

MPN: MDPMDPF

Mini DisplayPort 1.2 to DisplayPort Adapter

The Mini DisplayPort to DisplayPort (M-F) adapter, MDPMDPF, provides a seamless connection between devices with Mini DisplayPort outputs and displays or cables with DisplayPort inputs. This adapter is ideal for users needing to connect Macbooks, laptops, or other devices with Mini DisplayPort to standard DisplayPort monitors or projectors. Offering a reliable and high-quality connection, this adapter ensures optimal video and audio transmission. Its compact design makes it perfect for travel or desktop use. As with all MicroConnect products, this adapter is built to European quality standards, ensuring dependable performance and longevity. Trust MicroConnect for pioneering connectivity solutions, backed by over 20 years of industry expertise.

- Max Resolution: 4K 30Hz (3840*2160)
