Highlights

Say goodbye to plaque

And thanks to its flexible design, it removes up to 10x more plaque from hard-to-reach areas* for a truly deep clean along the gum line and between teeth.

Focus on gum health

With the Philips Sonicare Premium Gum Care brush head, even the deepest clean is gentle. As your toothbrush moves along the gum line, Premium Gum Care's flexible sides and bristles absorb any excess pressure so your gums are protected, even if you brush too hard. Bristles work hard to remove plaque and bacteria along the gum line helping to improve gum health. Thanks to this brush head's curved design, you can be sure of maximized bristle contact.

Whiter teeth, fast

Dense bristles packed into the center of the Philips Sonicare Premium White brush head

work hard to remove plaque, and everyday surface stains from food and drinks. Flexing sides let bristles contour to the unique shape of your teeth and gums for deep cleaning and a brighter smile in just 3 days.

BrushSync mode-pairing

You'll always get the best possible clean with our BrushSync™ mode-pairing feature****. The Premium brush heads sync with your BrushSync™ enabled Philips Sonicare toothbrush handle****, selecting the optimal brushing mode and intensity level for exceptional cleaning, whitening and gum care. All you need to do is start brushing.

Adaptive cleaning technology

You get a personalized clean every time you brush with our adaptive cleaning technology. Soft, flexible rubber sides let the Premium Plaque Control, Premium Gum Care and Premium White adapt to the unique contours of your mouth. Our bristles adjust to your gums and teeth, giving you up to 4x more surface contact** than a regular brush head for deeper cleaning, even in hard to reach spots. The adaptive cleaning technology also allows gentle tracking along the gumline and absorb excessive brushing pressure, and enables an

enhanced sweeping motion for a unique in-mouth feel and superior cleaning.

Philips Sonicare technology

Your Sonicare brush head and handle are the ultimate team. Enhancing our sonic technology, they give you unrivaled cleaning. High-speed vibrations in your toothbrush handle power up to 31,000 brush strokes per minute that whip up your toothpaste into plaque fighting bubbles, driving them deep between your teeth and along the gum line for exceptional cleaning.

Brush head replacement cues

Brush heads become less effective after 3 months of use, but with BrushSync™ you'll be reminded before this happens. Your smart toothbrush will track how often and how hard you brush, and will notify you when it's time for a replacement. Don't have a smart Philips Sonicare toothbrush? Just monitor your blue replacement bristles, and when they turn white you'll know it's time for a fresh brush head.
