Fujitsu VDI Bundles M for Citrix® VDI-in-a-Box™

VDI at its Simplest

Fujitsu VDI Bundles M for Citrix® VDI-in-a-Box™

Companies looking for the easiest way to create a virtual desktop infrastructure (VDI) find the answer with Fujitsu VDI Bundles. They come with readily prepared hardware to meet your company's infrastructural needs, as determined e.g. by your company's size.

Fujitsu VDI Bundles, which are perfectly designed for Citrix® VDI-in-a-Box™, contain either a pre-configured and pre-sized tower or rack server depending on which suits your office environment best. Either the PRIMERGY TX200 S7 or PRIMERGY RX200 S7 can each run 42 to 84 cost-efficient virtual desktops using your preferred hypervisor. Thereby it doesn't matter whether you want to start VDI from scratch or use your existing network infrastructure as a basis. A server grid can be built to host your individual number of virtual machines. Both the hardware and software are designed to grow with your business, leaving you with the opportunity to increase the number of virtual desktops you have easily in the future.
