# Data Sheet FUJITSU Storage ETERNUS DX100 S4 Hybrid System

The all-in-one storage system for SMBs or subsidiaries

#### ETERNUS DX - Business-centric Storage

FUJITSU Storage ETERNUS DX S4 is the perfect hybrid storage for SMB, something every business can afford, with integrated and powerful features for business growth, efficiency and continuity. Latest capacity and performance optimization capabilities contribute to comprehensive business efficiency. Outstanding data-safe technologies and all-inclusive encryption guarantee uncompromised business continuity

#### **ETERNUS DX100 S4**

The scalable and unified Fujitsu Storage ETERNUS DX100 S4 delivers enterprise-class functionality to small and medium-sized companies and subsidiaries with an excellent price/performance ratio. It is the perfect solution when consolidating data for server virtualization, e-mail, databases and business applications as well as centralized file services. Simple, intuitive system management, highly flexible connectivity, granular scalability and the option to upgrade to a higher system significantly reduce operational and migration costs. The ETERNUS DX family architecture lets customers benefit from software options, such as thin provisioning, automatic storage tiering, transparent failover and quality of service management even as early as the entry-level class. This all contributes to better business support and guarantees continuity and efficiency in daily operations.

# Features & Benefits

| Maia Fastures                         | Depofile  |
|---------------------------------------|---|
| Main Features                         | Benefits  |
| Maximum utilization and consolidation |   |
|                                       | Comprehensive scalability ready for future needs                                |
|                                       | Outstanding benchmark results with ultra-low latency                            |
|                                       | Unified SAN and NAS access drive system utilization improving ROI               |
|                                       | Flexible combination of flash and disk media for a broader scope of deployments |
|                                       | ETERNUS SF Express management suite included at no extra cost                   |
| Business Continuity around the clock  |   |
| ,                                     | Replication and Storage Cluster to avoid planned or unplanned<br>downtimes      |
|                                       | Transparent failover for 100% data insurance and non-stop<br>operations         |
|                                       | Intelligent snapshot functionality for backup                                   |
|                                       | System availability of 99.9999%   |
| Automated Quality-of-Service          | 1 1   |
|                                       | Control of applications priorities according to business needs.                 |
|                                       | <ul> <li>Automation of monitoring and adjustment</li> </ul>                     |
|                                       | <ul> <li>Minimization of admin efforts</li> </ul>                               |
|                                       | <ul> <li>Guaranteed service levels</li> </ul>                                   |
|                                       |   |
