way around one. This reduces TCO for the company, but without forcing mobile business professionals to compromise on business features and performance.

Extensive customizing

Built for professionals, these notebooks feature extensive configuration options and distinctive solutions such as made4you and DeskView Load, enabling enterprises to customize the hardware, software and rollout of LIFEBOOK notebooks for maximum flexibility and ease of use.

- Reduce complexity in the hardware landscape with the family concept
- Manage hardware more easily with shared components
- Reduce TCO with a smarter and leaner IT landscape
- Retain choices for users on business features and performance
- Benefit from extensive customizing with FUJITSU made4you

Maximum compatibility Powerful add-ons to enhance your mobility

Port Replicator

Common port replicator across the LIFEBOOK E Series, supporting five different models.

Order No: S26391-F1337-L109

User Exchangeable Battery Options

FUJITSU

Great partners for your flexible business

The FUJITSU LIFEBOOK E Series notebooks give your enterprise the flexibility to equip mobile professionals with the right devices they need for their job, without compromising on business features and exploding TCOs.

A choice of display sizes and weights within each family, power-packed performance, and superior security features to protect your data, combined with smart sharing options for port replicator and modular bay accessories. All of which helps your company make the most of its IT budget.

The LIFEBOOK E5 and LIFEBOOK E7 Series notebooks share components such as the primary battery, modular bay elements, port replicator and keyboard layout. Within each family, the notebooks share a common mainboard, BIOS, drivers and bit image for fast and effortless roll-out and integration.

FUJITSU LIFEBOOK E5 Series

Are you planning to equip your staff with reliable mobile performers for daily business activities? Then look no further; the LIFEBOOK E5 Series combines extensive business feature-sets at a competitive price. The E5 Series offers a choice of two display sizes –14.0-inch and 15.6-inch – and three different high-capacity battery packs. The LIFEBOOK E546/ E547 and the LIFEBOOK E556/ E557, with all the advantages of a family concept, are easy to manage and simple to use. Furthermore, the LIFEBOOK E556/ E557 offers a native serial port RS-232 option which enables a direct connection to existing equipment without adapters.
