

Philips Series 2000
Air humidifier

Up to 44 m²

Spreads 99% less bacteria*
Automatic humidity settings
Numerical feedback

HU4813/00

Hygienic humidification

NanoCloud technology

Breathe easier with the assistance of the Philips Humidifier Series 2000. NanoCloud evaporative technology spreads 99% less bacteria* vs. leading ultrasonic humidifiers and prevents wet spots and white dust*. Perfect for bedroom or nursery.

NanoCloud technology

- No hot water
- Natural evaporation process
- Prevents wet spots and white dust
- Spreads 99% less bacteria
- High water absorption and evaporation efficiency

Easy to Maintain

- Easy-clean design
- Easy-fill tank

Smart controls

- Automatic humidity settings
- Quiet sleep mode
- Timer

PHILIPS

Highlights

No hot water

A humidifier with low risk of burns from hot water or warm steam. NanoCloud technology does not heat the water, preventing risk of burns from hot water or warm steam.

Natural evaporation process

Hygienic and natural evaporative process to ensure optimized performance. Dry air passes through the humidifier. Water vapor is added and more humid air exits the humidifier into the surrounding air. NanoCloud technology uses such a natural evaporation process which draws dry air in, adds water molecules to the air, and emits humidified air into the room.

Prevents wet spots&white dust*

With its 360° design, the humidifier distributes the humidified air evenly throughout the room, preventing wet spots on the floor or surface. The NanoCloud technology also reduces the risk of spreading minerals into the air, thereby preventing white dust on furniture and surfaces.

Timer

When using the timer, the humidifier operates for a set number of hours and automatically switches off when set time has elapsed. Choose from 1, 4 or 8 hours.

Automatic humidity settings

Maintain a constant humidity level with the automatic humidity settings. Choose 40%, 50%, or 60% as your target humidity level and the humidifier will automatically turn on or off to reach the desired humidity level. Smart Humidity sensor enables the appliance precisely manages the humidity level. It also gives real time numerical room humidity rate level.

Easy-clean design

A round and minimalist design makes cleaning easy. This humidifier does not have a heating plate, so descaling is not required.

Easy-to-fill tank

Fill with a jar or bring the water tank to the tap. The 'max' indicator clearly shows how far to fill

the tank. When the tank is empty, the humidifier automatically shuts off and the display indicates a re-fill is needed.

Quiet sleep mode

In sleep mode, the humidifier runs at minimum noise level and all lights are off except for the speed indicator. This setting ensures you can maintain your desired humidity level even when you are sleeping.

3 fan speeds

The Philips Humidifier has 3 fan speeds and a humidification rate of 300ml/hr on the highest setting. It is perfect for medium size rooms in the house, up to 44 m².*

Spreads 99% less bacteria

Once the water is evaporated, the water molecules are so small that the water mist becomes invisible to human eyes. And because they are so small, these molecules are less able to carry bacteria into the air. Our laboratory testing confirms that NanoCloud technology spreads 99% less bacteria than leading ultrasonic humidifiers.

Specifications

Performance

- Room size: 44 m²
- Humidification rate: 300 ml/h
- Sound Power: 34 dB(A)

Features

- Fan speed: Sleep, Auto

Design and finishing

- Color(s): Black, silver
- Color of control panel: Black
- Control panel type: Button
- Material of main body: Plastic

Technical specifications

- Voltage: 220 V
- Cord length: 1.6 m
- Water tank: 2 L

Weight and dimensions

- Dimension of product (LxWxH):
249*249*339 mm

Replacement

- Humidifier wick: 3 months

Country of origin

- Country of origin: China

Sustainability

- Packaging: > 90% recycled materials
- User manual: 100% recycled paper

Service

- 2-year guarantee

Issue date 2017-08-18

Version: 2.0.1

* Prevents wet spots and white dust: Independent third-party test
Determination of deposition of minerals from liquid droplets on
furniture according to DIN 44973, IUTA e.V. To determine mineral
deposits onto furniture from airborne liquid droplets over a period
of 3 hours.

* Room size is calculated based on humidification rate tested by third
party lab, following AHAM HU-1-2006 (R2011)

* Results based on emission of the bacterium *Pseudomonas Fragi*
directly from clean units & filters, after 2 hours of continuous use, on
the highest setting, using sterilized water spiked with said bacterium,
in a 1 m³ chamber refreshed at 280 L/min, (74 gpm).
