Designed for style and function

- A soft light to guide you in the dark
- Just tap the top of the product to snooze
- Smart touch display for easy device control
- Modern design adds style to your bedroom

PHILIPS

Highlights

Simulate natural sunrise

Inspired by nature's sunrise, light gradually increases before your wake time from soft morning red through orange, until your room is filled with bright yellow light. The process of changing and increasing light is designed to stimulate your body to wake up naturally, as light gently prepares your body for waking up while you are still asleep. By the time light has filled the room, your selected natural sound completes the wake up experience, leaving you ready for your day.

With RelaxBreathe for sleep

Inspired by well-known breathing and relaxation exercises our light-guided wind-down function is designed to help get you to sleep by helping you decompress from the day's activities and unwind. Follow one of seven rhythms of light intensity or sound with your breathing while keeping your eyes closed for a calm and peaceful transition from your day to your dreams

Sunset simulation to sleep

The sunset simulation program prepares your body to sleep by gradually decreasing light and optional sound to your set duration, gently helping you to relax before you fall asleep.

Multiple sound & music options

Wake up to nature sounds. At your set wake up time your selected sound will start to play softly, and gradually increase in volume to your pre-set level within a few minutes. The transition from sleep to waking is gentle, but intended to eventually get you fully awake. Connect your mobile device or tablet to the AUX port to turn the light into a speaker.

Multiple brightness settings

Sensitivity to light differs from person to person—a brightness level that could instantly

wake you might not budge someone else. Multiple light settings let you choose which intensity level is just right for you. In general, when the brightness is set to a higher light intensity a person needs less time to become fully awake. When you are not sleeping, the wake up light becomes an adjustable bedside or reading light.

Midnight and reading light

The ideal lux level lets you read comfortably before sleeping. When using RelaxBreathe or the sunset simulation, the auto shut-off will turn the light off after a set timeframe. While you are sleeping, the illuminated clock completely dims to darken your room. When turned on the middle of the night, it provides just enough light to find your way in the dark, letting you get in and out of bed without a jarring brightness to your senses. Easily set personalized controls for your light intensity and alarm scheduler.

Tap to snooze

A slight tap on top of the wake-up light sets the snooze mode. After nine minutes the sound will gently start playing again.

Specifications

Easy to use

- Anti-slip rubber feet
- Snooze type: Smart snooze
- Display brightness control: Self adjusting
- Instore demo function
- Charges mobile phone
- Tap snooze for sound: 9 minutes
- Control by smart phone: No
- Number of alarm times: 2

Weight and dimensions

- Product weight: including adapter 0.9 kg
- Product dimensions (W x D x H):
225x220x120 mm

Technical specifications

- Frequency: 50/60 Hz
- Voltage: 100-240VAC
- Cord length: 1.5 m

- Power Output Adapter: 18W
- Housing back color: Shiny white
- Type of lamp: LED

Sound

- Number of Wake-up Sounds: 8
- FM Radio: No
- AUX entry
- Number of relaxation sounds: 3

Light

- Brightness settings: 25
- Light colors: white, orange, yellow, amber
- Max Lux level: 315
- Sun themes: 1 preinstalled

Safety and Regulations
