Highlights

Trim-n-Flow technology

Our new, innovative comb is designed to prevent hair from getting stuck in the clipper. So you can continue cutting your hair, from start to finish, without interruption.

DualCut Technology

Power through any type of hair with our advanced DualCut technology: an innovative two-sided cutting element that cuts hair twice as fast as one-sided blades.

Stainless steel blades

Self-sharpening stainless steel blades are incredibly long-lasting. Even after 5 years, they cut just like they did on day one.

13 lock-in length settings

Simply select and lock in the length you want. The adjustable comb has 12 lock-in length settings from 1mm to 23mm, with precisely 2mm between each length. Remove the comb entirely for a close 0.5mm trim.

Efficient corded use

The 1.8m long power cord provides constant power.

Comfortable grip

The HAIRCLIPPER Series 3000 is designed to be comfortable to use, convenient to handle and easy to operate. The special texture and grip allow you to easily move the clipper and cut all around your head.

Easy to clean

Simply click to release the detachable head to quickly release and clean the blades.

Zero maintenance

No oil needed, for easy maintenance and to save you time.
