# SuperNova Screen Reader
Part code: S-SN-SR
SuperNova Screen Reader CD single user licence

Description

Visual highlighting, natural voices, intelligent screen reading, Dolphin Cursor and robust Braille support. Suitable for people who are blind requiring complete access to a computer. Ideal for public access environments & organisations.

Screen reading speaks and Brailles text and controls so a person who is blind can independently use a regular desktop or laptop computer without needing to see the screen. Choose how much information is announced automatically with Text Style settings, Verbosity schemes and Monitor Markers. Or jump to particular info with Quick Navigation hotkeys, Item Finder and the Dolphin Launch Pad.

Available in a range of flexible multiple user licence options and fully compatible with the most popular Windows platforms, including Terminal Server and Citrix based networks, in addition to client Windows installations.

Features

- Type with confidence using character or word echo. As you write SuperNova accurately announces letters, numbers, punctuation, line breaks and thousands of other special symbols.
- Arrowing around or selecting text for editing, SuperNova speaks characters, words and lines. You can also press keys to speak sentences, paragraphs and tables.
- Text style information is announced so you can check your documents look great. Ensure accuracy in Microsoft Word where spelling and grammar errors are also indicated.
- Verbosity tells you about the types and states of over 60 kinds of control as you tab and arrow around web pages, Windows and app dialogs. Choose the amount of detail from 4 built-in verbosity schemes; take ultimate control by creating your own verbosity scheme; even choose separate verbosity for speech and Braille.
- Monitor Markers announce changes occurring elsewhere onscreen away from the cursor. Security notifications appearing in your web browser, file download progress, when the other person in an instant message conversation is typing a message

SuperNova Braille

- Read and write literary Braille in almost any Windows application.
- Instantly translate to and from Braille using dozens of included Braille translation tables.
- Works with majority of popular Braille displays.
- Understand screen layout with Physical Braille.
- Choose how much detail is shown in Braille with powerful Verbosity settings.
- Show Braille on screen.
- Control screen reader and perform many Windows commands using buttons on the Braille display.
- Use Braille to keep watch on parts of the screen away from the cursor with Tracking and Hooked Area options.

System Requirements:
Can be installed on wide and local area networks
Some specific Citrix & Terminal Server Environments
Windows 7 (32-bit editions)
Windows 7 (64-bit client editions)
Windows 8
Windows XP Home (with Service Pack 2 or later)
Windows XP Pro (with Service Pack 2 or later)

Dolphin is only able to offer product support for SuperNova installations in Citrix & Terminal Server environments where a Citrix Support Package has been purchased (Part no. S-SN-ASC).
