- 0.3MP front camera for selfies and video chats
- 2MP rear camera for crystal clear photos and videos

### Powerful and universal Android OS

- Android OS for familiar experience with many apps

**PHILIPS**

# Highlights

## SoftBlue Technology

Studies have shown that just as ultra-violet rays can cause eye damage, blue light rays from LED displays can cause eye damage and affect vision over time. SoftBlue LED technology uses a smart technology to reduce the harmful blue light waves without affecting the color or image of the display. SoftBlue LED technology is certified by international testing organizations SGS Labs and TUV Rheinland to reduce harmful blue light.

## IPS display

With a crystal-clear IPS display, images and text look brilliant and clear from every angle.

## Quad-core performance

Your Philips tablet is even more powerful with its quad-core processor. This powerhouse keeps up easily with your multitasking demands. Seamlessly load web pages and enjoy uninterrupted videos. Gaming is immersive with exceptional picture quality.

## Expandable storage

In addition to the included storage the Philips tablet offers flexibility to quickly expand your storage and easily swap out memory with a Micro SD card.

## Miracast sharing

With Miracast technology you can wirelessly share your content from your tablet to your

larger Miracast enabled display in video quality and 5.1-channel audio.

## Front and rear cameras

Bring yourself to the forefront of fun shots with the front and rear cameras in your Philips tablet. Besides allowing you to take self-portraits, the front-facing camera also means that you can engage in face-to-face video calls with friends or colleagues. The rear camera allows you to capture life's fleeting moments in crystal clear quality and send them to friends and family. A built-in flash means that you can take great photos even in dim light so you can capture that perfect moment, night or day.

## Android OS

Android is the customizable, easy to use operating system that powers more than a billion devices across the globe. Because it's so universal, Android works perfectly with your favorite apps. Android is also customized by you, for you. Put the stuff you care about right on your home screen: the latest news, weather, or a stream of your recent photos.
