

Small Ergonomic Vertical Mouse

Designed to reduce wrist pronation and grip force for mouse users.

Part codes: M-SV-R (right) M-SV-L (left), M-SV-RW (wireless right)

Description

Ergonomic vertical shape mouse suitable for people with smaller hands. Available in Right hand, Left hand, and Right hand wireless versions. Provides relief from wrist stress caused by excess pronation and may be helpful for people who have RSI type symptoms.

Common problems occurring after repeated use of a standard mouse are hand and wrist pains, sometimes even running up the forearm. If ignored, these symptoms can cause serious pains and Repetitive Stress Injuries (RSI). This mouse is made to combat this discomfort by moving your hand and arm into a more natural position, which is more comfortable for regular use.

Wireless version connects to your PC through a small USB dongle, is good to use up to 10 meters distance from your PC, and the included rechargeable AAA batteries can be recharged using the provided USB charging cable.

Product Specifications

General

- Connection Method: Wireless USB dongle
- Operation Distance: 10m
- Wired versions USB cord
- Tracking Method: Optical 1600 DPI
- Power Source: (wireless version 2x AAA Batteries (Rechargeable Batteries))
