

Healthier Air, Always

Capture harmful particles as small as PM0.02

This integrated HEPA and active carbon filter effectively captures harmful particles as small as PM0.02, incl. PM2.5, allergens, bacteria and virus. It also absorbs and locks formaldehyde, TVOC and odor inside its nano-sized pores.

Healthy Air

- Effectively removes PM0.02 (100 times smaller than PM2.5)
- Absorbs and locks formaldehyde, TVOC and odor
- Removes allergens, e.g. pollen, dust, pet dander, etc.
- Removes up to 99.9% bacteria and virus (H1N1)

Long-lasting performance

- Massive compacity of harmful particles: CCM >12000 mg
- Massive compacity of harmful gases: CCM>1500 mg

Easy installation

- Hassel free filter maintenance with all-in-one design

PHILIPS

Specifications

Performance

- Filters out bacteria
- Filters out formaldehyde
- Filters out PM2.5
- Filters out toluene
- Filters out viruses

Design and finishing

- Color(s): Grey

Weight and dimensions

- Weight of product: 2.1 kg

- Weight incl. packaging: 2.5 kg
- Dimension of product (LxWxH): 361x277x60 mm
- Dimension of packaging (LxWxH): 376x288x134 mm

Replacement

- Formaldehyde filter: For Purifier Series 6000

Country of origin

- Country of origin: China

Highlights

Active Carbon layer

The surface area of active carbon layer is as large as 55 football fields.

HEPA layer

Equipped with Philip's IPS Vitashield technology, the HEPA layer is made from ultra-fine non-woven fabric with a surface area of 3.6 m². The performance is more long-lasting and stable.

Integrated filter

Integrated HEPA and active carbon filter makes installation easy and convenient.

Long-last performance P-CADR

Effectively absorbs particles with cumulative clean mass (CCM) that is larger than 12000 mg. The filter is made with thermal bonding technology. 12 rubber stripes, which are made with Japanese technology, are especially designed for the filter. They strengthen filter structure and make filtration effects long-lasting. There are also up to 35 layers of folding in the filter.

Long-last performance F-CADR

Effectively absorbs harmful gases with cumulative clean mass (CCM) that is larger than 1500 mg. High level performance maintains formaldehyde concentration lower than GB/T standard (0.08mg/m³).

Removes bacteria and viruses

Proved to be effective in removing up to 99.9% bacteria and viruses like H1N1 by Airmid.

Removes allergens

Proved to remove allergens including pollen, dust, dust mite and pet dander by European Center for Allergy Research Foundation (Ecarf)
