HP Pro 3300 Microtower PC

HP Pro 3300 Series Microtower Business PC is newly re-designed and powerful enough to handle all your workplace computing tasks with the flexibility to allow your PC to grow with you in the future. You get a full-function, great looking PC with a heritage of quality and reliability.

HP recommends Windows® 7.

Newly redesigned

The redesign wasn't just about looks, but includes configurability and convenience as well. It boasts 2nd generation Intel® Core™ i3 and i5, processors[1] for the latest in performance.

Designed to fit typical business workspaces, the Microtower includes conveniently placed front USB 2.0 ports and audio ports. Standard video, network and additional USB ports are available on the rear.

Newest technology

Choose from a range of standard hard drive or optical drive options[2]. Standard DDR3 memory is energy efficient as well as expandable to help you save money and work efficiently.

Whether you're editing photos, creating multimedia presentations, or designing web content you'll see enhanced image clarity and detail with integrated Intel Graphics.

Flexible out-of-the-box

The HP Pro 3300 Microtower is ready to configure with extra memory slots, PCI Express (PCIe) slots, and 8.9/13.3 cm (3.5"/5.25") bays. Choose the genuine Windows® 7 operating system right for your environment.

More than what is in the box

Our business-focused innovations, included in every HP Pro 3300 Series PC, help you increase productivity, mitigate risk, reduce your environmental footprint, and improve your overall computing experience.

Not all features are in all editions of Windows 7. Systems may require upgraded and/or separately purchased hardware to take full advantage of Windows 7 functionality. See http://www.microsoft.com/windows/windows-7/ for details.

[1] 64-bit computing on Intel architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers and applications enabled for Intel® 64architecture. Processors will not operate (including 32-bit operation) without an Intel 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software configurations. See www.intel.com/info/em64t for more information. Dual Core is designed to improve performance of certain software products. Not all customers will necessarily benefit from the use of this technology. Intel's numbering is not a measurement of higher performance.
