- Instore demo function
- Charges mobile phone
- Tap snooze for sound: 9 minutes
- Control by smart phone

Highlights

Personalize sunrise and sunset

Multiple light settings let you choose your ideal sunrise: From the bright white sunrise of a crisp morning in Iceland, to the warm and cozy pink-hued dawn on a Caribbean island. Make your dawn and dusk even more personal by adjusting the light's length and intensity, as well as soothing sounds.

Simulate natural sunrise

Inspired by nature's sunrise, light gradually increases before your wake time from soft morning red through orange, until your room is filled with bright yellow light. The process of changing and increasing light is designed to stimulate your body to wake up naturally, as light gently prepares your body for waking up while you are still asleep. By the time light has filled the room, your selected natural sound or radio station completes the wake up experience, leaving you ready for your day.
