Data Sheet FUJITSU Desktop ESPRIMO D757/E90+

Combines High Efficiency with Manageability

The FUJITSU ESPRIMO D757/E90+ Desktop provides high expandability and solid performance for your challenging business applications. The use of the same software load within the product series ensures perfect infrastructure compatibility and simplifies rollouts. Its 90%-efficient power supply will ensure environmental compliance for years to come. With its innovative Low Power Active Mode feature you are ready for instant communication in the modern office. Intel® Standard Manageability keeps administration costs low. Finally, EraseDisk ensures secure system retirement.

Quiet

Pleasant working environment due to an extremely quiet system

■ Innovative hardware design, optimized cooling concept ensures silent operations

Always Available Office PC - stay connected and save power

Be ready for instant communication and a significantly reduced energy bill

■ Innovative Low Power Active Mode and highly-efficient integrated power-supply

Energy efficiency and high performance

Low power consumption combined with high levels of performance

■ 7th generation Intel® Core™ processor family, a switched monitor outlet and a power supply with 90% efficiency

Green technology

Another example of the Fujitsu commitment to environmental protection and sustainability

 Halogen-free printed circuit board of mainboard, sophisticated product concept for the entire lifecycle

Serviceability

Easy to extend and optimal user-friendliness without any additional tools

■ Easy access to all replaceable and expandable components
