Introduction

Operation System Requirements

For PC

System Requirements:
Microsoft Windows XP
Microsoft Windows Vista
Microsoft Windows 7
Microsoft Windows 8
Microsoft Windows 10
Mac OS

For iOS

System Requirements:
iOS 8.0 or higer
Works with all Apple devices with 8 pin lightning connector, such as iPhone 5, iPhone 5C, iPhone 5S, iPhone 6, iPhone 6 Plus,iPhone 6s, iPhone 6s plus, iPhone SE, iPhone 7, iPhone 7 Plus, iPad Air ™, iPad mini ™, iPad with Retina display and newer.

Specifications

Interface: Lightning and USB 3.0 connectors

Available in: 32GB, 64GB and 128GB

Dimensions: 20mm x 55mm x 6.80mm

Battery: No need to charge. Plug and play.

Important notice:

The default file format of V drive is FAT32.

Also it supports exFAT. Please format to exFAT via your computer if you need to transfer individual files larger than 4GB.

App Overview-Main Interface

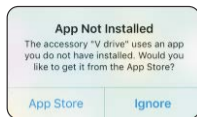

Getting Started

1. Connecting to iPhone/iPad : Plug in your drive into the iPhone/ iPad.

Tips: V drive with 2mm extended lightning connector, which fits well into phone cases with normal thickness(except for Otterbox, LifeProof, Unicorn Beetle, Waterproof cases). To ensure the best connection, it will be suggested to remove case.

2. Installing the app

When you plug the drive into your iPhone or iPad, you'll be prompted to install the companion V drive app.

3. If this does not occur, please make sure the drive is fully inserted. On the screen, select "App Store" and search for V drive.

4. Install the V drive app from the App Store.

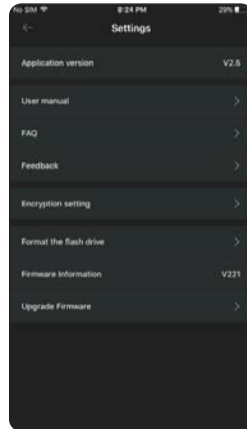

V drive Main Interface

1. Setting button is on the top right corner. It includes "Application Version", "User Manual", "FAQ", "Feedback", "Encryption Settings", "Format the flash drive", "Firmware Version", "Upgrade Firmware".
2. Storage Bar on the upper half indicates the Available Capacity/ Total Capacity of iPhone and V drive
3. The 4 main function buttons on the bottom half: Multi-Media; File Management; File Transfer; One Touch Backup.
 - A) Multi-Media: Take photos, Record Videos and Record Audios. Files will be saved in the flash drive directly;
 - B) File Management: View and manage files in the flash drive;
 - C) File Transfer: Transfer files from photo album to V drive or from V drive to iPhone/iPad;
 - D) One Touch Backup: One key back up all selected files into the flash drive including contacts, images, audios and videos.

App Overview-Major Functions

Settings

1. Application Version: The App version;
2. User manual: A quick guide to V drive;
3. FAQ: Frequently asked questions;
4. Feedback: Send feedback to us;
5. Encryption Settings: set encryption password;
6. Format the flash drive: Set the flash drive to its factory condition. All files in it will be removed;
7. Firmware Information;
8. Upgrade Firmware

Encryption Settings: set encryption password.

Please note:

- A) The password set in the App is only for the Encryption and decryption of files.
- B) Encryption can only be used to one individual file (photo/ video/ document) in V drive. It is not applicable to encrypt the whole flash drive or a folder.
- C) After the password is set, it will need your touch ID to encrypt and decrypt.

Encryption and Decryption

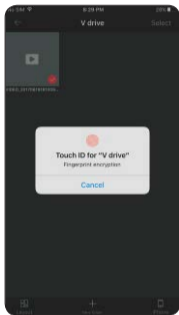

1. Set the password & Touch ID.

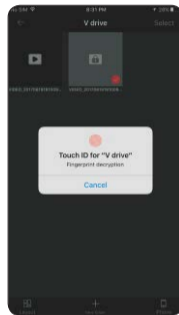

2. Long press for the file you want to encrypt, then select "Encrypt".

3. Use Touch ID to encrypt.

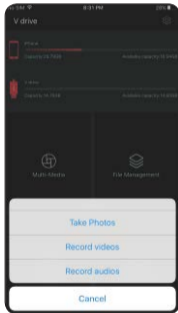

4. Short press the file that has been encrypted; then use Touch ID to decrypt.

Multi-Media

1. Click Multi-Media, below is the interface:

2. Choose the function you want to use. Eg, select Take Photo.
3. Allow the access to your Camera and Microphone.

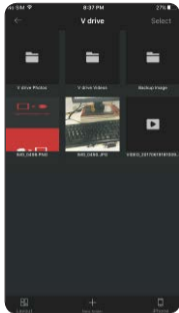

4. Take a photo and you can view it in the bottom left corner.

Tips: All files in multi-media are stored in V drive and won't occupy iPhone storage.

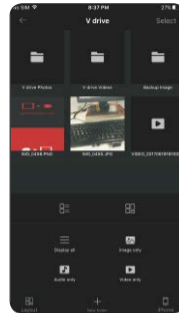

File Management

Use V drive app to transfer and manage files between your iPhone, iPad, PC and Mac computer.

Layout: Choose to display files as list layout or block layout;

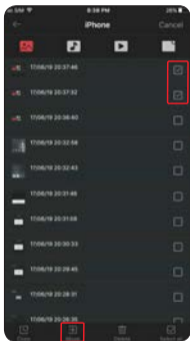

Choose 4 types of files: Display all, Image only, Audio only, or Video only.

Transfer files from your iPhone or iPad to the drive :

1. Connect the Flash Drive to your iPhone/iPad.
