Highlights

15 different coffee drinks

Enjoy unlimited variety, from espresso and cappuccino specialty coffee drinks like Americanos and Flat Whites. So you can serve everyone the drink they prefer.

Touchscreen Coffee Equalizer™

Intuitively adjust the characteristics of your drinks via the touch screen thanks to the Coffee Equalizer™: you can customise the strength, volume, temperature and taste of coffee, the milk foam amount and volume, and even the coffee and milk order. Craft your coffee the way you prefer.

Adjustable Ceramic Grinder

Our adjustable grinders are made of ceramic, which ensures long-lasting performance without deterioration. This means your coffee will be always ground like the first time, delivering the best from your fresh beans for up to 20.000 cups. Fine-tune coffee richness with the 12 different grinder settings.

AquaClean filter

AquaClean is our patented water filter, designed to improve the quality of your coffee by purifying water. It also prevents scale build-up in the water circuit of your coffee machine: make up to 5000* cups without descaling by replacing the filter regularly.

Automatic milk system cleaning

The HygieSteam function will clean up the whole milk circuit with steam, from the spout to the milk tubes, at your command. In addition, each time you make a drink with milk, Saeco Xelsis automatically cleans the milk system with a jet of hygienic steam, so it is clean and ready to make your next drink.

6 customizable user profiles

Everyone's favorites – and personalized settings – can be stored in up to 6 user profiles directly via the colour touchscreen display.

LatteDuo function

Create your favorite coffee drinks, including Cappuccinos and Latte macchiatos in single or double servings, all with just one touch.

Fully removable brewing group

The internal brewing group is easy to remove, and rinses clean in seconds. So the core of your Saeco Xelsis is always ready to make superior coffee.

Easy cleaning and maintenance

With just three clicks, Saeco Xelsis starts the cleaning process it needs to keep on making excellent coffees and beverages for you.
