Samsung Electronics Co., Ltd

Samsung E-FOTA

The service that allows business to remotely control OS version of Samsung to specific business needs

Samsung releases new versions of Android OS to provide new features, improve performance, and resolve known bugs.
Each OS version goes through comprehensive testing and certification on our extensive range of mobile devices.
You might however want to wait before deploying a new OS version to your organization's devices.

"We want to control and be able to enforce OS updates."
- Leading chemical multinational -

"We need continuous and predictable patch management to ensure security."
- Leading international airline -

Key Features

Samsung E-FOTA provides OS version control by offering 3 key features

▪ **Selective Update**

Test OS prior to releasing to users

▪ **Forced Update**

Manage single version of OS within the enterprise

▪ **Time Control**

Set download time to avoid interrupting business
