Desk Stand A-ZTCDS

Camera A-ZTC

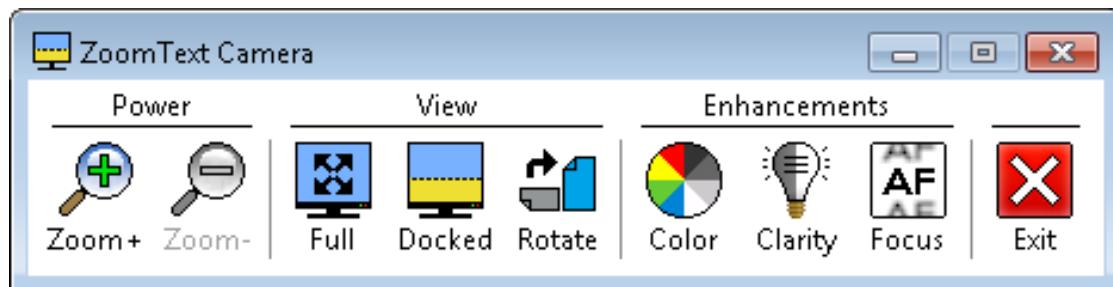

Clamp Stand A-ZTCS

(images not to scale)

## Description

The **ZoomText Camera** feature allows you to use any high-definition (HD) webcam to view and magnify printed items and other objects right on your computer screen—including bills, magazines, photographs, medicine labels, craft items and more.

ZoomText Camera User Interface features simple controls allow you to quickly zoom in and out, choose between full and high contrast colors, and switch between Full and Split screen views where you can see the camera image and your Windows desktop at the same time. By utilizing affordable and readily available HD webcams the ZoomText Camera provides a low-cost and portable alternative to conventional CCTVs

## Key benefits and advantages

### Portable

- Lightweight and compact
- Easily fits in your backpack or laptop bag
- Requires no AC power source (USB powered) - can be used with laptops even when you're away from wall power

### HD video quality

- Magnified print and graphics are impressively clear and easy to read

### Full-featured (has all essential CCTV features)

- Auto-focus
- Wide range of zoom levels
- Full screen and split-screen viewing
- Full color and high contrast two-color modes

### Camera image displays right on your computer screen

- Conveniently in view when you need it
- Instantly toggle camera on and off
- No need for second screen
- Saves space on your desktop
- Accommodates viewing all shapes and sizes of objects
- Can be placed over virtually any type of object
- Can be used to view items that won't fit under a desktop CCTV (e.g. large boxes and consumer products)
