

<b>Product</b>	PC Chassis
<b>M/B support</b>	mATX/ ATX
<b>Color</b>	Black

**UC-02B ...the slim ATX Tower** That it is possible to offer a state-of-the-art and technically advanced ATX Tower at a highly competitive cost has been proven beyond every reasonable doubt by the new UC-02B chassis from CHIEFTEC. The Tower, not being overloaded with frills and uncalled-for features, sets a new accent in the ATX Tower without appearing bulky. On the interior, the chassis offers enough space for an ATX board of the latest generation and a standard PS II type PSU. The cooling concept is well thought through and can be optionally fitted with two 60mm and/or 120mm fans respectively.

### Features

### Technical Data
